

**CSSG TASKING 2007-01**  
Date Issued: February 5, 2007

Task Title: CSSG Review and Prioritization of Proposed NCSP Tasks for FY08

Task Statement: The CSSG is requested to review and prioritize the lower priority proposed NCSP tasks submitted to the NCSP manager for possible inclusion in the FY08 execution plan. There are 22 priority 1 tasks totaling approximately \$9.3M that are 'fenced' and do not need to be addressed by the CSSG (those ABOVE the yellow line in the attached file). The CSSG is requested to direct their attention to the tasks falling below the yellow line and prioritize them in order of technical merit and importance to maintaining criticality safety infrastructure for the DOE. The FY08 budget projection in the current NCSP Five Year Plan may be used as a reference for this tasking.

Task Deliverable: Written (transmission by email is acceptable) prioritized list of FY08 NCSP Tasks (highest to lowest) for those below the 'fenced' cutoff line.

Task Due: March 15, 2007
