### Draft Tasking 2018-01 Status/Discussion

- **MBR** willing to take the lead role, identify team to help support.
- Only identify the type of training, not the specific training.
- Possible to poll 'CSOs' that have taken either Manager or 2-week and determine what was good/bad/missing. Communicate with CSOs from several sites to gather their thoughts.
- Include 'high level' hazard analysis? Is hands-on needed? Do the responsibilities need definition to support the Tasking? CSOs working for operations? Does operations know what is needed? Cultural issue? Define a syllabus? Define some levels of the function (not necessarily all inclusive)? What is the gap between CS Analyst and Operations Supervisor and how do we train that gap?
- Potential Team Members: Brady-Raap (Lead), McKamy, Wilson, Hicks, Bowen
- DRAFT Tasking to Team by COB 13JUL18.
