

CSSG TASKING 2006-07

Issued June 19, 2006

Task Title: Technical review of the draft document, "Preclosure Criticality Analysis Process Report"

Task Statement: The CSSG review should focus on the technical content of the document based on the requirements of 10 CFR 63, the guidance found in the Yucca Mountain Review Plan (YMRP, NUREG-1804) and the Integrated Issue Resolution Status Report (IIRSR, NUREG-1762). Please provide a consolidated list of comments/proposed improvements. It is currently anticipated that the draft will be available for review in the mid to late July 2006 timeframe. Adjustments to this schedule may be necessary depending on the receipt date at the Yucca Mountain Project (YMP). The review should be performed and comments submitted within two weeks of receipt by the CSSG.

Task Deliverable: A formal written report to the NCSP Manager to transmit to Paige Russell, criticality lead for the YMP.

Task Due: TBD
