

## **CSSG Notes (Friday – all day)**

**Location: NFO**

**Time 08:30 – 17:00**

Erickson, Kimball, Heinrichs, Hicks, McLaughlin, Wilson, Brady-Raap, Trumble, Hayes, Chambers, Westfall, Hopper (on speakerphone)

Tasking 2015-03: 3007 Revision (continued)

K. Kimball

Review of recently provided draft. Much 'sausage making' in discussing several areas of concern based on CSSG and DNFSB comments received. Reviewed all of the 'shall' statements for accuracy, and made several changes.

Tasking 2016-04: NPH and ANS-8

T. McLaughlin

Review of recently provided draft. Concerns voiced, and discussion held, about how information would, or should, be presented to ANS. Also discussed the role DOE should play in the effort.

Discussed if there were any 'missing' issues to address – none identified.

Tom will make some adjustments based on the discussion and provide a revised draft in the next several weeks.

Tasking 2016-05: Regulatory Roadblocks/Impediments

F. Trumble

Introduced, and presented a list of potential issues as examples, also discussed the scope and product. Based on the discussion (today and yesterday), the following are the major facilities to be included: KAMS/KIS (Trumble), UPF (Kimball), PDCF (Raap), NCERC (Hicks)

Discussed if group should track down specific issues of wording, though this has essentially been done previously (see other CSSG Taskings), or identify specific examples that have impacted cost and schedule. Appears a combination is appropriate, though due to the aggressive schedule will need to be brief in either case.

How to include Emeritus members in CSSG communications/etc.?

D. Erickson

Not addressed

The NEW view from the top

A. Chambers

McKamy guidance to Chambers: follow mission and vision, trust CSSG. Need to make sure program has budget to function. We (CSSG) need to help her know of items the program needs. Angela's immediate focus is on time spent reviewing and authorizing Integral Experiment Requests and preparing for the TPR.

KRUSTY is high visibility for NA-50

How can the CSSG help the NCSP/Angela?

All

See notes from Thursday – some high level issues were addressed.
