

Date: May 6, 2020
Subject: CSSG Telecon

Participants: Erickson, Hayes, Trumble, Morman, Kimball, Wilson, Hicks, McLaughlin, Heinrichs, McKamy, Bowen, Zerkle

Agenda:

Status of Taskings:

2020-01 Update/Replace DOE-STD-1158
Draft out for final review, comments due 08 May
Need to determine where it will go next (CSCT, EFCOG, etc.)

2020-02 Proposal Review
This Tasking is complete and posted.

2020-03 CSSG review of DOE Order 420.1C, III.3.f.
Awaiting final input from Kevin after discussion with NNSA
Should receive later this week.

Draft 2020-04 SRPPF Technical Assist
Tasking drafted, soliciting participants (due 12 May), timing of assist is TBD
Thoughts on Tasking and or questions about the assist?
The timing is up to NNSA. The final scope is TBD depending on the status at the time of the assist. NNSA will be the final 'authority'.
Will the Team be utilized throughout the CD process?
Important to ensure correct NCS treatment in CD-1.

ANS Panel Session:

The ANS Annual meeting has gone virtual, and the registration cost has dropped significantly. Awaiting information from ANS on how this meeting will proceed, especially as related to panel sessions, prior to determining path forward. The CSSG would prefer a face-to-face if possible as it allows more interaction, so is considering postponing until the Winter meeting.

Chair/Deputy Transition:

Need to confirm with Angela for the actual timing, but transition was planned for the F-t-F at the ANS meeting. May push until the FY end. Per the Charter we are soliciting nominees from the membership. **DKH to followup with ANS regarding postponement until Winter Meeting.**

Round the Table:

- Any follow-on and/or path forward information related to 2016-05 and communicating with Dan Sigg, etc.? No status provided at this time. **DGE to followup with Angela**
- Status of ORPS reporting related to criticality safety by the CSCT? **REW will follow up. REW reports that the CSCT has distributed several options for comment, but no consensus has been reached on a recommendation.**
- 5-Year plan – Draft is out for review. Appreciate the CSSG input provided, including the comments. The top three proposals have been chosen for now, may select the next three if funding allows.
