

Five-Year Execution Plan –
for the
Mission and Vision
of the
United States Department of Energy
Nuclear Criticality Safety Program

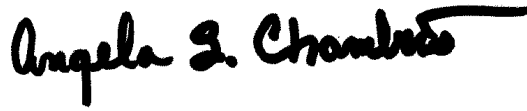

June 2023, Revision 4

FY 2023 through FY 2027

Department of Energy Nuclear Criticality Safety Program Five-Year Execution Plan for Fiscal Years 2023 through 2027, dated August 2022.

Approved:

Dr. Angela Chambers
 Manager
 Nuclear Criticality Safety Program

Revision History

Modification	Section	Date
Revision 0 – initial issue	All	August 5, 2022
Revision 1 – SRS IPD1 milestone scope updated to FY23	Main Plan, IPD Section	October, 2022
Revision 1 – Updates for site hosting the annual Technical Program Review	Main Plan, Appendix A	October, 2022
Revision 1 – Updates to the ORNL AM2 section	Main Plan, AM Section	October, 2022
Revision 2 – Update to ORNL ND4 Q4 milestone	Main Plan, ND Section	October, 2022
Revision 2 – Update to ORNL ND6 Q4 milestone	Main Plan, ND Section	October, 2022
Revision 2 – Update to ORNL AM3 Q4 milestone	Main Plan, AM Section	October, 2022
Revision 2 – Update to ORNL ND2 milestone	Main Plan, ND Section	October, 2022
Revision 2 – Update to Appendix A. SRS funding is \$0K	Main Plan, Appendix A	October, 2022
Revision 2 – MIHL – update IER 537 from complete to initiate	Main Plan, Technical Program Elements	October, 2022
Revision 3 – See Addendum 1	Main Plan, Technical Program Elements	April, 2023
Revision 4 – See Addendum 2	Main Plan, Technical Program Elements	June, 2023

**Addendum 1 to the United States Department of Energy Nuclear Criticality Safety Program
Five-Year Execution Plan
FY 2023 through FY 2027 Revision 3 Changes, February 2023
Main Plan and Integral Experiment Plan Changes:**

1. Appendix C changes for Los Alamos National Laboratory (LANL) foreign trips:
 - Add the Seventeenth International Symposium on Reactor Dosimetry in Lausanne, Switzerland, May 2023. Nick Whitman will attend. The conference is devoted to reactor dosimetry and radiation metrology. A trip report will be due in quarter 3 to the NCSP manager.
 - Add the Workshop on Nuclear Data Evaluation for Reactor applications (WONDER-2023) in Aix-en-Provence, France, June 2023. The conference provides topics important to integral experiment benchmarking and validation of nuclear data. Kristin Stolte and Nick Thompson will attend. A trip report will be due in quarter 3 to the NCSP manager.
 - Update ICSBEP attendees.
2. Appendix C – Add the Oak Ridge National Laboratory (ORNL) foreign trip to the Workshop on Nuclear Data Evaluation for Reactor applications (WONDER-2023) in Aix-en-Provence, France, June 2023. The conference provides participants with state-of-the-art information and needs for reactor application technologies, fuel cycle, and vulnerabilities. Chris Chapman and Kemal Ramic will attend. A trip report will be due in quarter 3 to the NCSP manager.
3. Analytical Methods – ORNL SCALE AM2 report will no longer be on MAVRIC because those updates aren't supported with NCSP funding. Instead they will provide a CSAS improvements report.
4. Integral Experiments SNL IE4 was removed because it is included as part of IER 484.
5. Move \$100K from LANL ND1 to NNSS IE1. See Budget Changes (1.) below.
6. Move \$50K from PNNL IPD1 to ORNL IPD4 for Nuclear Criticality Safety - Learning From Experience (LFE) Database. See Budget Changes (2.) below.
7. Add \$50K to ORNL IPD4 for Nuclear Criticality Safety - Learning From Experience (LFE) Database. See Budget Changes (3.) below.
8. Move \$100K from ORNL TS8 to NNSS IE1. See Budget Changes (4.) below.
9. Move \$30K from ORNL TS8 to DOE HQ . See Budget Changes (4.) below.
 - See Budget Changes (5.) below.
10. Add \$200K to NNSS IE1. See Budget Changes (6.) below.
11. Move \$100K from LANL AM to LANL IE
 - LANL-AM1 – move \$50K
 - LANL-AM2 – move \$50K
 - See Budget Changes (7.) below
12. Move \$300K from LANL ND to LANL IE
 - LANL-ND1 move \$150K
 - LANL-ND2 move \$150K
 - See Budget Changes (8.) below
13. Move \$500K from LANL TE to LANL IE
 - LANL-TE3 move \$450K
 - LANL-TE6 move \$25K
 - LANL-TE8 move \$25K
 - See Budget Changes (9.) below.

14. Add \$900K to LANLIE

- See Budget Changes (10.) below.

Budget Changes:

1. LANL ND1 – remove \$100K

- Previous LANL ND1 Budget = \$761K, Rev 3. LANLND1 Budget = \$661K
- Previous LANL Total ND Budget = \$1550K; Rev 3. Total LANL ND Budget = \$1450K
- Previous Total LANL Budget = \$13310K; Rev 3. total LANL Budget = \$13210K
- Previous Total LANL Budget w/CSSG = \$13465K; Rev 3. total LANL Budget w/CSSG allocation = \$13365K

2. PNNL IPD1 – remove \$50K

- Previous PNNL IPD1 Budget = \$50K, Rev 3. PNNL IPD1 Budget = \$0K
- Previous Total PNNL IPD Budget = \$50K; Rev 3. Total PNNL IPD Budget = \$0K
- Previous Total PNNL Budget = \$90K; Rev 3. total PNNL Budget = \$40K

3. ORNL IPD4 – add \$50K

- Previous ORNL IPD4 Budget = \$0K, Rev 3. ORNL IPD4 Budget = \$50K
- Previous Total ORNL IPD Budget = \$40K; Rev 3. Total ORNL IPD Budget = \$90K

4. ORNL TS8 – remove \$130K

- Previous ORNL TS8 Budget = \$150K, Rev 3. ORNL TS8 Budget = \$20K
- Previous Total ORNL TS Budget = \$1010K; Rev 3. Total ORNL TS Budget = \$880K
- Previous Total ORNL Budget = \$5906K; Rev 3. total ORNL Budget = \$5826K
- Previous Total ORNL Budget w/CSSG = \$6011K; Rev 3. total ORNL Budget w/CSSG allocation = \$5931K

5. Total NCSP Budget – remove \$30K

- Previous NCSP total budget = \$29080K; Rev 3. NCSP total budget = \$29050K

6. NNSS1 IE1 – add \$200K

- Previous NNSS IE1 Budget = \$3056K, Rev 3. NNSS IE1 Budget = \$3256K
- Previous Total NNSS IE Budget = \$3350K; Rev 3. total NNSS Budget = \$3550K

7. LANL AM – transfer \$100K

- Previous LANL AM1 Budget = \$1160K, Rev 3. Move \$50K to LANL IE3 and LANL-IE1a; Rev 3. LANL AM1 Budget = \$1110K
- Previous LANL AM2 Budget = \$300K, Rev 3. Move \$50K to LANL IE3 and LANL-IE1a; Rev 3. LANL AM2 Budget = \$250K
- Previous Total LANL AM Budget = \$1500K; Rev 3. LANL AM Budget = \$1400K
- Previous Total AM Budget = \$4124K; Rev 3. Total AM Budget = \$4024K

8. LANL ND – transfer \$300K

- Previous LANL-ND1 Budget = \$661K, Rev 3. Move \$150K to LANL IE3 and LANL-IE1a; Rev 3. LANL ND1 Budget = \$511K
- Previous LANL-ND2 Budget = \$789K, Rev 3. Move \$150K to LANL IE3 and LANL-IE1a; Rev 3. LANL ND2 Budget = \$639K
- Previous Total LANL ND budget = \$1450K; Rev 3. LANL ND Budget = \$1150K

- Previous Total ND budget = \$4616K; Rev 3. Total ND budget = \$4316K
9. LANL TE- transfer \$500K
- Previous LANL-TE3 Budget = \$472K, Rev 3. Move \$450K to LANL IE3 and LANL-IE1a; Rev 3. LANL TE3 Budget = \$22K
 - Previous LANL-TE6 Budget = \$45K; Rev 3. Move \$25K to LANL IE3 and LANL-IE1a; Rev 3. LANL TE6 Budget = \$20K
 - Previous LANL-TE8 Budget = \$33K; Rev 3. Move \$25K to LANL IE3 and LANL-IE1a; Rev 3. LANL TE8 Budget = \$8K
 - Previous Total LANL TE Budget = \$550K; Rev 3. LANL TE Budget = \$50K
 - Previous Total TE Budget = \$1510K; Total TE Budget = \$1010K
10. LANL IE – add \$900K
- Previous LANL-IE3 Budget = \$2325K; Rev 3. Add \$700K; Rev 3. LANL IE3 Budget = \$3025K
 - Previous LANL-IE1a Budget = \$5500K; Rev 3. Add \$200K; Rev 3. LANL IE1a Budget = \$5700K
 - Previous Total LANL-IE Budget = \$9,500K; Rev 3. LANL IE Budget = \$10,400K
 - Previous Total IE Budget = \$16,025K; Rev 3. Total IE Budget = \$16,925K

Final Budget Allocation by Site including CSSG Allocation:

FY23 Budget in \$K (Before CSSG Allocation)		FY23 CSSG Allocation		FY23 Budget in \$K (After CSSG Allocation)
Lab	Budget	CSSG Member	Budget	Budget
BNL	\$ 460			\$ 460
CSSG	\$ 355			
LANL	\$ 13,210	Member 1	\$ 55	\$ 13,365
		Member 2	\$ 50	
		Member 3	\$ 50	
LLNL	\$ 3,379	Member 1	\$ 50	\$ 3,429
NNL	\$ 15			\$ 15
NNSS	\$ 3,550			\$ 3,550
ORNL	\$ 5,826	Member 1	\$ 5	\$ 5,931
		Member 2	\$ 30	
		Member 3	\$ 40	
		Member 4	\$ -	
		Member 5	\$ 30	
PNNL	\$ 40			\$ 40
RPI	\$ 485			\$ 485
SNL	\$ 1,710			\$ 1,710
SRS	\$ -	Member 1	\$ 20	\$ 20
Y12	\$ 20	Member 1	\$ 25	\$ 45
Total	\$ 29,050		\$ 355	\$ 29,050

Addendum 2 to the United States Department of Energy Nuclear Criticality Safety Program Five-Year Execution Plan

FY 2023 through FY 2027 Revision 4 Changes, June 2023

IE and Main Plan Changes:

1. Make It Happen List:
 - a. IER 423 – Provide two of the three main sections, Detailed Description and Benchmark Specifications, of the Flattop benchmark evaluation to the independent reviewer(s).
 - b. IER 519 – By 4th Quarter, complete 3 weeks of experiments in support of DOE-EM tank farms.
 - c. IER 575 – removed because Li fabrication could not be done at Y12.
2. IER 488 - HEU Critical and Subcritical Measurements (MUSIC). CED-4b is initiated using FY22 carryover funding. Deliverable will be FY24Q2.
3. IER 499 - TEX with chlorine. In FY23, IER 519 replaces IER 499. IER 499 will be a high priority in FY24. The IER will move back to start at CED-2.
4. IER 517 - Critical Measurements with Molybdenum. CED-2 should be initiated using FY23 funding. Deliverable will be FY24Q2.
5. IER 519 – Thermal/Epithermal Experiments (TEX) with Absorbers to Provide Validation Benchmarks for Hanford Tank Farms. CED-3A and CED-3B to be completed FY23.
6. IER 575 – TEX with Lithium. Removed because Li fabrication cannot be done at Y12. This will be re-baselined in FY24 IE plan.
7. IER 574 Godiva Characterization. CED 4a is initiated using current FY23 funding. Deliverable will be Q4.
8. PNNL-IE1- Use carryover to complete work. A quarterly report is needed to track the dosimetry measurements at NCERC.
9. Reduce BNL-TS6 allocation from \$100K to \$77K to match G2 allocation. This is a \$23K reduction in funding. See Budget Changes (1.) below.
10. Increase CSSG allocation from \$355K to \$379.5K to account for increase of \$30K funding for ANL, reduction of \$1K from SRS, and \$4.5K reduction from Y12. This is a total increase of \$24.5K. See Budget Changes (2.) below.
11. Increase LANL-IE 3 allocation from \$3025K to \$4526.7K. This includes a total increase of \$1501K in G2 funding of coming from an increase of \$2480K (\$2169+100) G2 funding, and a reduction in G2 funding of \$768K. See Budget Changes (3.) below.
12. Created new task LLNL-ND13 for PPAC target fabrication. Funded at \$31K via the G2 allocation of \$202.5K. See Budget Changes (4.) below.
13. Comment only – LLNL-IE1 funding did not change. The G2 funding of \$202.5K provided \$31K for LLNL-ND13 and \$171.5K in funding that was originally withheld in G2. Thus, the G2 allocation was only replacing funds and there was no increase or decrease in the LLNL-IE1 funding.
14. Increased NNS-IE1 funding from \$3256K to \$3911.5K. Received additional G2 funding of \$655.5K. See Budget Changes (5.) below.
15. Move \$70K from ORNL-AM2 to ORNL-TS7. See Budget Changes (6.) below.
16. Decrease ORNL-TS2 allocation from \$660K to \$294.5K to match G2 allocation. This is a \$365.5K decrease in funding. See Budget Changes (7.) below.

17. Increased ORNL-ND11 funding from \$125K to \$620.5K. This is a result of the additional \$495.5K of G2 funding. See Budget Changes (8.) below.
18. Reduce PNNL-AM1 allocation from \$40K to \$35,500 to match G2 allocation. This is a \$4.5K reduction in funding. See Budget Changes (9.) below.
19. Reduce RPI-ND1 allocation from \$385K to \$360K to match G2 allocation. This is a \$25K reduction in funding. See Budget Changes (10.) below.
20. Decrease SNL-TS12 allocation from \$175K to \$89.5K to match G2 allocation. This is a \$85.5K decrease in funding. See Budget Changes (11.) below.

Budget Changes:

1. BNL-TS6 – Reduce original \$100K in funding to \$77K. This is a reduction of \$23K in G2 funding.
 - Previous BNL-TS6 Budget = \$100K. Rev 4 BNL-TS6 Budget = \$77K
 - Previous Total BNL Budget = \$460K. Rev 4 Total BNL Budget = \$437K
2. CSSG Funding - Increase original CSSG allocation by \$24.5K. This is from an increase of \$30K funding for ANL, \$1K reduction in funding for SRS, and \$4.5K reduction in funding for Y12.
 - Previous CSSG Budget = \$355K. Rev 4 CSSG Budget = \$379.5 K
3. LANL-IE3 – Series of changes resulted in net increase of funding of \$1501K. See information above for those changes.
 - Previous LANL-IE3 Budget = \$3,025K. Rev 4 LANL-IE3 Budget = \$4526K
 - Previous LANL IE Budget = \$10,400K. Rev 4 Total LANL IE Budget = \$11,901K
 - Previous LANL Total Budget = \$13210K. Rev 4 Total LANL Budget = \$14,711K
 - Previous LANL Total Budget w/CSSG= \$13365K. Rev 4 Total LANL Budget w/CSSG = \$14,866K
4. LLNL-ND13 – created new task with \$31K for PPAC Target Fabrication. The allocation came from the G2 funding.
 - Previous LLNL-ND13 Budget = \$0K. Rev 4 LLNL-ND13 Budget = \$31K
 - Previous LLNL ND Budget = \$375K. Rev 4 Total LLNL ND Budget = \$406K
 - Previous LLNL Budget = \$3379K. Rev 4 Total LLNL Budget = \$3410K
 - Previous LLNL Budget w/CSSG = \$3429K. Rev 4 Total LLNL Budget w/CSSG = \$3460K
5. NNSS IE1 – Increased funding by \$655.5K
 - Previous NNSS-IE1 Budget = \$3,256K. Rev 4 NNSS-IE1 Budget = \$3911K
 - Previous NNSS IE/Total Budget = \$3550K. Rev 4 NNSS IE/Total Budget = \$4205.5K
6. ORNL AM2 -moved \$70K to ORNL TS7.
 - Previous ORNL-AM2 Budget = \$1160K. Rev 4 ORNL-AM2 Budget = \$1090K
 - Previous ORNL AM Budget = \$2300K. Rev 4 ORNL AM Budget = \$2230K
 - Previous ORNL-TS7 Budget = \$100K. Rev 4 ORNL-TS7 Budget = \$170K
7. ORNL-TS2 – Decrease funding by \$365.5K
 - Previous ORNL-TS2 Budget = \$660K. Rev 4 ORNL-TS2 Budget = \$294.5K
 - Previous ORNL TS Budget = \$950K. Rev 4 ORNL TS Budget = \$584.5K
8. ORNL-ND11 – Increased funding by \$495.5K

- Previous ORNL ND11 Budget = \$125K. Rev 4 ORNL ND11 Budget = \$620.5K
 - Previous ORNL ND Budget = \$2016K. Rev 4 ORNL ND Budget = \$2511.5K
 - Previous ORNL Budget = \$5826K. Rev 4 ORNL Budget = \$5956K
 - Previous ORNL Budget w/CSSG = \$5931K. Rev 4 ORNL Budget w/CSSG = \$6061K
9. PNNL-AM1 – Decrease funding by \$4.5K.
- Previous PNNL-AM1/Total Budget = \$40K. Rev. 4 PNNL-AM1/Total Budget = \$35.5K
10. RPI-ND1 – Decrease funding by \$25K.
- Previous RPI-ND1 Budget = \$385K. Rev 4 RPI-ND1 Budget = \$360K
 - Previous RPI ND/Total Budget = \$485K. Rev 4 RPI ND/Total Budget = \$460K
11. SNL TS12 – Decrease funding by \$85.5K
- Previous SNL-TS12 Budget = \$175K. Rev 4 SNL-TS12 Budget = \$89.5K
 - Previous SNL TS Budget = \$255K. Rev 4 Total SNL TS Budget = \$169.5K
 - Previous SNL Budget = \$1710K. Rev 4 SNL Budget = \$1624.5K
12. Summary of total budget changes from above. Addendum 1, Rev 3 balances are used in the comparisons.
- Previous Total NCSP budget = \$29,050K. Rev 4 New Total NCSP budget = \$31,254K
 - Previous Total NCSP AM budget = \$4,024K. Rev 4 New Total NCSP AM budget = \$3,949.5K
 - Previous Total NCSP IE budget = \$16,925K. Rev 4 New Total NCSP IE budget = \$19081.5K
 - Previous Total NCSP ND budget = \$4,316K. Rev 4 New Total NCSP ND budget = \$4,817.5K
 - Previous Total NCSP TS budget = \$1,835K. Rev 4 New Total NCSP TS budget = \$1455.5K

Final Budget Allocation by Site including CSSG Allocation:

FY23 Budget in \$K (Before CSSG Allocation)		FY23 CSSG Allocation		FY23 Budget in \$K (After CSSG Allocation)	
Lab	Budget	CSSG Member	Budget	Lab	Budget

Y12	Y-12 National Security Complex

¹COG was originally developed to solve deep penetration problems in support of underground nuclear testing. Variance reduction techniques are very important to these problems and hence the name COG was chosen as in “to cog the dice” or cheat by weighting.

²KENO is a family of Monte Carlo criticality codes whose name came from an observation of the KENO game in which small spheres, under air levitation, arbitrarily move about in a fixed geometry.

³MCNP[®] and Monte Carlo N-Particle[®] are registered trademarks owned by Triad National Security, LLC, manager and operator of Los Alamos National Laboratory. Any third-party use of such registered marks should be properly attributed to Triad National Security, LLC, including the use of the ‘®’ designation as appropriate. Any questions regarding licensing, proper use, and/or proper attribution of Triad National Security, LLC, marks should be directed to trademarks@lanl.gov.

⁴SAMMY is a nuclear model code, which applies R-Matrix theory to measured data and produces resolved and un-resolved resonance parameters in Reich-Moore and other formalisms.

⁵SCALE is a system of well-established codes and data for performing nuclear safety (criticality, shielding, reactor physics and fuel irradiation) analyses.

United States Department of Energy

Nuclear Criticality Safety Program Five-Year Execution Plan

1.0 Nuclear Criticality Safety Program Mission and Vision

The Nuclear Criticality Safety Program (NCSP) Mission and Vision, as stated in The Mission and Vision of the United States Department of Energy Nuclear Criticality Safety Program for the Fiscal Years 2019-2028 (https://ncsp.llnl.gov/docs/NCSP_MISSION_VISION.pdf), are the following:

- The NCSP mission is to provide sustainable expert leadership, direction, and the technical infrastructure necessary to develop, maintain, and disseminate essential technical tools, training, and data required to support safe, efficient fissionable material operations within the United States (U.S.) Department of Energy (DOE).
- The NCSP will be a continually improving, adaptable, and transparent program that communicates and collaborates globally to incorporate technology, practices, and programs to be responsive to the essential technical needs of those responsible for developing, implementing, and maintaining nuclear criticality safety.

The NCSP is funded by the National Nuclear Security Administration (NNSA). Dr. Angela Chambers (NA-ESH-21) is the NCSP Manager. She is supported by the Criticality Safety Support Group (CSSG) and the Nuclear Data Advisory Group (NDAG), regarding technical matters, and by the Criticality Safety Coordinating Team (CSCT), consisting of Federal Criticality Safety Practitioners at the sites regarding DOE field criticality safety issues. Charters for the CSCT, CSSG, and the NDAG can be found on the NCSP website at: (<http://ncsp.llnl.gov/>).

The NCSP Mission and Vision is achieved by identifying and accomplishing a set of five-year programmatic goals in five broad technical program elements that support identified ten-year goals. The NCSP Five-Year Plan defines tasks that are designed to accomplish specific goals identified in the NCSP Mission and Vision. The current Five-Year Plan has been developed to accomplish these Mission and Vision goals with the advice and assistance of experts appointed by the NCSP manager or working under charters approved by the NCSP manager. The five technical program elements are:

- Analytical Methods (AM)
- Information Preservation and Dissemination (IPD)
- Integral Experiments (IE)
- Nuclear Data (ND)
- Training and Education (TE)

The NCSP Mission and Vision provides specific goals for each program element. Each task in the current Five-Year Plan aligns with a specific NCSP Mission and Vision goal. The number of goals addressed by the current Five-Year Plan is provided in Figure 1.1. Figure 1.1 indicates the NCSP is on track to accomplish a significant number of Mission and Vision goals in FY23. The subsequent discussion provides a summary of the projected task accomplishments and technical gaps for each program element. In FY23, a limited budget is available to initiate new tasks.

Figure 1.1 Summary of NCSP Mission and Vision Program Element Goals

The Analytical Methods (AM) program element provides for the development and maintenance of state-of-the-art analytical capabilities for the processing of nuclear data from the Evaluated Nuclear Data File (ENDF) and the radiation transport analysis capabilities needed to perform nuclear criticality safety analyses. The Five-Year Plan tasks specifically supports 22 of 34 AM goals (65%) required to develop and sustain state-of-the-art cross-section processing and radiation transport modeling capabilities and expertise needed for criticality safety analyses. Regarding the overall AM technical gap over the next 5 years, the NCSP is continuing to make a modest investment at each site for succession planning efforts. University tasks, envisioned to assist in these goals, have been completed in FY22. Technical gaps still exist for thermal scattering law data covariance evaluations, coupling NCS radiation transport software with Computer Aided Drawing (CAD) packages, developing, and maintaining time-dependent radiation transport accident analysis capabilities, developing, and deploying methods to provide integral experiment correlation data, and providing correlation data for integral benchmark experiments, to name a few.

The Integral Experiments (IE) program element maintains a fundamental capability for the DOE NCSP to be able to perform critical, subcritical, and fundamental physics measurements, to address site-specific needs on a prioritized basis, and this program element also supports maintaining a fundamental nuclear material handling capability, which enables hands-on NCS training programs and various other programs for the DOE NCSP and other Government Agencies. The Five-Year Plan tasks specifically support 9 of 34 (26%) IE goals to assess, design, perform, and document integral experiments. The NCERC small sample Rabbit Transfer System will be completed without NCSP funding. There are some IE goals that cannot be addressed within the current five-year budget targets. Examples of goals not addressed include: expansion of the radiochemistry laboratory capabilities at NNSS; standup “hot”/”cold” machine shops at NCERC; design and deploy low scatter capabilities at NCERC; acquisition of Np metal at NCERC; and the construction of new critical assemblies (solution reactor and Np burst reactor). Task proposals have been

submitted for these goals, and these proposals will be considered pending increased NCSP IE budget targets.

The Information Preservation & Dissemination (IPD) program element preserves primary documentation supporting criticality safety [e.g., benchmark critical experiments from the International Criticality Safety Benchmark Evaluation Project (ICSBEP)] and makes this information available for the benefit of the technical community including international partners (e.g., IRSN, AWE, CEA, and OECD) through the NCSP website. Funding support by the NCSP also allows critical benchmark and computational validation experts to lead the ICSBEP Technical Review Group meetings at OECD each year. The Five-Year Plan tasks specifically support 9 of 12 (75%) IPD goals for preserving and disseminating technical, programmatic, and operational information important for nuclear criticality safety. There are some IPD goals that cannot be addressed based on current budget targets. Examples of goals not addressed include operating and maintaining a classified IPD database and searchable NCS engineer database. A “practitioner” database was implemented in the past but was not included in the new NCSP website design. This database was difficult to maintain with correct information. Further, the NCSP may not be the best program through which information can be quickly disseminated through the NCS community. The US DOE’s Energy Facility Contractors Group (EFCOG) and American Nuclear Society (ANS) Collaborate system can quickly send information to the community via video teleconference or email and precludes the need for the NCSP to provide similar capabilities.

The Nuclear Data (ND) program element includes the measurement, evaluation, testing, and publication of neutron cross-section data for nuclides of high importance to nuclear criticality safety analyses. The Five-Year Plan tasks specifically support 12 of 27 (44%) ND goals to improve and disseminate measured and evaluated differential cross-section and covariance data needed by the AM element to support NCS analyses. The number of M&V goals supported by NCSP FY23 work was reduced compared to last year due to various task that were completed at LANL, ORNL, and LLNL. Examples of goals not addressed in FY23 but are addressed in the out years include identify and prioritize differential measurements beyond the next five years; identify and prioritize differential evaluations beyond the next five years. Overall, many goals are addressed within the current ND budget targets; however, technical gaps do exist, and some ND goals cannot be addressed. Examples of goals not addressed include developing new analysis tools to fully utilize new experimental capabilities such as the time project chamber (TPC), Chi-nu, and correlated data.

The Training and Education (TE) program element identifies, develops, and facilitates training needs and educational resources (including hands-on training with fissionable material systems) in areas where no suitable alternative exists. The primary purpose of the TE element is to maintain and enhance the technical abilities and knowledge of those who impact or are impacted directly by the practice of criticality safety. The Five-Year Plan tasks specifically support 9 of 11 (91%) TE goals in FY23. The tasks primarily support the development and maintenance of the classroom and “hands-on” training courses at the Nevada Field Office, SNL and NNSS. The NCSP Manager’s Course has been modified because of CSSG tasking report 2018-01 to include content for Criticality Safety Officers. This course was piloted in FY21 at the NCERC and FY22 at Sandia. In FY20, ORNL published a feasibility study for a new subcritical assembly to be located at ORNL to provide hands-on training for fissile material handlers, criticality safety practitioners, university students and those with responsibilities in nuclear criticality safety. Work on this task will continue through FY22. FY22 work tasks will not address the Mission and Vision goal to provide a gap analysis of training needs based on an assessment of available training and education resources in the national and international community. New NCS staff are being sought via implementation of NCS engineer university pipeline programs at LANL and LLNL. Other pipeline programs have been proposed with the Georgia Institute of Technology and Texas A&M University working with ORNL. The only goal not addressed with FY23 work tasks is the goal of developing best practices through a review of training and qualification programs throughout the DOE complex.

Although some technical gaps exist in each program element, execution of the NCSP Five-Year Plan will support and accomplish a significant number of Mission and Vision goals (61 of 118 or 52%) in FY23. As a result, the NCSP will be able to accomplish the overall mission to provide sustainable expert leadership, direction, and technical infrastructure needed to support safe, efficient fissionable material operations

within the DOE. NCSP Mission and Vision goal and attribute alignment on NCS community needs will be discussed for realignment in the next revision.

2.0 Technical Program Elements

As mentioned above, the NCSP includes the following five technical program elements:

- Analytical Methods
- Integral Experiments
- Information Preservation and Dissemination
- Nuclear Data
- Training and Education

A description of how each of these elements contributes to the enhancement of criticality safety is contained in the NCSP Mission and Vision document. This Five-Year Execution Plan contains the road map for each of the five technical program elements, including a budget, tasks, and milestones for completing the work and achieving the NCSP Vision. All tasks are approved based on their contribution to the achievement of the five- and ten-year goals in the Mission and Vision document. Funding figures are provided for each program element section. The status of all milestones will be reported to the NCSP Manager in quarterly reports that are due no later than three weeks from the last day of the month following the end of the quarter.

Funding for NCSP activities for FY2023-FY2027 are shown in Figures 2.0-1 – 2.0-5.

Finally, the goal of the NCSP is to provide “transparent responsiveness” for the DOE and Stakeholders. Therefore, this Plan and all accomplishments achieved under the auspices of the NCSP are posted in a timely manner on the NCSP website at: <http://ncsp.llnl.gov/>.

Pacific Northwest National Laboratory	90	86	86	86	86
Total	29,080	30,500	30,500	30,500	30,500

** CSSG funds for FY23 have been distributed to the NCSP sites. For the outyears, the CSSG funds and funds for NDAG chair use are in the “CSSG (Headquarters)” cell.

2.1 NCSP FY2023 “Make-It-Happen” List

The task milestones for FY2023 are listed in the task tables by site throughout this 5-year plan document. The NCSP Manager, working with the site task managers, has identified 18 milestones that are **high priority** for the program. These are listed in Table 2.2, below, in no particular order. These tasks are slated to be completed by the end of FY2023 and progress will be tracked quarterly during the regular quarterly reporting process.

Table 2.2 NCSP “Make-It-Happen” List for FY2023

No.	Milestone	Technical Program Element	Lead Site
1	Completion of TEX/Hf experimental campaign (IER 532)	IE	LLNL/LANL
2	Complete Godiva Benchmark measurements (IER 555)	IE	LANL
3	Resume 5-year AWE/LLNL fissile measurement campaign	IE	AWE/LLNL
4	Design and procurement of shielding benchmark (IER 498)	IE	LANL/ORNL
5	Complete TEX/MOX final design report	IE	IRSN/LANL/LLNL
6	Submit benchmark evaluation of experiments with UO2 Rods and molybdenum foils for international publication (IER 305)	IE	SNL/IRSN
7	Submit benchmark evaluation of the MUSIC critical experiments (IER 488)	IE	LANL
8	Submit benchmark evaluation of experiments for the Flattop benchmark series (IER 423)	IE	LANL
9	Submit benchmark evaluation of the TEX/TSL critical experiment for international publication	IE	LLNL
10	Publish preliminary results for measurement of the fission neutron spectrum shape using threshold activation detectors (IER 153)	IE	LANL

No.	Milestone	Technical Program Element	Lead Site
11	Complete fabrication of remaining lithium wafers for critical experiment (IER 575)	IE	Y12
12	Initiate execution of the copper critical experiment campaign (IER 537)	IE	LANL
13	Publish TEX low temperature DU surrogate testing results (IER 547)	IE	LLNL
14	Complete measurements for Godiva Characterization (IER 574)	IE	LANL/SNL
15	Complete prompt fission neutron spectrum (PFNS) measurement of Plutonium-240 at LANSCE (LANL-ND2a)	ND	LANL
16	Validation of design with initial RF window testing for accelerator section #1 at RPI (RPI-ND3)	ND	RPI/NNL
17	Beta release of US national ENDF/B-VIII.1 nuclear data library	ND	BNL
18	Complete Zr-92 nuclear data measurements at GELINA	ND	ORNL

2.2 Analytical Methods Technical Program Element

2.2.1 Description

The Analytical Methods (AM) technical program element provides development and maintenance of state-of-the-art analytical capabilities for the processing of nuclear data from the ENDF, and the radiation transport analysis needed to support NCS evaluations for subcriticality and shielding. An essential aspect of the AM capabilities is the human expertise required to develop the analytical software, provide software configuration control, and train and assist the user community. Figures for each site provide information about the total budget for the approved tasks for each FY. Following this information, a table is provided with the following: task name, task title, description, budget, collaborators, and FY23 milestones. The list of collaborators may include IRSN, AWE, or another NCSP site. These international collaborators have provided a list of tasks of interest to each organization and are provided in Appendix E (IRSN) and Appendix F (AWE).

2.2.2 Approved Tasks

For each site, the following sections provide a task description, scope, budget, and milestones for each AM task approved by the NCSP manager.

Figure 2.2-1 NCSP AM Budget (FY2023-FY2027)

Table 2.3 NCSP AM Budget by Site (FY23)

NCSP Site	Budget (\$k)
BNL	\$70
LANL	\$1,500
LLNL	\$194
ORNL	\$2,300
PNNL	\$40
Y12	\$20
Grand Total	\$4,124

Figure 2.2-2 NCSP AM Budget by Site (FY2023)

2.2.2.1 Brookhaven National Laboratory (BNL)

Task Name	BNL AM4
Collaborators	LLNL (LLNL-AM4)
Task Title	Thermal Scattering and Self-Shielding in GNDS/FUDGE
Proposal Submitted	FY17 (5-yr task)
Task Budget (FY23)	\$70K
Task Description	The FY23 focus for this task will be resonance self-shielding, including probability tables or multi-band techniques for both Monte Carlo and deterministic transport. Parameters and data for energy and spatial self-shielding will be incorporated into GND and FUDGE. Additional focus will be on testing Doppler broadening of thermal scattering laws.
FY23 Milestones	<p>All 4 Quarters</p> <ul style="list-style-type: none"> ○ Provide a status report on generating a draft document defining the TNSL code or software interface in NCSP Quarterly Progress Report.

Figure 2.2-3 BNL AM Budget Trend (FY2023-FY2027)

EOC – for out-year peaks and dips in budget plots:

Funding is essentially fixed each year for BNL-AM4, “Thermal Scattering and Self-Shielding in GNDS/FUDGE” for FY23-FY25. The task is due to be completed by FY25.

2.2.2.2 *Los Alamos National Laboratory (LANL)*

Task Name	LANL AM1
Collaborators	IRSN (IRSN-AM8)
Task Title	MCNP® Maintenance and Support, Uncertainty Analysis Development, and Modernization
Proposal Submitted	Ongoing
Task Budget (FY23)	\$1160K
Task Description	This is a continuing task for the maintenance of the basic capabilities for performing Nuclear Criticality Safety calculations with the Monte Carlo N Particle (MCNP®) computer code, including general code maintenance, user support, improved nuclear data libraries, Verification and Validation (V&V), documentation, user training, and implementation of limited new capabilities; focus on modernizing MCNP for next-generation computing hardware; continue to develop MCNP-Whisper for continuous-energy sensitivity-uncertainty analysis, and contribute to the Organization for Economic Cooperation and Development/Nuclear Energy Agency (OECD/NEA) Working Party on Criticality Safety. For all tasks, LANL reports will be issued and posted on the MCNP website.
FY23 Milestones	<p>All 4 Quarters</p> <ul style="list-style-type: none"> ○ Provide a status report on MCNP6 user support in NCSP Quarterly Progress Reports. ○ Provide status reports on LANL participation in US and International analytical methods collaborations in NCSP Quarterly Progress Reports. ○ Provide status reports on ENDF/B-VIII.1 processing and testing. <p>Quarter 1</p> <ul style="list-style-type: none"> ○ Provide reports on summer intern work accomplished ○ Provide MCNP6 Criticality training course. <p>Quarter 2</p> <ul style="list-style-type: none"> ○ Provide status of all MCNP6 and Whisper progress at the NCSP Technical Program Review <p>Quarter 3</p> <ul style="list-style-type: none"> ○ Provide MCNP6 Criticality training course ○ Merge additional benchmark input files into the Los Alamos Benchmark Suite (LABS) targeting new additions to ICSBEP and remaining input files from Whisper-1.1 library ○ Develop and test MCNP_PSTUDY revision <p>Quarter 4</p> <ul style="list-style-type: none"> ○ Process and test ENDF/B-VIII.1 candidate evaluations and provide a documented assessment ○ Contingent upon successful processing, integrate and test ENDF/B-VIII.0-based covariance data library for Whisper-1.2 ○ Obtain approval to open-source the Los Alamos Benchmark Suite (LABS) ○ Issue an MCNP V&V report, expanded to include LABS releases

Task Name	LANL AM2
Collaborators	None

Task Title	NJOY Development and Maintenance, Uncertainty Analysis Development, and Modernization
Proposal Submitted	Ongoing task
Task Budget (FY23)	\$300K
Task Description	This is a continuing task to support development and maintenance of the NJOY nuclear data processing code system, implement capabilities as needed to process new general purpose nuclear data files in the continuously evolving ENDF-6 format, provide support to NJOY users, modernize NJOY to adapt to modern code practices, new data formats, and next-generation computing hardware, and contribute to the NDAG, the Cross Section Evaluation Working Group (CSEWG), the Working Party on International Nuclear Data Evaluation Corporation (WPEC) and the International Atomic Energy Agency (IAEA) Coordinated Research Projects (CRP) as approved by the NCSP Manager. All NJOY updates will be distributed to users through a LANL maintained website.
FY23 Milestones	<p>All 4 Quarters</p> <ul style="list-style-type: none"> ○ Provide a status report on NJOY maintenance and user support in NCSP Quarterly Progress Reports. ○ Provide status reports on LANL participation in US and International analytical methods collaborations in NCSP Quarterly Progress Reports. ○ Provide status report on ACEtk photonuclear and photoatomic ACE support table <p>Quarter 1 - None</p> <p>Quarter 2</p> <ul style="list-style-type: none"> ○ Complete the ACEtk photonuclear and photoatomic ACE support tables, both specifications and interface <p>Quarter 3 - None</p> <p>Quarter 4</p> <ul style="list-style-type: none"> ○ Demonstrate initial capabilities of “scion” processing component, which will perform tasks including integration, linearization, and interpretation of distribution data.

Task Name	LANL AM3
Collaborators	Rensselaer Polytechnic Institute
Task Title	Development of an Adaptive-in-temperature Method for fast on-the-fly Sampling of Thermal Neutron Scattering Data in MCNP6
Proposal Submitted	FY17
Task Budget (FY23)	\$0K (use of FY22 carryover)
Task Description	LANL will enhance the physics treatment in MCNP6 so that it can perform fast on-the-fly sampling of S(alpha, beta) data at arbitrary temperature. RPI will develop thermal data libraries for selected materials to support on-the-fly S(alpha, beta) sampling for temperature ranges applicable to NCS and will test the data with MCNP6.
FY23 Milestones	<p>All 4 Quarters</p> <ul style="list-style-type: none"> ○ Provide status and update of work in NCSP Quarterly Progress Reports. <p>Quarter 1 – None</p> <p>Quarter 2 - None</p>

	<p>Quarter 3 – None</p> <p>Quarter 4</p> <ul style="list-style-type: none"> ○ Provide data files and report for h-h2o and graphite on-the-fly S(alpha,beta) temperature effects.
--	---

Task Name	LANL AM5
Collaborators	IRSN (IRSN-AM13), ORNL (ORNL-AM10), LLNL (LLNL-AM5), Y12-AM1
Task Title	Proposed Benchmark Intercomparison Study
Proposal Submitted	FY22 (Budget Execution Meeting)
Task Budget (FY23)	\$40K
Task Description	<p>From 2018 to 2022, IRSN led a k-eff intercomparison exercise based on a common set of benchmarks used on different codes' validation databases. The codes involved in the intercomparison exercise are COG (LLNL), MCNP (LANL), SCALE (ORNL) and MORET (IRSN). The intercomparison exercise included 272 datasets from different validation databases. Results of this study led to some improvements to the validation databases and to identify/confirm nuclear data issues as far as processing, data evaluation, etc. A summary report is under progress. Given the benefit to all the activity participants, the study has been extended until FY2024. Further studies include new benchmarks, new k-eff comparisons, shielding benchmarks and beta-effective measurements. A second report is planned at the end of the extension phase.</p>
FY23 Milestones	<p>All 4 Quarters</p> <ul style="list-style-type: none"> ○ Provide status reports on LANL participation in US and International analytical methods collaborations <p>Quarter 1 – None</p> <p>Quarter 2 - None</p> <p>Quarter 3 – None</p> <p>Quarter 4</p> <ul style="list-style-type: none"> ○ Issue final report on all LANL results related to the ICSBEP Benchmark Comparison Study

Figure 2.2-4 LANL AM Budget Trend (FY2023-FY2027)

EOC – for out-year peaks and dips in budget plots:

The LANL AM budget is relative flat over the 5-year period. The slight increases from FY23-FY24 are due to inflation and the reduction after FY24 is due to the completion of LANL AM5.

2.2.2.3 Lawrence Livermore National Laboratory (LLNL)

Task Name	LLNL AM2
Collaborators	
Task Title	Multi-Physics Methods for Simulation of Criticality Excursions
Proposal Submitted	FY14
Task Budget (FY23)	\$0K (to be completed with FY22 carryover)
Task Description	This is an ongoing approved task to support and build upon existing LLNL state-of-the-art 3-D analytical and multi-physics methods. The funding from this task will be used to simulate the IER 268 dynamic Godiva IV excursions including surface motion and neutron and photon leakage. The simulations will feed into the IER 268 experimental report. This task is to support IER 268 (PDV), which is discussed in the IE section of the 5-year plan for FY2021.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide status on LLNL AM2 activities in NCSP Quarterly Progress Reports. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Task Name	LLNL AM3
Collaborators	IRSN (IRSN-AM5), (AWE-AM1), ORNL (ORNL-AM6)
Task Title	Slide Rule Application
Proposal Submitted	FY15
Task Budget (FY23)	\$50K
Task Description	This is an ongoing task to support work to generate and update a criticality slide rule, including for plutonium systems. IRSN is the lead on this task.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide status on LLNL AM3 activities in NCSP Quarterly Progress Reports. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Task Name	LLNL AM4
Collaborators	BNL (BNL AM4)
Task Title	Thermal Scattering and Self-Shielding in GNDS/FUDGE
Proposal Submitted	FY2017 (5-yr task)
Task Budget (FY23)	\$94K
Task Description	The FY23 focus for this task will be resonance self-shielding, including probability tables or multi-band techniques for both Monte Carlo and deterministic transport. Parameters and data for energy and spatial self-shielding will be incorporated into GND and FUDGE. Additional focus will be on testing Doppler broadening of thermal scattering laws.

FY23 Milestones	<p>All 4 Quarters</p> <ul style="list-style-type: none"> ○ Provide a status report on generating a draft document defining the TNSL code or software interface in NCSP Quarterly Progress Reports. <p>Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None</p>
-----------------	--

Task Name	LLNL-AM5
Collaborators	IRSN (IRSN-AM13), ORNL (ORNL-AM10), LANL (LANL-AM5), Y12 (Y12-AM1)
Task Title	Proposed Benchmark Intercomparison Study
Proposal Submitted	FY22 (Budget Execution Meeting)
Task Budget (FY23)	\$50K
Task Description	<p>From 2018 to 2022, IRSN led a k-eff intercomparison exercise based on a common set of benchmarks used on different codes' validation databases. The codes involved in the intercomparison exercise are COG (LLNL), MCNP (LANL), SCALE (ORNL) and MORET (IRSN). The intercomparison exercise included 272 datasets from different validation databases. Results of this study led to some improvements to the validation databases and to identify/confirm nuclear data issues as far as processing, data evaluation, etc. A summary report is under progress. Given the benefit to all the activity participants, the study has been extended until FY2024. Further studies include new benchmarks, new k-eff comparisons, shielding benchmarks and beta-effective measurements. A second report is planned at the end of the extension phase.</p>
FY23 Milestones	<p>All 4 Quarters</p> <ul style="list-style-type: none"> ○ Provide status on LLNL AM5 activities in NCSP Quarterly Progress Reports <p>Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None</p>

Figure 2.2-5 LLNL AM Budget Trend (FY2023-FY2027)

EOC – for out-year peaks and dips in budget plots:

The LLNL AM budgets gradually decrease due to the completion of LLNL-AM2, LLNL-AM3, LLNL-AM4 and LLNL-AM5 tasks through FY26.

2.2.2.4 Oak Ridge National Laboratory (ORNL)

Task Name	ORNL-AM1
Collaborators	None
Task Title	Radiation Safety Information Computational Center (RSICC)
Proposal Submitted	Ongoing
Task Budget (FY23)	\$600K
Task Description	RSICC ongoing approved task to collect, update, package, and distribute software and associated nuclear data libraries (i.e., SCALE, MCNP, VIM, and COG and nuclear data processing (i.e., NJOY, AMPX and SAMMY) to the NCS community. The NCS community includes DOE and NNSA M&O NCS staff, e.g., LANL, LLNL, SNL, SRNS, etc., DOE-EM M&O NCS staff, e.g., PGDP, PORTS, SRNL, etc. This does not include NRC-regulated NCS staff, M&O subcontractors, and independent consultants. University students in Nuclear Engineering programs performing NCS analysis is also included. Also, test and disseminate processed nuclear data associated with the software.
FY23 Milestones	<p>All 4 Quarters</p> <ul style="list-style-type: none"> ○ Continue distribution of available and newly packaged software to the NCS community requesters (at no direct cost to them) and provide distribution totals quarterly. ○ Provide status on RSICC activities in NCSP Quarterly Progress Reports. <p>Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None</p>

Task Name	ORNL-AM2
Collaborators	IRSN (IRSN-AM8)
Task Title	SCALE/KENO/TSUNAMI Maintenance and Support/Cross-Section and Generation/Modernization
Proposal Submitted	Ongoing
Task Budget (FY23)	\$1160K
Task Description	Ongoing, approved task to provide SCALE/KENO/TSUNAMI maintenance and user support for performing Nuclear Criticality Safety (NCS) calculations with the SCALE package. Work tasks include sustaining and continually improving SCALE NCS features through user-driven enhancements, software quality assurance (SQA) and V&V; assuring adaptability to various computing platforms and compilers; providing improved user interfaces and user documentation consistent with modern engineering software; supporting responsive communication to SCALE criticality safety users through SCALE Newsletters, email notices, and updates on the SCALE website, and training. The task also includes support for modernizing the software infrastructure and capabilities to improve quality and reliability and to ensure long-term sustainability of the NCS capabilities.
FY23 Milestones	<p>All 4 Quarters</p> <ul style="list-style-type: none"> ○ Provide status reports on ORNL participation in US and International Analytical Methods collaborations and provide brief trip summary report to NCSP Manager on items of NCSP interest. ○ Provide a status report on TSUNAMI upgrades that may include <ul style="list-style-type: none"> ○ Update documentation (primer update, user guidance for CLUTCH [F* studies])

	<ul style="list-style-type: none"> ○ Code improvements that in the following areas: Automated DP calculations, CLUTCH implementation and documentation, Uncertainty impacts on integral parameters, Direct Perturbation calculations for specific reactions, Uncertainty and C_K contribution of isotope (TSUNAMI-IP), Uncertainty contribution by energy group (TSUNAMI-IP), Template for VADER input generation (TSUNAMI-IP), progress with MG (in parallel), MG CLUTCH, ability to read an external $F^*[r]$, runtime improvements (parallel computation), ○ Provide a status report on VADER to include <ul style="list-style-type: none"> ○ Bug fixes ○ Correlation coefficient integration ○ Generation of an improved manual containing methodology descriptions and consistent with deployed capabilities ○ Status report on Sampler improvements <ul style="list-style-type: none"> ▪ Investigate the feasibility of integrating automated manufacturing tolerance assessment ▪ Completion of root finding (To replace CSAS5S) ○ Status report on MAVRIC improvements <ul style="list-style-type: none"> ▪ MAVRIC-SHIFT CAS support ○ SCALEHELP ○ SCALE 7.0 Support that could include: <ul style="list-style-type: none"> ▪ Enhanced source convergence metrics and testing ▪ Improved uncertainty treatment in Shift-based sequences ▪ Continued improvements to the CSAS manual, especially related to Shift integration, Shift error messages, and new geometry implementation ▪ Porting improvements to SCALE 6.3.x as appropriate within Export Control limitations ○ SCALE training as approved by ORNL task manager ○ Publish quarterly newsletter to users to communicate software updates, user notices, generic technical advice, and training course announcements. <p>Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 - None</p>
--	--

Task Name	ORNL-AM3
Collaborators	IRSN (IRSN-AM9)
Task Title	AMPX Maintenance and Modernization
Proposal Submitted	Ongoing
Task Budget (FY23)	\$300K
Task Description	Ongoing, approved task to develop and maintain the AMPX nuclear data processing code system to provide cross-section and covariance data libraries for NCS radiation transport software such as SCALE. In addition, the task includes additional effort to implement new software enhancements needed to improve the quality and reliability of the nuclear data libraries that are produced by AMPX. The overall development and maintenance work effort will ensure the AMPX software is up-to-date and in conformance with ENDF/B formats and procedures. Moreover,

	the development and enhancements to the AMPX software will enable improved nuclear data processing capabilities needed to provide reliable nuclear data libraries to support radiation transport methods development and analyses.
FY23 Milestones	All 4 Quarters Provide status on ORNL AM3 activities in NCSP Quarterly Progress Reports. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 - None

Task Name	ORNL-AM6
Collaborators	IRSN (IRSN-AM5), AWE (AWE-AM1), LLNL (LLNL-AM3)
Task Title	Slide Rule Application
Proposal Submitted	FY15
Task Budget (FY23)	\$50K
Task Description	This is a continuing task with IRSN, ORNL, and LLNL to modernize the existing SlideRule accident response tool. ORNL developed the initial SlideRule, and under this task, IRSN will update the SlideRule using modern radiation transport tools (e.g., SCALE, MCNP, COG, etc.) and expand the SlideRule capabilities. IRSN, ORNL, and LLNL on the SlideRule modernization effort and perform review tasks as needed to assess the performance of the updated SlideRule capability.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide status on ORNL AM6 activities in NCSP Quarterly Progress Reports. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

The Y12 budget for FY23 is to support the Y12-AM1 task in collaboration with IRSN (IRSN-AM13), LLNL (LLNL-AM5), LANL (LANL-AM5), and ORNL (ORNL-AM10)

2.3 Information Preservation and Dissemination (IPD)

2.3.1 Program Element Description

The IPD program element preserves primary documentation supporting criticality safety and makes this information available for the benefit of the technical community. The NCSP website (<http://ncsp.llnl.gov>) is the central focal point for access to criticality safety information collected under the NCSP, and the gateway to a comprehensive set of hyperlinks to other sites containing criticality safety information resources.

Figure 2.3-1 IPD Budget (FY2023-FY2027)

Table 2.4 NCSP IPD Budget by Site (FY23)

NCSP Site	Budget (\$k)
LANL	\$100
LLNL	\$750
ORNL	\$40
PNNL	\$50
SRS	\$0
Grand Total	\$940

Figure 2.3-2 IPD Budget by Site (FY2023)

2.3.2 Approved Tasks

2.3.2.1 Los Alamos National Laboratory (LANL)

Task Name	LANL IPD3
Collaborators	LLNL IPD5
Task Title	IT Support at NNSS
Proposal Submitted	Ongoing
Task Budget (FY23)	\$100K
Task Description	There is one LLNL and two LANLIT staff (cyber security support and information technology support) that support JLON (laboratory) activities in NV, with NCSP covering the equivalent of 1 FTE between them. These staff provide classified (cyber security/system compliance and system administration) and unclassified system support. LANL and LLNL support is required for this task. See LLNL IPD5.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide status report on progress for LANL IPD3 activities in the NCSP Quarterly Progress Reports. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Figure 2.3-3 LANL IPD Budget Trend (FY2023-FY2027)

EOC – for out-year peaks and dips in budget plots:

LANL IPD funding from FY23 to FY27 is fixed due to a single task/resource.

2.3.2.2 Lawrence Livermore National Laboratory (LLNL)

Task Name	LLNL IPD1
Collaborators	IRSN (IRSN-IPD1), AWE (AWE-IPD1)
Task Title	Conduct ICSBEP for Benchmarks of the 5-Year Plan and publish annual revision to the Handbook
Proposal Submitted	Ongoing
Task Budget (FY23)	\$300K
Task Description	This is an ongoing approved task that provides independent and Technical Review Group (TRG) reviews for newly completed integral experiments for publication as NCSP contributions to the International Criticality Safety Benchmark Evaluation Project (ICSBEP). Priority historical experiments may also be evaluated and reviewed (internal, independent, and TRG) as resources allow. All NCSP funded experiments will be finalized and published on the NCSP website within two quarters of receipt of an Experiment Design Team reviewed and approved draft report (CED-4a). LLNL IPD1 will also provide leadership, coordination, and publication support for the OECD/NEA ICSBEP.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Manage all aspects of the DOE NCSP participation in the ICSBEP as required to ensure the finalizing and publishing ICSBEP evaluations per IE schedule. ○ Provide status reports on LLNL participation in US and International IPD collaborations (including ICSBEP) in the NCSP Quarterly Progress Reports. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Task Name	LLNL IPD2
Collaborators	None
Task Title	Maintain the NCSP Website and Systems
Proposal Submitted	Ongoing
Task Budget (FY23)	\$250K
Task Description	This is an ongoing approved task for operation, maintenance, and modernization of the NCSP website. The NCSP website is the central focal point for access to criticality safety information collected under the NCSP and is the gateway to a comprehensive set of hyperlinks to other sites containing criticality safety information resources.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Maintain, operate, and modernize the NCSP website, databases, and provide user assistance as required. Quarter 1 – None

	Quarter 2 – None Quarter 3 – None Quarter 4 – None
--	--

Task Name	LLNL IPD5
Collaborators	LANL IPD3
Task Title	IT Support at NNSS
Proposal Submitted	Ongoing
Task Budget (FY23)	\$150K
Task Description	There is one LLNL and two LANL IT staff (cyber security support and information technology support) that support JLON (laboratory) activities in NV, with NCSP covering the equivalent of 1 FTE between them. These staff provide classified (cyber security/system compliance and system administration) and unclassified system support.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide status report on progress for LLNL IPD5 activities in the NCSP Quarterly Progress Reports. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Task Name	LLNL IPD6
Collaborators	None
Task Title	Benchmark Evaluation of LLNL ‘Pulsed Spheres’
Proposal Submitted	FY20
Task Budget (FY23)	\$50K
Task Description	This task for LLNL will involve formally evaluating the LLNL ‘Pulse Sphere’ experimental campaign for inclusion into the ICSBEP Handbook and/or SINBAD compendium. Dr. Luisa Hansen, the Principal Investigator (PI), is still available and willing to assist in this effort as the internal reviewer. LLNL is thus uniquely qualified to perform this task as we have access to the PI, data, drawings, interim reports, etc., and have state-of-the-art ‘open’ and ‘closed’ analytical methods capable of performing simulations from first principles starting with the charged particle deuteron beam. This is particularly important because the beam is not fully stopped in the tritiated target, and so must be more realistically Nuclear Criticality Safety Program Proposal Template for FY2020 – FY2024 simulated, which it appears has not been done prior to 2012 due to limitations in popular codes. Lastly, it should be noted that these experiments are unique and important in that they are especially sensitive to elastic and inelastic scattering whereas critical assembly experiments of all types are dominated by fission and capture.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide status report on progress for LLNL IPD6 activities in the NCSP Quarterly Progress Reports. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Figure 2.3-4 LLNL IPD Budget Trend (FY2023-FY2027)

EOC – for out-year peaks and dips in budget plots:

The reduction in LLNL IPD funding from FY23 to FY24 is due to the potential elimination of the LLNL IPD5 task in the outyears. The increase in FY26 is due to an increase the LLNL-IPD1 task for ICSBEP support.

2.3.2.3 Oak Ridge National Laboratory (ORNL)

Task Name	ORNL IPD3
Collaborators	OSTI.gov
Task Title	Nuclear Criticality Safety Repository
Proposal Submitted	FY22, ongoing
Task Budget (FY23)	\$40K
Task Description	Create a front-end and document repository at OSTI.gov to archive all NCSP and, possibly, documents related to Nuclear Criticality Safety in the community for easy access. ORNL will work with OSTI.gov on the development of the front-end and metadata needed to ensure NCS document searches are accurate and efficient. In the long-term, ORNL will work with LLNL to begin to archive legacy NCS reports and other documents that may be important to the NCS community.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide a status report about progress on the development of the NCSP repository at OSTI.gov in the NCSP Quarterly Progress Reports. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Task Name	ORNL IPD4
Collaborators	PNNL (PNNL IPD1), IRSN (IRSN-IPD2)
Task Title	Nuclear Criticality Safety - Learning From Experience (LFE) Database
Proposal Submitted	FY22-25
Task Budget (FY23)	\$0K (FY22 carryover)
Task Description	The Nuclear Criticality Safety Program (NCSP) is a multi-lab collaboration dating back to the mid-1990's and a repository of NCSP documents has been hosted by LLNL for some time (website at https://ncsp.llnl.gov/). LLNL intends to continue hosting the website content to support NCSP execution; however, the NCSP website is not intended to serve as a document repository long-term. The LLNL website is subject to stringent security requirements and the use of the website as a document repository is not an efficient use of resources. A significant number of NCSP reports and deliverables end up at the DOE Office of Scientific and Technical Information (OSTI). OSTI is a specialized repository for this document collection. All documents in the collection are meant to be unlimited in distribution and publicly releasable; however, not all NCSP documentation have been sent to OSTI and still reside at the NCSP sites.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide a status report about progress on the development of the NCSP LFE database working with PNNL and international collaborators. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Task Name	ORNL IPD5
Collaborators	N/A
Task Title	Oak Ridge Health Physics Research Reactor CAAS Benchmark Evaluation
Proposal Submitted	FY19

Task Budget (FY23)	\$0K (use FY21 carryover funding)
Task Description	Complete the final stages of the ICSBEP shielding benchmark process and defend in the ICSBEP TRG meeting in FY23.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide a status report about progress on the HPRR benchmark. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Figure 2.3-5 ORNL IPD Budget Trend (FY2023-FY2027)

EOC – for out-year peaks and dips in budget plots:

The ORNL IPD budget is due entirely to two tasks ORNL-IPD3 and ORNL-IPD4 tasks. Task ORNO IPD4 will be supported via FY22 carryover from other tasks. The ORNL-IPD3 task is due to the creation of an NCSP document repository at OSTI and costs for support will be needed in the outyears.

2.3.2.4 Pacific National Northwest Laboratory (PNNL)

Task Name	PNNL IPD1
Collaborators	ORNL (ORNL IPD4)
Task Title	Nuclear Criticality Safety - Learning From Experience (LFE) Database
Proposal Submitted	FY22-25
Task Budget (FY23)	\$50K
Task Description	The Nuclear Criticality Safety Program (NCSP) is a multi-lab collaboration dating back to the mid-1990's and a repository of NCSP documents has been hosted by LLNL for some time (website at https://ncsp.llnl.gov/). LLNL intends to continue hosting the website content to support NCSP execution; however, the NCSP website is not intended to serve as a document repository long-term. The LLNL website is subject to stringent security requirements and the use of the website as a document repository is not an efficient use of resources. A significant number of NCSP reports and deliverables end up at the DOE Office of Scientific and Technical Information (OSTI). OSTI is a specialized repository for this document collection. All documents in the collection are meant to be unlimited in distribution and publicly releasable; however, not all NCSP documentation have been sent to OSTI and still reside at the NCSP sites.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide a status report about progress on the development of the NCSP LFE database working with PNNL and international collaborators. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Figure 2.3-6 PNNL IPD Budget Trend (FY2023-FY2027)

EOC – for out-year peaks and dips in budget plots:

There is a single PNNL task for IPD (IPD1) for the “Learn from Experience Database”. Funding tapers off in the outyears after the database is completed and the system enters a maintenance phase where only event data is entered as needed.

2.3.2.5 Savannah River Site (SRS)

Task Name	SRS IPD1
Collaborators	None
Task Title	ARH-600 Reissue (CritView)
Proposal Submitted	FY18, ongoing
Task Budget (FY23)	\$0K (FY22 carryover)
Task Description	<p>The following three tasks are identified for ongoing CritView development. Each could likely be performed by a summer intern, or other new CS engineer, with sufficient skills/knowledge. Each would be broken into stages as appropriate, and would proceed over the upcoming FYs, as annual funding and resources allow. A more detailed plan including appropriate FY milestones, and accounting for the upcoming FY funding including potential carryover, would be provided to NCSP Management for confirmation/approval prior to commencing on any specific task and/or stage, as appropriate. The timing of the detailed plan is TBD.</p> <ol style="list-style-type: none"> 1. Update current MCNP calculations using a recent version of MCNP and cross sections. Document results, and update/distribute CritView database. 2. Digitize LA-10860 curves (like what was completed for ARH-600). Document results and incorporate into CritView database for distribution. 3. Develop SCALE calculations, like MCNP, using a recent version of SCALE and cross sections. Document results and incorporate into CritView database for distribution. <p>In addition, as necessary, support the code users. It is expected that each of the tasks could encompass one FY, or more, depending on resources available to perform the work.</p>
FY23 Milestones	<p>All 4 Quarters</p> <ul style="list-style-type: none"> ○ Provide status reports on SRS progress with CritView in the NCSP Quarterly Progress Reports. <p>Quarter 1</p> <ul style="list-style-type: none"> ○ NCSP Approved Scope. <p>Quarter 2</p> <ul style="list-style-type: none"> ○ TBD based on Approved Scope. <p>Quarter 3</p> <ul style="list-style-type: none"> ○ TBD based on Approved Scope. <p>Quarter 4</p> <ul style="list-style-type: none"> ○ Provide updated CritView database for user testing.

Figure 2.3-7 SRS IPD Budget Trend (FY2023-FY2027)

EOC – for out-year peaks and dips in budget plots:

There is a single IPD task for SRS (SRS-IPD1). The budget is lower in FY23 due to FY22 carryover. FY23-FY27 costs will return to typical funding levels for this task once the carryover is spent in FY22.

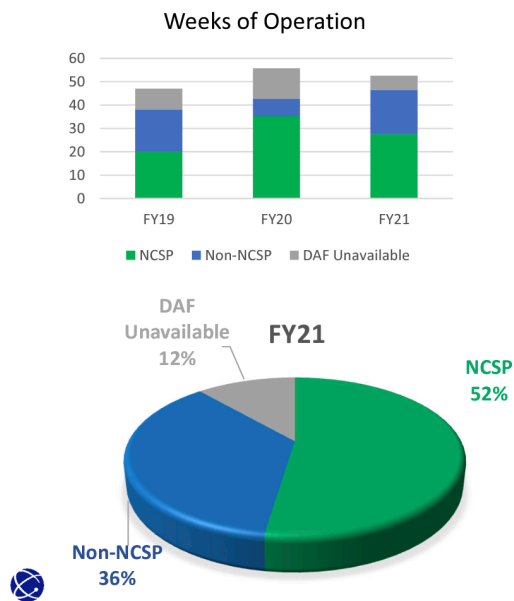

2.4 Integral Experiments (IE)

2.4.1 Program Element Description

The IE program element maintains a fundamental capability for the DOE NCSP to be able to perform critical, subcritical, and fundamental physics measurements, within the limits of its resources, to address criticality physics needs, emerging data improvement needs by DOE programs, and specific site needs on a prioritized basis. This program element supports the cost of the LANL NCERC permanent party staff and supports maintaining a fundamental nuclear material handling capability, which enables hands-on NCS training programs and various other programs for the DOE NCSP and other government agencies. Figure 2.4-1 shows NCERC availability in FY2019 – FY2021.

All Integral Experiment tasks and milestones are published as a standalone document. Contact the NCSP Program Manager, Dr. Angela Chambers, if you have a 'Need-to-Know.'

2.5 Nuclear Data (ND)

2.5.1 Program Element Description

The ND program element includes the measurement, evaluation, testing, and publication of neutron cross-section data for nuclides of high importance to NCS analyses. The NCSP continues to improve coordination of ND activities by fostering a strong collaborative effort among all the national and international resources in this highly technical area. The objective is to solve the highest priority ND problems relevant to criticality safety in a timely manner. This program element is essential for the NCSP because it provides the nuclear cross-section data required by the AM program element. Refer to Appendix B for the schedule, milestones, and deliverables associated with specific nuclear data measurement, evaluation, and publication. Milestones not contained in Appendix B are delineated below.

Figure 2.5-1 ND Budget (FY2023-FY2027)

2.5.2 Approved Tasks

2.5.2.1 Brookhaven National Laboratory (BNL)

Task Name	BNL ND1
Collaborators	None
Task Title	National Nuclear Data Center (NNDC) Support to the NCSP
Proposal Submitted	Ongoing
Task Budget (FY23)	\$290K
Task Description	This is an ongoing approved task to provide technical support to the NCSP to ensure that NCSP cross-section evaluations are checked, processed, visualized, reviewed, archived, and made available through the National Nuclear Data Center (NNDC) Gitlab system as candidate evaluations for the future versions of the ENDF/B library. Maintain Atlas of Neutron Resonances as a unique resource of thermal and resonance data and their uncertainties.
FY23 Milestones	<p>All 4 Quarters</p> <ul style="list-style-type: none"> ○ Maintain and upgrade ADVANCE code system by performing data verification of new NCSP evaluations and performing quality assurance on the data as required. Provide status reports on all ND1 activities in the NCSP Quarterly Progress Reports. ○ If mandated by CSEWG, release new ENDF library. <p>Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None</p>

Figure 2.5-3 BNL ND Budget Trend (FY2023-FY2027)

EOC – for out-year peaks and dips in budget plots:

The BNL ND budgets are stable from FY23-FY27 for their single ND task (ND1).

2.5.2.2 Los Alamos National Laboratory (LANL)

Task Name	LANL ND1
Collaborators	
Task Title	Nuclear Data Evaluation and Testing
Proposal Submitted	Ongoing
Task Budget (FY23)	\$761K
Task Description	This is an ongoing approved task to provide differential data evaluation and covariance development in the energy region above the resonance range for heavy elements (often in partnership with resonance-range work from ORNL), and over the entire ENDF energy range for light elements. Particular focus will be on neutron fission. Perform data testing analysis with new evaluated sets. Contribute to NDAG, CSEWG, INDEN, WPEC, and IAEA CRP. The LANL nuclear data measurements and evaluations are performed in accordance with the milestone schedule in Appendix B.
FY23 Milestones	<p>All 4 Quarters</p> <ul style="list-style-type: none"> ○ Provide status reports on LANL participation in US and International Nuclear Data collaborations in the NCSP Quarterly Progress Reports <p>Quarter 1</p> <ul style="list-style-type: none"> ○ Conduct CSEWG Evaluation and Covariance sessions. ○ Report data testing results with ENDF/B-VIII.0 and additional beta release cross sections at CSEWG. <p>Quarter 2 – None</p> <p>Quarter 3 – None</p> <p>Quarter 4</p> <ul style="list-style-type: none"> ○ Deliver nuclear data evaluations as indicated in Appendix B of this document.

Task Name	LANL ND2
Collaborators	IRSN-ND1
Task Title	Nuclear Data Measurements at LANSCE
Proposal Submitted	Ongoing
Task Budget (FY23)	\$789K
Task Description	Ongoing task to perform NCSP measurements as specified in the NCSP 5-year plan, Appendix B.
FY23 Milestones	<p>All 4 Quarters – Provide status reports on all ND2 activities in the NCSP Quarterly Progress Reports</p> <p>Quarter 1 – None</p> <p>Quarter 2 – None</p> <p>Quarter 3 – None</p> <p>Quarter 4 – None</p>

Task Name	LANL ND2a
Collaborators	
Task Title	Prompt Fission Neutron Spectra (PFNS) Measurement of Plutonium-240
Proposal Submitted	FY20
Task Budget (FY23)	\$0K (use FY22 carryover funding)

Task Description	Building upon recent improvements in measurements techniques for uranium-235, plutonium-239 and uranium-238 (ongoing), this work is to measure the prompt fission neutron spectra (PFNS) for plutonium-240. This work has low technical risk, building upon previously established measurement and evaluation techniques. This work will be done using the Chi-Nu detectors at WNR, part of the LANSCE/LANL facility, with analysis carried out by a postdoc (to be hired) supervised by senior staff. Please note the Chi-Nu detectors include a liquid scintillator array for the high-energy (HE) tail and a lithium glass array for the low-energy (LE) tail with measurements performed separately. The Pu-240 fission detector was fabricated and tested by LLNL and delivered to LANL during 2022.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide status report on ND2a activities in the NCSP Quarterly Progress Reports. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 <ul style="list-style-type: none"> ○ Obtain final experimental results for Pu-240 PFNS at LANSCE, finalize data analysis, and deliver data to evaluators

Task Name	LANL ND2b
Collaborators	None
Task Title	Unresolved and Fast Measurements of Uranium-233 (n,gamma)
Proposal Submitted	FY20
Task Budget (FY23)	\$0K (use FY22 carryover funding)
Task Description	Building upon recent improvements in measurements techniques for capture cross section (and alpha, the capture to fission ratio) that have been successfully applied for U-235 and Pu-239, this work is to measure the U-233 capture cross section. This is a low-risk measurement based upon now well-established techniques that have yielded 2% uncertainties on alpha in the keV region to 10% uncertainties around 1 MeV. These measurements will complement and extend previous uranium-233 total and capture measurements at lower energies. This work will be done using the DANCE detector at the Lujan center, part of the LANSCE/LANL facility, with analysis carried out by a postdoc supervised by senior staff.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide status report on ND2b activities in the NCSP Quarterly Progress Reports. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 <ul style="list-style-type: none"> ○ Finalize acquisition of U-233 thick target capture data, finalize data analysis, and deliver data to evaluators

Figure 2.5-4 LANL ND Budget Trend (FY2023-FY2027)

EOC – for out-year peaks and dips in budget plots:

LANL ND budget is relatively stable over the next five years. LANL tasks ND2a “PFNS Measurements of ^{240}Pu ,” ND2b “URR/Fast Measurements of ^{233}U ,” and ND2c “ ^{95}Mo Neutron capture/transmission measurements” should be completed in the next two years. LANL ND2 will replace these tasks with an ongoing task/budget tied to ND priorities discussed in Appendix B.

2.5.2.3 Lawrence Livermore National Laboratory (LLNL)

Task Name	LLNL ND9
Collaborators	
Task Title	Scoping Study: Li-6 Doped Liquid Scintillator Array for Fission Correlations
Proposal Submitted	FY19
Task Budget (FY23)	\$125K
Task Description	Assess the conceptual design of a modular system that could efficiently and simultaneously measure the Prompt Fast Neutron Spectrum (PFNS), the prompt fission neutron multiplicity, the prompt fission g-ray multiplicity and spectrum, as well as temporal and angular correlations between these quantities. Assess the conceptual design of a modular system that could efficiently and simultaneously measure the Prompt Fast Neutron Spectrum (PFNS), the prompt fission neutron multiplicity (ν), the prompt fission g-ray multiplicity and spectrum, as well as temporal and angular correlations between these quantities.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide status on ND9 activities in the NCSP Quarterly Progress Reports. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Task Name	LLNL ND12
Collaborators	North Carolina State University and Naval Nuclear Laboratory
Task Title	Thermal Scattering Law Evaluations and Methods Development
Proposal Submitted	LLNL ND2 (ongoing) LLNL ND10 (FY21)
Task Budget (FY23)	\$250K
Task Description	This task will cover performing the TSL evaluations as listed in NCSP's 5-year plan Appendix B TSL priority list. In addition to the TSL evaluations, the task includes developing and performing the atomistic simulations that are needed to support the evaluations. As part of the evaluation process, advanced methods will be developed to remedy any theoretical and/or numerical discrepancies that may be observed in the TSL and the related cross section data. Examples of such methods are those resulting in the relaxation of various assumptions (incoherent, cubic, diffusion models, etc.), which is expected to enhance the fidelity of the data relative to experimental observations.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide status on ND12 activities in the NCSP Quarterly Progress Reports. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Figure 2.5-5 LLNL ND Budget Trend (FY2023-FY2027)

EOC – for out-year peaks and dips in budget plots:

There are decreases in the LLNL ND budget due to projects because of completed tasks. The LLNL ND funding trends to zero in FY26 due to completed proposal funding LLNL ND9.

2.5.2.4 Oak Ridge National Laboratory (ORNL)

Task Name	ORNL ND1
Collaborators	IRSN (IRSN-ND1), JRC-Geel, RPI (RPI-ND1)
Task Title	Nuclear Data Measurements
Proposal Submitted	Ongoing
Task Budget (FY23)	\$600K
Task Description	Cross-section measurements and the production of new cross-section evaluations with covariance data in accordance with priorities specified in the 5-year plan, Appendix B.
FY23 Milestones	<p>All 4 Quarters</p> <ul style="list-style-type: none"> ○ Provide status reports on all ND1 activities in the NCSP Quarterly Progress Reports ○ Provide status reports on ORNL participation in US and International Nuclear Data collaborations, and for foreign travel, provide a brief trip summary report to NCSP Manager on items of NCSP interest ○ Complete cross-section measurement deliverables per the nuclear data schedule in Appendix B <p>Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None</p>

Task Name	ORNL ND2
Collaborators	IRSN (IRSN-ND1), JRC-Geel, RPI (RPI-ND1)
Task Title	Nuclear Data Evaluations and Testing
Proposal Submitted	Ongoing
Task Budget (FY23)	\$600K
Task Description	Cross-section evaluations and nuclear data testing of new cross-section evaluations with covariance data in accordance with priorities specified in the 5-year plan, Appendix B.
FY23 Milestones	<p>All 4 Quarters</p> <ul style="list-style-type: none"> ○ Provide status reports on all ND2 activities in the NCSP Quarterly Progress Reports ○ Provide status reports on ORNL participation in US and International Nuclear Data collaborations, and for foreign travel, provide a brief trip summary report to NCSP Manager on items of NCSP interest ○ Complete cross-section evaluation deliverables per the nuclear data schedule in Appendix B <p>Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None</p>

Task Name	ORNL ND3
Collaborators	JRC-Geel, Rensselaer Polytechnic Institute
Task Title	Isotopic Sample Leases to Support ND1 ND Measurements
Proposal Submitted	Ongoing
Task Budget (FY23)	\$41K

Task Description	This “task” is to separate out funding for natural and stable, isotopically enriched samples, for nuclear data measurements aligned with the priorities and schedule provided in Appendix B. The task also supports activation analysis to demonstrate the likely lease options to negotiate with DOE Office of Science- Nuclear Physics (DOE/SC-NP)
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide status reports on all ND3 activities in the NCSP Quarterly Progress Reports Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Task Name	ORNL ND4
Collaborators	Rensselaer Polytechnic Institute
Task Title	Thermal Neutron Total Cross Section Measurements for Improvement of Criticality Calculations and Propagation of Scattering Kernel Uncertainties
Proposal Submitted	Ongoing
Task Budget (FY23)	\$0K (use FY22 carryover funding)
Task Description	Continue task to develop and maintain new thermal neutron scattering measurement and analysis capabilities
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide status reports on all ND4 activities in the NCSP Quarterly Progress Reports Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 - None

Task Name	ORNL ND6
Collaborators	JRC-Geel, Rensselaer Polytechnic Institute
Task Title	SAMMY Nuclear Data Evaluation Code Modernization
Proposal Submitted	Ongoing
Task Budget (FY23)	\$400K
Task Description	This a continuing task to modernize the SAMMY software that is an essential tool needed by nuclear data evaluators to analyze measured cross-section data and produce nuclear data evaluations with covariance data for the NCSP. SAMMY is primarily used to analyze differential data from the RPI Gaertner linear accelerator, IRMM Geel Electron Linear Accelerator (GELINA), and Los Alamos Neutron Science Center (LANSCE) to produce nuclear data evaluations. An initial step toward modernization will be the merger of SAMMY under the SCALE continuous integration (CI) development framework. Once complete, SAMMY will be developed under the SCALE software quality assurance plan (SQAP) thereby providing increased confidence in the quality of the data evaluations developed and deployed by SAMMY. Once SAMMY is completely under SQA and integrated with the SCALE/AMPX CI development framework, the work will be performed to modernize SAMMY by utilizing modern computing frameworks and libraries that harness the emerging computing power of parallel architectures, and that enable a rapid development of new data analysis capabilities. The overall modernization work effort will ensure the SAMMY

	software is up-to-date and positioned for long-term sustainability to support NCSP nuclear data evaluation needs.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide status reports on all ND6 activities in the NCSP Quarterly Progress Reports Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 - None

Task Name	ORNL ND9
Collaborators	JRC-Geel, Rensselaer Polytechnic Institute
Task Title	Evaluation of Thermal and Resolved Resonance Ranges of UO ₂ and PUO ₂
Proposal Submitted	FY19
Task Budget (FY23)	\$250K
Task Description	Develop a new method for consistent evaluation of thermal neutron scattering libraries (TSL) and (resolved) resonance differential cross section data.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide status reports on all ND9 activities in the NCSP Quarterly Progress Reports Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Task Name	ORNL ND11
Collaborators	DOE-SC
Task Title	Thermal neutron scattering measurements and evaluations for DHS applications at temperature
Proposal Submitted	Request made by DOE-NE; NCSP Manager Approved in FY22
Task Budget (FY23)	\$125K
Task Description	Generate measurement data and develop ENDF-format thermal neutron scattering files of the following materials at temperatures of interest for DHS application (spanning -40°C to +40°C): <ul style="list-style-type: none"> ○ Portland Cement ○ Silicone Elastomer ○ Polyethylene ○ Light Water
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide status reports on all ND11 activities in the NCSP Quarterly Progress Reports Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Figure 2.5-6 ORNL ND Budget Trend (FY2023-FY2027)

EOC – for out-year peaks and dips in budget plots:

The ORNL ND budgets increase in the outyears to adjust for inflation and alignment to workload in Appendix B. ORNL-ND9 begins in FY23, which represents a significant fraction of the budget increase starting in FY23 compared to FY22.

2.5.2.5 *Rensselaer Polytechnic Institute (RPI)*

Per agreement between Naval Reactors (NA-30) and the Nuclear Criticality Safety Program, the>NNL acts as the Maintenance and Operations Contractor (MOC) for work conducted at the RPI linear accelerator facility.>NNL voluntarily administers NCSP contracts supporting these RPI tasks in conjunction with the Naval Reactors nuclear data measurements and evaluations program.

Task Name	RPI ND1
Collaborators	IRSN (IRSN-ND1), ORNL (ORNL-ND1, ORNL-ND2) Naval Nuclear Laboratory
Task Title	Resonance Region Nuclear Data Measurement Capability
Proposal Submitted	Ongoing
Task Budget (FY23)	\$385K
Task Description	This is an ongoing approved task in collaboration with IRSN and ORNL to support the resonance region Nuclear Data Measurement Capability at RPI and to perform cross-section measurements and qualification of the new capabilities. Aligns with LANL-ND1 and ORNL-ND1 (evaluation) and IRSN-ND1 (evaluation).
FY23 Milestones	<p>All 4 Quarters</p> <ul style="list-style-type: none"> ○ Provide status reports on all ND1 activities in NCSP Quarterly Progress Reports ○ Provide status reports on RPI participation in US and International Nuclear Data collaborations, and for foreign travel, provide a brief trip summary report to NCSP Manager on items of NCSP interest <p>Quarter 1</p> <ul style="list-style-type: none"> ○ Complete analysis of measurement from previous year <p>Quarter 2 – None</p> <p>Quarter 3</p> <ul style="list-style-type: none"> ○ Complete nuclear data measurements (transmission/capture or scattering) per the nuclear data schedule in Appendix B <p>Quarter 4</p> <ul style="list-style-type: none"> ○ Complete measurements data analysis and provide the data to ORNL as needed to support the evaluation effort per the nuclear data schedule in Appendix B

Task Name	RPI ND3
Collaborators	Naval Nuclear Laboratory, ORNL
Task Title	RPI/ORNL: LINAC 2020 Nuclear Data Capabilities Maintenance Plan
Proposal Submitted	Ongoing
Task Budget (FY23)	\$100K
Task Description	This is an ongoing approved task to support the Linear Accelerator (LINAC) 2020 Nuclear Data Capabilities Maintenance Plan in collaboration with Naval Reactors (NA-30) who is co funding 2/3 of the total refurbishment costs. To be able to continue to deliver a reliable neutron beam with the proper conditions required for these experiments, a long-term maintenance and update plan is being implemented.
FY23 Milestones	<p>All 4 Quarters</p> <ul style="list-style-type: none"> ○ Provide status report on all LINAC refurbishment activities in the NCSP Quarterly Progress Reports <p>Quarter 1</p>

	<ul style="list-style-type: none"> ○ Complete condition and qualification of one set of high power Radio frequency (RF) windows to support SOL 1 Accelerator Section site acceptance testing.. <p>Quarter 2</p> <ul style="list-style-type: none"> ○ Complete condition and qualification of one set of high-power Radio-frequency (RF) windows to support TPV Accelerator Section site acceptance testing. <p>Quarter 3</p> <ul style="list-style-type: none"> ○ Complete SOL #1 Accelerator Section Site acceptance testing. ○ Start fabrication of 2nd batch of speed of light structures 2, 3 and 4. <p>Quarter 4</p> <ul style="list-style-type: none"> ○ Complete TPV Accelerator Section Site acceptance testing. ○ Complete delivery of solenoids and quadrupoles components
--	--

Figure 2.5-7 RPI ND Budget Trend (FY2023-FY2027)

EOC – for out-year peaks and dips in budget plots:

The \$100k increase in funding for FY23 is due to LINAC refurbishment costs. Costs for ND1 and ND3 are fixed in the outyears.

2.6 Training and Education (TE)

2.6.1 Program Element Description

The TE program element continues to offer hands-on training courses as needed by DOE and identify training needs and develop training resources in areas where no suitable materials exist. The primary purpose of the TE element is to maintain the technical capabilities of criticality safety professionals and provide for the training and education of people entering the criticality safety discipline from related scientific fields. A significant portion of the TE work effort is to provide both the 2-week hands-on criticality safety courses for criticality safety engineers and 1-week hands-on criticality safety courses for Criticality Safety Officers, process supervisors, and managers.

Each year, at the annual Budget Execution Meeting, the NCSP Manager will review and determine the location of the classroom portion of the Hands-on Training course. Out-year budget profiles will be revised at that time, and funding profiles will not be increased until the location of the course is determined.

Figure 2.6-1 TE Budget (FY2023-FY2027)

Table 2.7 NCSP TE Budget by Site (FY23)

NCSP Site	Budget (\$k)
LANL	\$550
LLNL	\$390
ORNL	\$340
SNL	\$230
Y12	\$0
Grand Total	\$1,510

Figure 2.6-2 TE Budget by Site (FY2023)

2.6.2 Approved Tasks

2.6.2.1 Los Alamos National Laboratory (LANL)

Task Name	LANL TE3
Collaborators	IRSN (IRSN-TE1), AWE (AWE-TE1)
Task Title	Conduct Hands-On Criticality Safety Training Course at NCERC
Proposal Submitted	Ongoing
Task Budget (FY23)	\$472K
Task Description	This is an ongoing approved task to conduct criticality safety hands-on training at NCERC according to an integrated schedule developed by ORNL and approved by the NCSP manager.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide status reports on all TE3 activities in the NCSP Quarterly Progress Reports. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Task Name	LANL TE6
Collaborators	LLNL TE8
Task Title	Development of University Pipeline for Criticality Safety Professionals
Proposal Submitted	FY18
Task Budget (FY23)	\$45K
Task Description	Development of a University Pipeline for Criticality Safety Professionals.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide status reports on all TE6 activities in the NCSP Quarterly Progress Reports Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Task Name	LANL TE8
Collaborators	None
Task Title	Reactivity Simulation Aids
Proposal Submitted	FY19
Task Budget (FY23)	\$33K
Task Description	Further develop existing and new reactivity simulation aids that can be used to support the NCSP mission, along with the Training and Education (T&E) simulation aid goals for the DOE Complex
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide status reports on all TE8 activities in the NCSP Quarterly Progress Reports Quarter 1 – None Quarter 2 – None Quarter 3 – None

Figure 2.6-3 LANL TE Budget Trend (FY2023-FY2027)

EOC – for out-year peaks and dips in budget plots:

The reduction in FY25 funding is due to the completion of tasks TE4 and TE5. Task TE8 funding reduces until it is completed in FY26.

2.6.2.2 Lawrence Livermore National Laboratory (LLNL)

Task Name	LLNL TE1
Collaborators	IRSN (IRSN-TE1), AWE (AWE-TE1)
Task Title	Conduct Hands-on Training at the DAF (TACS)
Proposal Submitted	Ongoing
Task Budget (FY23)	\$260K
Task Description	This is an ongoing approved task to provide unique “hands-on” training at the Device Assembly Facility (DAF) using the Training Assembly for Criticality Safety (TACS). This task also supports continued LLNL coordination of the course registration process for all courses at NSF, NATM, NCERC and SNL.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide a status report on TE1 activities in the NCSP Quarterly Progress Reports. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Task Name	LLNL TE3
Collaborators	None
Task Title	Classroom Criticality Safety Training
Proposal Submitted	Ongoing
Task Budget (FY23)	\$80K
Task Description	This is an ongoing approved task to provide LLNL support classroom instruction at the Nevada Site Facility and participation in TE development activities.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide a status report on TE3 activities in the NCSP Quarterly Progress Reports. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Task Name	LLNL TE8
Collaborators	LANL (LANL TE6)
Task Title	Development of University Pipeline for Criticality Safety Professionals
Proposal Submitted	FY21 – Direct request to the NCSP Manager
Task Budget (FY23)	\$50K
Task Description	Development of a University Pipeline for Criticality Safety Professionals.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide status reports on all training activities to the NCSP Manager, to include photos and content for the quarterly newsletter Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Figure 2.6-4 LLNL TE Budget Trend (FY2023-FY2027)

EOC – for out-year peaks and dips in budget plots:

LLNL TE funding is stable over the five-year period except for a slight reduction in task LLNL TE1.

2.6.2.3 Oak Ridge National Laboratory (ORNL)

Task Name	ORNL TE1
Collaborators	IRSN (IRSN TE1), AWE (AWE TE1)
Task Title	Manage and Provide Instruction for the DOE Nuclear Criticality Safety Training & Education Program
Proposal Submitted	Ongoing
Task Budget (FY23)	\$240K
Task Description	Ongoing ORNL task to manage the collaborative multi-laboratory development, designing, and scheduling of the multi-faceted and phased NCSP training program and manage the execution of the program. The task also includes support for an ORNL nondestructive assay (NDA) expert, an NCS expert, and an NCS expert with federal experience to support the 2-week hands-on and manager courses.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide a status report on implementation of the NCS training program in the NCSP Quarterly Progress Reports. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Task Name	ORNL TE11
Collaborators	None
Task Title	Revision of the LA-12808 Nuclear Criticality Safety Guide
Proposal Submitted	FY21
Task Budget (FY23)	\$0K (use FY22 carryover)
Task Description	ORNL to revise this document to make clarifications and enhancements because of almost 25 years of NCS lessons learned since the last revision.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide a status report of progress on TE11 in the NCSP Quarterly Progress Reports. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Task Name	ORNL TE14
Collaborators	Georgia Institute of Technology, Texas A&M University
Task Title	Nuclear Criticality Safety Training and Pipeline Development
Proposal Submitted	FY22
Task Budget (FY23)	\$100K
Task Description	Develop a new university-based nuclear criticality training certificate program with the intent to develop a pipeline of nuclear criticality specialists into Department of Energy Laboratory complex. This program will attract students across the United States but will have a regional focus on the Southeastern United States.
FY23 Milestones	All 4 Quarters

	<ul style="list-style-type: none"> ○ Provide a status report of progress on TE14 in the NCSP Quarterly Progress Reports. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None
--	---

Figure 2.6-5 ORNL TE Budget Trend (FY2023-FY2027)

EOC – for out-year peaks and dips in budget plots:

The ORNL TE budget increases significantly in FY24 due to restoring typical TE funding to manage the NCSP training and education program and the new NCS training and pipeline development collaboration with GA Tech and Texas A&M. Several tasks are also due to begin starting in FY24 to add to the NCSET NCS library (ORNL-TE6, ORNL-TE7, ORNL-TE8, ORNL-TE13) and will be completed by FY25 resulting in the budget drop to FY24-FY27.

2.6.2.4 Sandia National Laboratories (SNL)

Task Name	SNL TE1
Collaborators	IRSN (IRSN-TE1), AWE (AWE-TE1)
Task Title	Prepare for and Conduct Hands-on Criticality Safety Training at SNL
Proposal Submitted	Ongoing
Task Budget (FY23)	\$230K
Task Description	This is an ongoing approved task to conduct hands-on criticality safety training classes at SNL according to an integrated schedule developed by ORNL and approved by the NCSP Manager. Provide Human Factors and Equipment Reliability module support to the training class.
FY23 Milestones	<p>All 4 Quarters</p> <ul style="list-style-type: none"> ○ Conduct hands-on training classes at Sandia and provide Human Factors and Equipment Reliability module support to the LANL training classes in accordance with the approved schedule. <p>Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None</p>

Figure 2.6-6 SNL TE Budget Trend (FY2023-FY2027)

EOC – for out-year peaks and dips in budget plots:

SNL TE budgets are unchanged over the five-year budget period.

2.6.2.5 Y-12 National Security Complex

Task Name	Y12 TE1
Collaborators	
Task Title	Conduct Hands-On Criticality Safety Training Course (Lecture support week 1 of 2-week hands-on course and course material development)
Proposal Submitted	Ongoing
Task Budget (FY23)	\$0K (Use FY22 carryover)
Task Description	This is an ongoing integrated, approved task for Y12 to assist in conducting the current criticality safety training classes at NFO and NCERC (as necessary). This task will also involve assisting with generating new training materials at the NFO classroom portion of the course as necessary.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide a status report of Y12 activities to support the hands-on training courses. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Figure 2.6-7 Y-12 TE Budget Trend (FY2023-FY2027)

EOC – for out-year peaks and dips in budget plots:

Y-12 TE funding was reduced in FY23 due to excess carryover. Task TE2 is a 1-year task starting in FY24. After FY24, the Y-12 TE budget returns to a nominal level.

3.0 NCSP Technical Support

NCSP Technical Support to assist the NCSP Management Team in the program management and execution of the NCSP and funding for the succession planning of key program elements as defined in the 10-year Mission and Vision.

Figure 3.1 NCSP Technical Support (FY2023-FY2027) - by Laboratory

***SUR in Figure 3.1 indicates anticipated surplus NCSP funding in the outyears based on projected budgets.**

Table 2.8 NCSP TS Budget by Site (FY23)

NCSP Site	Budget (\$k)
BNL	\$100
CSSG	\$355
LANL	\$110
LLNL	\$120
NNL	\$15
ORNL	\$1,010
SNL	\$255
Grand Total	\$1,965

Figure 3.2 NCSP TS Budget by Site (FY2023)

Task Name	NCSP TS1												
Collaborators	None												
Task Title	CSSG – Support for the Criticality Safety Support Group												
Proposal Submitted	Ongoing												
Task Budget & Member Costs by Site (FY21)	\$355K												
	NCSP MGR	ANL	DOE EM	LANL			LLNL	ORNL				SRS	Y-12
	\$0K	\$0K	\$0K	\$50K	\$55K	\$50K	\$50K	\$30K	\$30K	\$5K	\$40K	\$20K	\$25K
Task Description	<p>The CSSG is comprised of recognized criticality safety experts from DOE offices and contractor organizations. The primary function of the CSSG is to provide operational and technical expertise to the DOE through the NCSP Manager. The CSSG also provides the NCSP Manager with technical reviews of orders, standards, rules, and guides issued by DOE related to criticality safety. In addition, the CSSG responds to requests from the NCSP Manager for information, technical reviews, and evaluations of criticality safety issues throughout the complex. There are normally 10 CSSG members (periodically there could be additional members to support new member transition and overlap). Only contractor members of the CSSG are modestly funded. One CSSG member is funded by DOE-EM. This is an ongoing approved task to provide Technical Support as tasked by NCSP Manager through approved CSSG Taskings as documented and provided on the NCSP Website.</p>												
FY23 Milestones	<p>All 4 Quarters</p> <ul style="list-style-type: none"> ○ Provide a status report of TS1 activities in the NCSP Quarterly Progress Reports.

Task Name	ORNL TS2
Collaborators	None
Task Title	ORNL – Support for Lead Lab to Execute the NCSP
Proposal Submitted	Ongoing
Task Budget (FY23)	\$660K
Task Description	Ongoing ORNL task to support the NCSP Management Team in the program management and execution of the NCSP.
FY23 Milestones	<p>All 4 Quarters</p> <ul style="list-style-type: none"> ○ Maintain up-to-date spreadsheet of proposed tasks for NCSP Manager after the NCSP proposal review meeting and through the final task prioritization effort by the NCSP Management Team. ○ Manage 5-year plan development and maintenance and oversee the CEDT process and manage main 5-year plan and Integral Experiment Request Milestones <p>Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4</p> <ul style="list-style-type: none"> ○ Organize and lead the Budget Execution Meeting and assist NCSP Manager in finalization of approved tasks for next FY ○ Publish final Five-Year Plan.

Task Name	SNL TS3
Collaborators	None
Task Title	SNL – Support for Experimentalist Succession Planning
Proposal Submitted	Ongoing
Task Budget (FY23)	\$80K
Task Description	In accordance with the ten-year Mission and Vision, the NCSP has identified the need to develop and implement succession plans for key staff expert capabilities to support continued execution of the NCSP Mission. At SNL, there is a need to maintain the integral experiment expertise using the SNL critical experiment capabilities. The work associated with this task is to develop and execute IE Succession Planning for new experimentalists at SNL.
FY23 Milestones	<p>All 4 Quarters</p> <ul style="list-style-type: none"> ○ Provide NCSP Manager annual report of succession planning efforts. <p>Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None</p>

Task Name	LANL TS4
Collaborators	None
Task Title	LANL – AM, IE, ND Succession Planning
Proposal Submitted	Ongoing

Task Budget (FY23)	\$110K
Task Description	In accordance with the ten-year Mission and Vision, the NCSP has identified the need to develop and implement succession plans for key staff expert capabilities to support continued execution of the NCSP Mission. There is a need to maintain expertise in the analytical methods, integral experiments and nuclear data capabilities that currently exist at LANL. The work associated with this task is to develop and execute AM, IE, and ND Succession Planning at LANL as defined in the NCSP Mission and Vision document for cross-section processing developers, radiation transport methods developers, experimentalists, and nuclear data evaluators.

------------------------	--

Task Name	ORNL TS7
Collaborators	None
Task Title	ORNL – AM, ND Succession Planning
Proposal Submitted	Ongoing
Task Budget (FY23)	\$100K
Task Description	Task to address key nuclear data and analytical methods succession planning needs for the NCSP. As part of this task, junior ORNL staff (e.g., post-doctoral staff member or entry-level staff member) will work with key ORNL ND and AM specialists to complete NCSP ND and AM work tasks thereby training the next generation of experts to perform key NCSP nuclear data and analytical methods tasks.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide NCSP Manager annual report of succession planning efforts. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Task Name	ORNL TS8
Collaborators	None
Task Title	ORNL – NCSP Program Management Tools Development
Proposal Submitted	Ongoing
Task Budget (FY23)	\$150K
Task Description	This task continues work initiated in FY2017 to develop a program management tool that will improve the overall efficiency of managing the NCSP. A new IER database has been created and implemented. This funding will be used to maintain the IER database in the G2 system, fix programming errors, and to modestly enhance the system as needed to support IE 5-year plan objectives.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide NCSP Manager a status report of progress on the new IER system in G2 in the NCSP Quarterly Progress Reports. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Task Name	NNL TS9
Collaborators	None
Task Title	NNL – Support for NDAG Chair activities
Proposal Submitted	Ongoing

Task Budget (FY23)	\$15K
Task Description	Provide support for NDAG Chair activities, participate in relevant Working Groups and domestic and international nuclear data meetings as the nuclear data lead for the NCSP, and coordinate NCSP ND element work program with current and future DOE needs. Support the development of the 5-year plan by coordinating and planning nuclear data prioritization meetings and working with the NCSP management team for tracking progress nuclear data tasks over the course of the year.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide status report on all NDAG chair activities in NCSP Quarterly Progress Reports, Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Task Name	SNL TS12
Collaborators	None
Task Title	SNL – NCSP C _{Ed} T Manager Support
Proposal Submitted	Ongoing
Task Budget (FY23)	\$175K
Task Description	Activities for this task include integral experiment request (IER) tracking, experimental facility metrics, C _{Ed} T duties, Work for Others tracking/approval, keeping the NCSP management team informed about DAF NCSP activities, 5YP IE plan support, working with task MGRs to submit BCR forms, conduct integral experiment (IE) telecons to track IE NCSP work, availability of NCERC and Sandia critical assemblies for NCSP work, and other tasks at the discretion of NCSP manager or execution manager.
FY23 Milestones	All 4 Quarters <ul style="list-style-type: none"> ○ Provide the NCSP manager with a summary of NCSP C_{Ed}T support in the NCSP Quarterly Progress Reports. Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None

Task Name	ORNL TS13
Collaborators	None
Task Title	ORNL – NDA Technical Support Group and NDA Technical Infrastructure Project
Proposal Submitted	Ongoing
Task Budget (FY23)	\$100K
Task Description	This task involves the creation of an NDA program Mission and Vision document and 5-year plan to initiate a new federal program to resolve criticality safety issues related to fissionable material holdup and other issues related to NDA technology for NCS purposes. A DOE standard, development of ANSI/ANS-8.28 standard for NDA NCS administrative practices, and support for the NDA Technical Support Group (TSG). Sites involved currently are ORNL, SRS, and Y-12. LLNL is currently helping with NDA website development. ORNL will work with NNSA NA-ESH-21 staff to help lead this task.
FY23 Milestones	All 4 Quarters

	<ul style="list-style-type: none">○ Provide the NCSP manager an update of NDA Technical Support Group and NDA Technical Infrastructure Project activities in the NCSP Quarterly Progress Reports. <p>Quarter 1 – None Quarter 2 – None Quarter 3 – None Quarter 4 – None</p>

**APPENDIX A: Work Authorization Statements for Nuclear Criticality Safety Program
Funding for Execution Year FY2023**

Provided to the NA-91 Budget Office in August 2022

Brookhaven National Laboratory (BNL): \$460K

Task: *Analytical Methods, Nuclear Data*

Reflects funds to continue supporting nuclear data activities, including shepherding new data evaluations through the Cross-Section Evaluation Working Group (CSEWG) process, subsequent publication of these data in the United States Evaluated Nuclear Data File (ENDF), and nuclear data succession planning, as delineated in the Nuclear Criticality Safety Program (NCSP) FY23 Five-Year Plan, or as directed by the NCSP Manager.

BNL POC: Gustavo Nobre (631-344-5205), gnobre@bnl.gov

DOE POC: Angela Chambers, NNSA (806-573-6407), Angela.Chambers@nnsa.doe.gov

Los Alamos National Laboratory (LANL): \$13,465K

Tasks: *Analytical Methods, Information Preservation and Dissemination, Integral Experiments, Nuclear Data, Training and Education, and the Criticality Safety Support Group*

Reflects funds to continue analytical methods; information preservation and dissemination; integral experiments; nuclear data; and training and education support, as delineated in the Nuclear Criticality Safety Program (NCSP) FY23 Five-Year Plan, or as directed by the NCSP Manager; succession planning for cross-section processing developers, radiation transport developers, experimentalists, and/or nuclear data developers/evaluators; and for participation in the Criticality Safety Support Group (CSSG), as it provides technical support to the NCSP Manager regarding planning and execution of the NCSP.

LANL POC: Joetta Goda (505-667-2812), jgoda@lanl.gov

DOE POC: Angela Chambers, NNSA (806-573-6407), Angela.Chambers@nnsa.doe.gov

Lawrence Livermore National Laboratory (LLNL): \$3,429K

Tasks: *Analytical Methods, Information Preservation and Dissemination, Integral Experiments, Nuclear Data, Training and Education, and the Criticality Safety Support Group*

Reflects funds to continue support for analytical methods; information preservation and dissemination; integral experiments; nuclear data; training and education, as delineated in the Nuclear Criticality Safety Program (NCSP) FY23 Five-Year Plan, or as directed by the NCSP Manager; succession planning for equipment support, facility support, and/or radiation transport developers; and for participation in the Criticality Safety Support Group (CSSG), as it provides technical support to the NCSP Manager regarding planning and execution of the NCSP.

LLNL POC: Catherine Percher (925-423-9345), percher1@llnl.gov

DOE POC: Angela Chambers, NNSA (806-573-6407), Angela.Chambers@nnsa.doe.gov

Nevada National Security Site (NNS): \$3,350K

Task: *Integral Experiments*

Reflects funds for MSTs (NNS) continue support for integral experiments and training and education tasks as delineated in the Nuclear Criticality Safety Program (NCSP) FY23 Five-Year Plan.

NNSS POC: Sylvia Wright-Reader (702-2950597), WrightSD@nv.doe.gov
DOE POC: Angela Chambers, NNSA (806-573-6407), Angela.Chambers@nnsa.doe.gov

Naval Nuclear Laboratory (NNL): (\$15K)

Task: NDAG Chair Support

Reflects funds NNL to provide NDAG chair support. Funds will be sent to the NNL M&O partner, Fluor Marine Propulsion (FMP).

NDAG Chair funds for Mike Zerkle at NNL.

NNL POC: Tim Trumbull (518-395-5203), timothy.trumbull@unnpp.gov
DOE POC: Angela Chambers, NNSA (806-573-6407), Angela.Chambers@nnsa.doe.gov

Oak Ridge National Laboratory (ORNL): \$6,011K

Tasks: NCSP Technical Support, Analytical Methods, Information Preservation and Dissemination, Integral Experiments, Nuclear Data, and Training and Education

Reflects funds to continue support for analytical methods; information preservation and dissemination; integral experiments; nuclear data; and training and education, as delineated in the Nuclear Criticality Safety Program (NCSP) FY23 Five-Year Plan, or as directed by the NCSP Manager; Technical Support for NCSP management; and for succession planning for cross-section processing developers, radiation transport developers, and/or nuclear data evaluators/experimentalists/developers, and for support to the Criticality Safety Support Group (CSSG).

ORNL POC: Douglas G. Bowen (865-576-0315), bowendg@ornl.gov
DOE POC: Angela Chambers, NNSA (806-573-6407), Angela.Chambers@nnsa.doe.gov

Pacific National Northwest Laboratory (PNNL): \$90K

Tasks: Analytical Methods, Information Preservation and Dissemination

Reflects funds to continue support for analytical methods as discussed in the Nuclear Criticality Safety Program (NCSP) FY23 Five-Year Plan, or as directed by the NCSP Manager.

PNNL POC: Travis Zipperer (206-528-3474), travis.zipperer@pnnl.gov
DOE POC: Angela Chambers, NNSA (806-573-6407), Angela.Chambers@nnsa.doe.gov

Rensselaer Polytechnic Institute (RPI): (\$485K)

Task: Nuclear Data Support at RPI

Reflects funds to conduct differential measurements as delineated in the Nuclear Criticality Safety Execution (NCSP) FY23 Five-Year Plan and continue work, as defined in the RPI LINAC 2022 Nuclear Data Capabilities Maintenance Plan, or as directed by the NCSP Manager. Funds will be sent to the NNL M&O partner, Fluor Marine Propulsion (FMP).

RPI POC: Yaron Danon (518-276-4008), danony@rpi.edu
NNL POC: Tim Trumbull (518-395-5203), timothy.trumbull@unnpp.gov
DOE POC: Angela Chambers, NNSA (806-573-6407), Angela.Chambers@nnsa.doe.gov

Sandia National Laboratories (SNL): \$1,710K

Tasks: *Integral Experiments, Training and Education, Technical Support*

Reflects funds to continue support for integral experiments; training and education; CEDT Manager Support, and succession planning for experimentalists as, delineated in the Nuclear Criticality Safety Program (NCSP) FY23 Five-Year Plan or as directed by the NCSP Manager.

Sandia National Laboratory (SNL): Allocation of \$40k of NCSP funding to SNL under WBS 50.7.1.2.1 Program Support to fund SNL hosting the annual NCSP technical program review. The funding may be used to support planning for the meeting as well as fees to cover the meeting location including main auditorium/presentation room, smaller breakout meeting rooms, any needed audio/video/IT support for presentations, office equipment/supplies necessary to support meeting, escorts for foreign national meeting attendees and presenters, as necessary, food including coffee and other beverages and snacks for morning and afternoon breaks due to limited time and inaccessibility of other beverage/food options for meeting participants, personnel necessary to support conduct of meeting. This also includes any penalty costs should the meeting be cancelled or postponed (i.e., due to emerging conditions such as COVID-19 levels).

SNL POC: Gary Harms (505-845-3244), gaharms@sandia.gov

DOE POC: Angela Chambers, NNSA (806-573-6407), Angela.Chambers@nnsa.doe.gov

Savannah River Site (SRS): \$0K

Tasks: *Information Preservation and Dissemination and the Criticality Safety Support Group*

Reflects funds to update and maintain ARH-600 as delineated in the Nuclear Criticality Safety Program (NCSP) FY23 Five-Year Plan, or as directed by the NCSP Manager, to support the NDA Technical Support Group and NDA Technical Infrastructure Project, and for participation in the CSSG, as it provides technical support to the NCSP Manager regarding planning and execution of the NCSP.

SRS POC: David Erickson (803-557-9445), david.erickson@srs.gov

DOE POC: Angela Chambers, NNSA (806-573-6407), Angela.Chambers@nnsa.doe.gov

Y-12 National Security Complex (Y-12): \$45K

Tasks: *Analytical Methods, Training and Education, Nuclear Data, and the Criticality Safety Support Group*

Reflects funds to support the training and education program, the design of integral experiments involving systems with enriched uranium, chlorine, and lithium-6, and the study of a solution reactor design in collaboration with IRSN, as delineated in the Nuclear Criticality Safety Program (NCSP) FY23 Five-Year Plan, or as directed by the NCSP Manager. Further, an additional task is funded for general NCSP and CSSG support, as required.

Y-12 POC: Kevin Reynolds (865-241-9067), kevin.reynolds@pxy12.doe.gov

DOE POC: Angela Chambers, NNSA (806-573-6407), Angela.Chambers@nnsa.doe.gov

NCSP Manager: Hold Back – \$0K

Reflects DOE HQ Hold Back for the CSSG that will be held as HQ reserve funds.

DOE POC: Angela Chambers, NNSA (806-573-6407), Angela.Chambers@nnsa.doe.gov

APPENDIX B: Nuclear Data Priorities, Basis Statements, and Milestones

Nuclear Data Measurements							
Materials	Pre-FY2023	FY2023	FY2024	FY2025	FY2026	FY2027	Post-FY2027
Cesium (¹³³ Cs)			LANL	LANL	LANL		
Basis	<p>¹³³Cs is an important fission product for burnup credit. Cross sections have been identified as inadequate (ORNL/TM-2005/65). The DICER and DANCE instruments will be used at LANSCE to provide necessary data to support a new evaluation.</p>						
Chlorine (³⁵ Cl)		ORNL	ORNL	ORNL			
		LANL	LANL	LANL			
Basis	<p>Measurement of the ³⁵Cl (n,p) cross section using LENZ at LANL. FY23 will be for LENZ at WNR and focus on the energy range from 100 keV to 15 MeV (LANL work on this experiment is funded by GAIN). FY24 and FY25 will be LENZ at Lujan and focus on the energy range from 1 keV to 500 keV. Chlorine is present in fuel cycle facilities in Pu solutions, electrorefining processes, chloride salts, and as brine/drift in some repository environments. Improved ³⁵Cl (n,p) cross sections needed for poison credit in these in these environments. A need for improved ³⁵Cl cross sections has been specifically identified at LANL and Y-12.</p>						
Chromium (^{50,53} Cr)				ORNL			
Basis	<p>Measurement of the ⁵³Cr neutron capture cross section in the 2-10 keV energy range is needed to resolve discrepancies observed in historical fast assembly benchmarks containing stainless steel. The RPI measurement will address data request by CSEWG and IAEA. ORNL will measure ^{50,53}Cr neutron capture below 10 keV at GELINA using diluted samples to reduce or minimize multiple scattering and neutron sensitivity effects impacting prior measurements. Cr50 data over the RR range are needed.</p>						
Fluorine (¹⁹ F)			ORNL	ORNL			
			IRSN	IRSN			
Basis	<p>Measurement of the ¹⁹F inelastic scattering reaction channels at GELINA that appear to be underestimated in the current evaluation. Analysis and evaluation of the angular distributions in the RRR. Errors in fluorine may be contributing to bias in ²³³U benchmarks. Fluorine is used in the uranium enrichment process and molten salt reactor coolants.</p>						
Iodine					RPI		
Basis	<p>Measurement of neutron capture cross section of Iodine at RPI needed to resolve large discrepancies in simulations of large NaI detectors used for neutron capture cross section measurements. Will also support improved modeling of NaI gamma detectors in neutron fields for other DOE and DOD applications.</p>						
Iron (⁵⁴ Fe)	RPI						
	IRSN						
Basis	<p>Measurement of the neutron capture cross section for ⁵⁴Fe in the keV energy range at RPI is needed to support development of consistent Fe cross section evaluations. Recent measurement and evaluation work on ⁵⁶Fe has highlighted the need for new measurements and evaluation for ⁵⁴Fe. Iron is a ubiquitous element used in reactor, fuel cycle facility, spent fuel storage, and radiation shielding applications. IRSN is interested in this measurement as well.</p>						
Molybdenum (⁹⁵ Mo)	LANL						
	IRSN						
Basis	<p>Measurement of neutron capture in ⁹⁵Mo in resonance range, URR at RPI. Neutron transmission measurements previously completed at RPI. ⁹⁵Mo is a stable fission product and the primary absorbing nuclide in natural Molybdenum. Molybdenum isotopes are currently encountered in irradiated fuel as fission products or in molybdenum alloys in research reactors and space reactors. The current primary interest in NCS is for fission product credit for transport casks, irradiated fuel storage, and reprocessing plants (UPu-MoZr deposits in French reprocessing plant equipment for example). Needs identified by NR and IRSN for fission product credit and Y-12 for U-Mo applications (lower priority). Isotopically enriched sample required. LANL completed analysis of existing high-quality ORELA capture and transmission data in the resolved and unresolved resonance regions. RPI/NNL to reassess the needs for addition measurements once the RPI LINAC returns to operation following the upgrade.</p>						

Nuclear Data Measurements							
Materials	Pre-FY2023	FY2023	FY2024	FY2025	FY2026	FY2027	Post-FY2027
Neodymium (¹⁴³ Nd)		LANL					
Basis	¹⁴³ Nd is an important stable fission product for burnup credit. Cross sections have been identified as inadequate (ORNL/TM-2005/65). DOE-SC funded DANCE measurements at LANSCE. NCSP funding will be used to complete the analysis of the DANCE data.						
Neptunium (²³⁷ Np)				ORNL	ORNL	ORNL	
				LANL	LANL	LANL	
Basis	Measurement of ²³⁷ Np nuclear data at LANL. ²³⁷ Np is an actinide of interest in nuclear criticality safety for applications at ORNL and other sites. Applications include ²³⁸ Pu production w/ HFIR at ORNL (low NCSP priority) and fast burst reactor for LANL. Nuclear data improvements will improve critical mass estimates. On the HPRL there is a request for fission cross section in the energy range from 200 keV to 20 MeV. The application list was fast systems, and the required accuracy is 1.5-4%. This requirement comes from the desire to improve the current low accuracy in the covariance matrix (6-8%).						
Plutonium (²³⁹ Pu)		LANL	LANL	LANL			
		IRSN	IRSN	IRSN			
Basis	There has been a recent IRSN request for a new measurement of the ²³⁹ Pu neutron total cross section at low neutron energies to better enable a new resonance evaluation of the plutonium isotopes. This evaluation work is concentrated on the evaluation of ²³⁹ Pu to improve benchmark calculations for thermal plutonium solutions, which remain problematic despite much work over the years. While transmission (total cross section) data are available in the low-energy region, the majority of these data are not of the quality needed to inform the resonance evaluation. Capabilities afforded by the new DICER (Device for Indirect Capture Experiments on Radionuclides) instrument at LANSCE (Los Alamos) promise higher-quality data to support the evaluation work.						
Plutonium (²⁴⁰ Pu)	LANL	LANL					
	LLNL	LLNL					
Basis	Measure ²⁴⁰ Pu prompt fission neutron energy spectra (PFNS) with Chi-Nu detector at LANL (LANCSE/WNR). The need for more accurate PFNS has been recognized. Supports applications with WG Pu and reactor grade Pu. This is a joint LANL/LLNL measurement.						
Samarium (¹⁴⁹ Sm)		LANL					
Basis	¹⁴⁹ Sm has a thermal capture cross section of 40,000 b and is an important stable fission product for burnup credit. ¹⁴⁹ Sm builds up like ¹³⁵ Xe in power reactor fuel, but does not decay out of spent nuclear fuel. Cross sections have been identified as inadequate (ORNL/TM-2005/65). The DANCE and DICER instruments have been used at LANSCE to measure necessary data under DOE-SC and LDRD funding. Accurate ¹⁴⁹ Sm cross sections are important for NR. NCSP funding will be used to complete the analysis of this measurement.						
Samarium (¹⁵¹ Sm)						LANL	LANL
Basis	¹⁵¹ Sm is an important fission product for burnup credit. Cross sections have been identified as inadequate (ORNL/TM-2005/65). The DICER and DANCE instruments will be used at LANSCE to provide necessary data.						
Strontium (^{86,87} Sr)					ORNL	ORNL	
Basis	Enriched ^{86,87} Sr transmission and capture measurements at GELINA are needed to supplement existing ⁸⁸ Sr ORNL measurements to support complete RR evaluation for natural strontium isotopes for ENDF/B. ^{86,87} Sr are minor isotopes representing about 18% of natural strontium.						
Uranium (²³³ U)	LANL		LANL	LANL	LANL		
Basis	²³³ U neutron capture measurements in resonance range and the unresolved fast energy range at the Lujan center at LANCE/LANL using the DANCE detector. ORNL report on ²³³ U data assessment concluded that a new evaluation with revised (renormalized) fission cross section is needed. After re-evaluation of the ²³³ U, new capture cross section measurements (resonance region) may be needed to support this evaluation. NCS applications at LANL (CMR), ORNL, DAF/NCERC, spare unirradiated LWBR modules at INL. LANL will measure capture cross section using the DANCE detector multiplicity features in FY20-FY22. Prompt fission neutron spectra will be measured at LANSCE / Chi-Nu in FY24-FY26.						

Nuclear Data Measurements							
Materials	Pre-FY2023	FY2023	FY2024	FY2025	FY2026	FY2027	Post-FY2027
Uranium (²³⁶ U)						ORNL	ORNL
Basis	²³⁶ U high-resolution transmission measurements in the RRR at GELINA or LANL to complement recent LANL fast energy evaluation. ²³⁶ U is a minor activation product present in HEU. Improved ²³⁶ U cross section evaluation supports all DOE programs using HEU.						
Vanadium (⁵¹ V)			ORNL	ORNL			
Basis	Recent vanadium measurements showed large multiple scattering corrections needed to be accounted for neutron energies below 10 keV. Additional measurements are needed at GELINA possible using diluted samples on order to reduce or minimize the neutron sensitivity to experimental setup. Vanadium is used in some fissile material containers.						
Zirconium (^{90,91,92,94,96} Zr)	ORNL	ORNL	ORNL	ORNL			
Basis	Neutron capture and possibly transmission measurements in resonance range at GELINA. Old ORELA transmission data on enriched isotopes are available for analysis. Isotopically enriched samples are required. Zirconium is a key structural element that is primarily used in cladding for fuel rods and is currently in consideration for use with advanced nuclear fuel matrices in the form of zirconium hydride. The main application is reactor fuel cladding. ^{nat} Zr transmission and capture measurements were recently completed by ORNL. NR continues to be unsatisfied with Zr evaluations in ENDF.						
Polystyrene (C ₈ H ₈)	ORNL						
	RPI						
Basis	Polystyrene is a moderator material found in several thermal systems (PCT001, PCT02, MCT012, MCT013, MCT014, MCT016). Currently, polyethylene is used as a surrogate to represent thermal scattering in polystyrene in neutron transport simulations. This SNS measurement and evaluation will determine the validity of this approximation, as well as inform future substitutions for other hydrocarbons found in benchmarks. RPI will perform subthermal transmission measurements to support this TSL evaluation.						
Polyethylene (C ₂ H ₄)	RPI						
Basis	Polyethylene is a ubiquitous moderator material used in critical assemblies, shipping containers and fuel cycle facilities. RPI will perform subthermal transmission measurements as part of the subthermal transmission target development and to support TSL evaluation validation.						
Lucite (C ₅ O ₂ H ₈)	RPI						
Basis	Lucite is a moderator material used in some critical assemblies and in glovebox windows. RPI performed subthermal transmission measurements as part of the subthermal transmission target development and to support TSL evaluation validation.						
Yttrium Hydride (YH _x)	RPI						
Basis	Yttrium hydride is an advanced high temperature moderator used in advanced reactor designs. RPI performed subthermal transmission measurements to support TSL evaluation validation as part of the subthermal transmission target development.						
Beryllium (Be)	NNL						
Basis	Beryllium metal is a reflector material used in materials testing reactors (ATR), advanced reactor design, and advanced reactor designs. NNL performed subthermal transmission measurements to support TSL evaluation validation. (NR funded)						
ZrH _x	NNL						
Basis	Zirconium hydride is an advanced moderator material used in TRIGA reactors and in several advanced reactor designs. NNL performed subthermal transmission measurements to support TSL evaluation validation. (NR/GA/DARPA funded)						
ZrC	NNL						
Basis	Zirconium carbide is an advanced coating used in high performance TRISO fuel and as a hydrogen corrosion barrier. NNL performed subthermal neutron transmission measurements to support TSL evaluation validation. (NR funded)						

Nuclear Data Measurements							
Materials	Pre-FY2023	FY2023	FY2024	FY2025	FY2026	FY2027	Post-FY2027
Petrolatum	NNL						
Basis	Petrolatum is a heavy paraffinic oil and a moderator better than water that is occasionally used in fissile handling areas. NNL performed subthermal transmission measurements to support TSL evaluation validation. (NR funded)						

List Legend	ORNL	RPI	LANL	LLNL/NCSU	IRSN	NNL	BNL
-------------	------	-----	------	-----------	------	-----	-----

Nuclear Data Evaluations							
Materials	Pre-FY2023	FY2023	FY2024	FY2025	FY2026	FY2027	Post-FY2027
Beryllium (⁹ Be)	LANL	LANL	LANL	LANL	LANL		
Basis	Be-9 evaluations continue to be challenged by benchmark critical experiments. See pg. 167 of the ENDF/B-VIII.0 report. The accompanying text indicates “there is considerable spread in these Be assembly results.” The ENDF/B-VIII.0 evaluation of Be-9 carried over cross sections from ENDF/B-VII.1 but adopted JENDL-4.0 evaluations of elastic scattering angular distribution and (n,2n) angular and energy distributions. This leaves a less-than-satisfactory inconsistency between the elastic angular distributions and integrated cross sections that should be resolved. The proposed approach is to employ a new representation of the four-body (2n,2 alpha) breakup channel in the R-matrix analysis.						
Chlorine (³⁵ Cl)	ORNL	ORNL	ORNL	ORNL			
		LANL	LANL	LANL			
Basis	Revise ³⁵ Cl resonance and fast evaluation based on ³⁵ Cl(n,p) measurements. Chlorine is present in fuel cycle facilities in Pu solutions, electrorefining processes, chloride salts, and as brine/drift in some repository environments. Improving ³⁵ Cl(n,p) cross sections needed for poison credit in these environments. A need for improved ³⁵ Cl cross sections has been specifically identified at LANL and Y-12. When measured (n,p) data from nTOF will be available, a new fit to include those can data can be performed together with the new measurements from LANL. The evaluation will be an ORNL / LANL collaboration, with ORNL focused on the resonance region and LANL on the fast energy region. Note that a first pass of the fast region revision (including covariances) will be performed by LANL in FY23 with support from GAIN.						
Chromium (^{50,53} Cr)				ORNL	ORNL	ORNL	
Basis	Measurement and evaluation of ^{50,53} Cr neutron capture cross section below 10 keV energy range is needed to resolve discrepancies observed in historical fast assembly benchmarks containing stainless steel. ORNL will measure ^{50,53} Cr neutron capture below 10 keV at GELINA using diluted samples to reduce or minimize multiple scattering and neutron sensitivity effects impacting prior measurements. Cr50 data over the RR range is needed. The cluster of s-wave resonances (mainly for ⁵³ Cr) in the neutron energy region between 1-10 keV is the major update to be performed in the ENDF/B-VIII.0 library. As in the current release the magnitude of the capture cross sections is inconsistent with benchmark calculations.						
Copper (^{63,65} Cu)	ORNL						
	LANL	LANL	LANL				
Basis	A revised evaluation of copper isotopes is needed to improve the benchmark performance above 100 keV up to 300 keV. This will include a statistical analysis of the resonance parameters above 100 keV to quantify the impact of the missing resonances in the measured data as well as a guidance in the level spin assignment. Due to the importance of the copper being used in critical assembly applications as reflector, additional work on the angular distributions is needed. Moreover, since benchmark sensitivity extends above 300 keV, a careful analysis of the high energy cross sections is needed. With the adopted corrections described above, further analyses will be devoted to quantifying the impact of the angular distributions in the RRR on benchmarks calculations and neutron scattering measurements.						
Fluorine (¹⁹ F)			ORNL	ORNL	ORNL		
			IRSN	IRSN	IRSN		
Basis	The evaluation of the ¹⁹ F inelastic scattering reaction channel is needed since it appears to be underestimated in the current ENDF/B-VIII.0 evaluation. Further analyses and related evaluation of the angular distributions in the RRR are needed. Since fluorine is used in the uranium enrichment process and molten salt reactor coolants, errors in the ¹⁹ F evaluated data may be contributing to bias in ²³³ U benchmarks.						

Nuclear Data Evaluations							
Materials	Pre-FY2023	FY2023	FY2024	FY2025	FY2026	FY2027	Post-FY2027
Hafnium (^{176,177,178,179,180} Hf)	ORNL	ORNL	ORNL	ORNL			
	IRSN	IRSN	IRSN	IRSN			
	NNL	NNL	NNL	NNL			
Basis	Hafnium is a neutron poison used in reactor and fuel cycle applications. IRSN, ORNL and NNL will review the existing Hf URR evaluation and develop new URR evaluations and covariances to improve agreement with the TEX HEU/Hf experiment. New isotopic measurements are needed to make improvements to the RRR, which will lead to a re-evaluation of the RRR once the measurements are completed.						
Iron (^{54,56,57} Fe)	ORNL	ORNL	ORNL				
	IRSN	IRSN	IRSN				
	BNL	BNL	BNL				
Basis	Although the effort on the Fe isotopes was planned as joint effort between ORNL and IRSN, IRSN mainly led the evaluation effort and it is unclear the status of this set of evaluations. The ORNL contribution to ⁵⁶ Fe was the generation of a preliminary ENDF file solving the problem with the benchmark performance. However, a rigorous evaluation work is still needed for the three major isotopes mainly for the assessment of the inelastic scattering reaction channel. ORNL will revise the ⁵⁴ Fe, ⁵⁶ Fe, and ⁵⁷ Fe resonance evaluations. BNL also participating under DOE-SC funding.						
Iron (⁵⁶ Fe)	ORNL	ORNL	ORNL				
	IRSN	IRSN	IRSN				
	BNL	BNL	BNL				
Basis	Revise high energy resonance region evaluation. Iron is a key element of structural materials in the DOE Complex (e.g., steel) and is used in many configurations (e.g., tanks, piping, admixed material that can serve as neutron absorber, etc.). ⁵⁶ Fe has numerous resonances above the evaluated resonance range, extending far above the threshold for the first inelastic state. Currently, the latest ⁵⁶ Fe evaluation in the ENDF/B data files does not have detailed resonance parameters here; rather, the evaluation provides a pointwise representation. The ⁵⁶ Fe resonance evaluation will significantly improve radiation transport calculations for systems involving iron (i.e., critical benchmark analyses and criticality safety analyses of processes in the DOE Complex). Evaluation work was performed at IRSN in the past but was not apparently included in ENDF (this will be reviewed and considered for inclusion in ENDF). BNL also participating under DOE-SC funding.						
Lanthanum (La)	ORNL	ORNL					
		LANL					
Basis	¹³⁹ La resonance range evaluation based on ^{nat} La measurements. Lanthanum is an element that is predominantly ¹³⁹ La (99.910 a/o) and a stable fission product. The primary NCS interest is for fission product credit. In the latest version of ENDF nuclear data library, the resonance analysis is based on parameters obtained with an experimental set up which is known to have certain problems. Currently, ENDF/B-VIII evaluations for La do not have adequate covariance data based on experimental data. Improved covariance data are needed to support sensitivity/uncertainty analyses for fission product credit applications. LANL will perform a fast region evaluation and work to merge it with the ORNL resonance region evaluation.						

Nuclear Data Evaluations							
Materials	Pre-FY2023	FY2023	FY2024	FY2025	FY2026	FY2027	Post-FY2027
Lead (^{204,206,207,208} Pb)	ORNL	ORNL					
	RPI	RPI					
	BNL	BNL					
	NNL	NNL					
	IRSN	IRSN					
Basis	Lead is a ubiquitous material in the nuclear industry. Lead possesses not only high photon attenuation properties, which make it almost a universal choice as a gamma-ray shielding material, but also desirable neutronic qualities. Our ability to match experimental data with Pb (reflectors and as a scattering target) is less that we desire. Pb-208 is the majority isotope of natural lead. The current ENDF evaluation is known to suffer from deficiencies in neutron angular distributions. The emphasis of the re-evaluation work is on these angular distributions. We will judge success of this work based on recent semi-integral measurements performed at RPI. ORNL proposed to revisit RRR to address angular distribution concerns. RPI/BNL/NNL/IRSN also have a NE funded collaboration to evaluate Pb at energies relevant to fast reactors.						
Lithium (⁶ Li)	LANL	LANL	LANL				
Basis	The Li-6 evaluation in ENDF/B-VIII.0 was based on a combination of EDA R-Matrix fits to all reactions open in the Li-7 system up to ~ 4 MeV, influenced by the standards GMA 2017 result for the (n,t) reaction, and ENDF/B-VII.1 values above ~4 MeV. Li-6 is important for a number of reasons, including as a detector (and reference) in experiments, for example, for Chi-Nu measurement of prompt fission neutron spectra. It is important to extend the R-Matrix analysis to the full 20 MeV range for better precision and more complete (covariance information) at the important lower energy scale of a few MeV. Supports need at Y-12 for the new electrorefining process.						
Molybdenum (⁹⁵ Mo)		IRSN	IRSN	IRSN			
Basis	Resonance region evaluation. ⁹⁵ Mo is a stable fission product and the primary absorbing nuclide in natural molybdenum. Molybdenum isotopes are currently encountered in irradiated fuel as fission products or in molybdenum alloys in research reactors and space reactors. Current primary interest for NCS is for fission product credit for transport casks, irradiated fuel storage, and reprocessing plants (UPu-MoZr deposits in reprocessing plant equipment for example). Needs identified by NR and IRSN for fission product credit and Y-12 for U-Mo applications (lower priority).						
Neptunium (²³⁷ Np)					ORNL	ORNL	ORNL
					LANL	LANL	LANL
Basis	Fast and RRR/URR evaluation. ²³⁷ Np is an actinide of interest in nuclear criticality safety for applications at ORNL and other sites. Applications include ²³⁸ Pu production w/ HFIR (low NCSP priority) and fast burst reactor for LANL. Nuclear data improvements will improve critical mass estimates. On the HPRL there is a request for fission cross section in the energy range from 200 keV to 20 MeV. The application list was fast systems, and the required accuracy is 1.5-4%. This requirement comes from the desire to improve the current low accuracy in the covariance matrix (6-8%). ORNL to provide RRR/URR evaluation and LANL the fast energy range evaluation.						
Nitrogen (¹⁴ N)		ORNL	ORNL	ORNL			
	Nitrogen cross section are important in the reprocessing process and related analyses. Nitrogen was recently included as action item in the series of INDEN meetings for light nuclei evaluations. In the ENDF/B-VIII.0 library there are no resonance parameters for nitrogen.						
Oxygen (¹⁶ O)	LANL	LANL	LANL	LANL	LANL		
Basis	¹⁶ O is a pervasive isotope in criticality safety applications, including as a component of water or a component of fissile material. Challenges related to fidelity of ¹⁶ O evaluations have persisted for decades in validation studies. Extending high-fidelity R-Matrix analysis to higher incident neutron energies should help address these issues.						

Nuclear Data Evaluations							
Materials	Pre-FY2023	FY2023	FY2024	FY2025	FY2026	FY2027	Post-FY2027
Plutonium (²³⁸ Pu, ²⁴⁰ Pu, ²⁴¹ Pu, ²⁴² Pu)	LANL	LANL		LANL	LANL		
Basis	Minor isotopes of plutonium are always a part of the overall material. It is therefore important that appropriate attention be given to their nuclear data, especially fission data. Los Alamos has committed to consistent evaluations across isotopes. Develop consistent nu-bar evaluation supported by a model code to provide better evaluated nu-bar for minor Pu-isotopes in FY22-FY23. Develop consistent PFNS evaluation supported by a model code to provide better evaluated PFNS for minor Pu-isotopes in FY25-FY26.						
Plutonium (²³⁹ Pu)	LANL						
	ORNL	ORNL	ORNL	ORNL			
	IRSN	IRSN	IRSN	IRSN			
Basis	²³⁹ Pu is one of the three major fissile isotopes of interest in Nuclear Criticality Safety. ²³⁹ Pu is used at LANL, LLNL, Hanford, SRS, and other locations in sufficient quantities to be an NCS concern. ²³⁹ Pu is a major factor in countless ICSBEP benchmarks. NCSP driver includes inadequate agreement of computations with PU-SOL-THERM benchmarks (biased high). Major experimental campaigns at LANSCE for ²³⁹ Pu fission cross section and PFNS are nearing conclusion and the resulting data need to be incorporated into an updated evaluation. ORNL to assist with evaluation work. ORNL and IRSN will collaborate on a review of existing RRR and URR evaluation data and prepare new RRR/URR evaluations that will improve agreement with TEX Pu experimental results.						
Plutonium (²⁴⁰ Pu)			ORNL	ORNL			
	LANL	LANL	LANL	LANL			
Basis	²⁴⁰ Pu is a meaningful component of almost all Pu benchmark experiments, and a significant component in some. This isotope is the next major constituent of plutonium and can reach 20% or more enrichment in reactor fuel. Some changes were made in ENDF/B-VIII.0, but there have been no accurate prompt fission spectra measurements previously. Such experiments, and subsequent re-evaluation will benefit criticality safety analysis for MOX fuel reprocessing, fabrication and disposal. LANL will evaluate the ²⁴⁰ Pu PFNS based on recent Chi-Nu measurements. ORNL will evaluate RR.						
Rhodium (¹⁰³ Rh)	ORNL	ORNL					
	NNL	NNL					
	IRSN	IRSN					
Basis	Update resonance evaluation based on RPI transmission and capture measurements in the RRR/URR. ¹⁰³ Rh is a stable fission product, NCS interest is for fission product credit. Integral experiments are in process that will determine need for new evaluations. Evaluation priority - elevated per IRSN request.						
Strontium (⁸⁸ Sr)	ORNL	ORNL					
Basis	Existing R-matrix analysis of ⁸⁸ Sr in the RRR was performed from the fit of ORELA transmission and capture measurements but the evaluation work was never included in the ENDF/B-VIII.0 library. Strontium is a fission product typically found in spent fuel and in high level waste tanks at Hanford and Savannah River.						
Strontium (^{86,87} Sr)					ORNL	ORNL	ORNL
Basis	^{86,87} Sr RR evaluation based on transmission and capture measurements performed at GELINA to supplement existing ⁸⁸ Sr ORNL measurements to support complete RR evaluation for natural strontium isotopes for ENDF/B. ^{86,87} Sr are minor isotopes representing about 18% of natural strontium.						

Nuclear Data Evaluations							
Materials	Pre-FY2023	FY2023	FY2024	FY2025	FY2026	FY2027	Post-FY2027
Tantalum (Ta)	ORNL						
	NNL						
	LANL						
Basis	Resonance evaluation based on GELINA and RPI measurements. Tantalum is used at Y-12 for recovering uranium from machine turnings and at LANL for Pu casting operations in PF-4 where it may provide modest moderation and reflection of fissile material. Tantalum is chosen due to its material properties, as it is one of the few materials that can contain molten plutonium metal. Due to this characteristic, tantalum is often used as crucible, distributor, launder, or molds for plutonium casting operations. The wall thickness of these materials varies from a few mm all the way up to a few cm. ¹⁸¹ Ta is one of the oldest evaluations in ENDF and long overdue for update. Integral experiments in progress to validate Ta cross sections. Fast region evaluation at LANL in support of PF-4 operations.						
Uranium-233	ORNL	ORNL	ORNL				
	IRSN	IRSN	IRSN				
	LANL	LANL	LANL		LANL	LANL	
Basis	²³³ U is a fissile nuclide of interest to criticality safety. The availability of ²³³ U is important to NCS applications mainly at Y-12, ORNL, and at NCERC. 1. The evaluation will include the newly evaluated thermal values from the standard evaluation including the updated fission prompt neutron spectrum. Reevaluate differential data to check the renormalization of ORNL fission data. A new fit for the fission cross sections to account for the Guber and n_TOF fission data, that agree within 2% from 10 eV to 100 keV and higher than the current ENDF/B-VIII.0 evaluated data. Above 100 eV, there are serious discrepancies between ENDF and the new experimental fission data (from Guber and n_TOF) of up to 10% in the 1–10 keV range (Guber). Update with the new standards. RPI has ²³³ U capture data, which is likely the Weston data (Danon). 2. New evaluation fast. Fission spectrum is important for intermediate benchmarks. Renormalize to new standards. Evaluation in the RRR is planned at ORNL/IRSN and in the fast region at LANL. In the RRR the main goal of the new evaluation is to improve the negative bias in the benchmark calculations.						
Uranium-234	LANL			LANL			
			ORNL	ORNL			
Basis	While ²³⁴ U makes up a small fraction of natural uranium, previous studies have shown that ignoring ²³⁴ U for HEU metal benchmarks can lead to a non-conservative result by as much as 0.4%. Recent advances in the capabilities of the DANCE detector at LANSCE, combined with improved theoretical modeling of the capture reaction (for example, including the M1 scissors-mode contribution to the gamma strength function) have enabled more accurate evaluations of (n,g) cross sections. This work to update the ²³⁴ U capture cross section will utilize both the experimental and theoretical advances. ORNL work will focus on checking the RRR to determine if it needs to be revised. In FY25 LANL will attempt a consistent nu-bar evaluation supported by a model code to provide better nu-bar data for minor U-isotopes.						
Uranium-235	LANL	LANL	LANL				
		ORNL					
		IRSN					
Basis	²³⁵ U is one of the three major fissile isotopes of interest in Nuclear Criticality Safety. ²³⁵ U is used at LANL, LLNL, Hanford, SRS, and GDPs, Y-12, and other locations in sufficient quantities to be an NCS concern. ²³⁵ U is a major factor in countless ICSBEP benchmarks. Major LANSCE experiments of ²³⁵ U fission cross section and PFNS are concluding in the next few years, and the resulting data needs to be incorporated into an updated evaluation. Inelastic scattering cross section measurements are also planned, which will allow evaluators to better address these high-uncertainty interactions. Improvement of ²³⁵ U URR because based on old average resonance parameters. Includes ORNL revisiting ²³⁵ U URR evaluation.						

Nuclear Data Evaluations							
Materials	Pre-FY2023	FY2023	FY2024	FY2025	FY2026	FY2027	Post-FY2027
Uranium-236	LANL			LANL			
							ORNL
							NNL
Basis	<p>^{236}U needs to be considered in modeling of spent fuel. Recent advances in the capabilities of the DANCE detector at LANSCE, combined with improved theoretical modeling of the capture reaction (for example, including the M1 scissors-mode contribution to the gamma strength function) have enabled more accurate evaluations of (n,g) cross sections. This work to update the ^{236}U capture cross section will utilize both the experimental and theoretical advances. ORNL/NNL will evaluate ^{236}U high-resolution transmission measurements in the RRR to complement recent LANL fast energy evaluation. ^{236}U is a minor activation product present in HEU. Improved ^{236}U cross section evaluation supports all DOE programs using HEU. In FY25 LANL will attempt a consistent nu-bar evaluation supported by a model code to provide better nu-bar data for minor U-isotopes.</p>						
Uranium-238	LANL	LANL					
	BNL	BNL					
Basis	<p>^{238}U is a ubiquitous isotope in HEU, LEU, natural uranium, and depleted uranium. It's presence in HEU and LEU fuels makes it a significant contributor to their reactivity and performance. NU and DU are often used as reflectors or shielding materials, and ^{238}U is obviously the dominant isotope in these materials. ^{238}U is a major factor in countless ICSBEP benchmarks. Major LANSCE experiments on the ^{238}U fission cross section and PFNS are concluding in the next few years, and the resulting data needs to be incorporated into an updated evaluation. LANL will evaluate PFNS and multiplicity data for ^{238}U.</p> <p>As part of a joint DOE-SC NDIAWG funded project, LANL and LBNL are remeasuring $^{238}\text{U}(n,n')$ cross section data. This will be evaluated into the existing ENDF evaluation by BNL also as part of this project. This evaluation is expected to also have an impact on neutron leakage in fast systems.</p>						
Vanadium (^{51}V)	ORNL	ORNL	ORNL	ORNL			
Basis	<p>Vanadium is a key structural element and is predominately ^{51}V (99.75 atom %). Primary NCS application is fire resistant cans. Recent data testing by LANL for ICSBEP critical benchmarks involving vanadium (i.e., HMF25, HMF40, and HMM16) results in an over-predication of the experiment eigenvalue. In addition, the HMF25 series of experiments exhibit an increasing calculated eigenvalue trend with increasing reflector thickness. The integral data testing indicates that there may be deficiencies in either the elastic scattering angular distributions or secondary energy distributions. In addition, the latest ENDF/B-VII.1 resonance evaluation is based on the JENDL-4.0 evaluation and does not have covariance data. Also, the ENDF/B-VII.1 and JENDL 4.0 resonance evaluations are based on the parameters provided in the Atlas of Neutron Resonances up to 42.5 keV, and the entire resolved resonance evaluation (up to 100 keV) is represented by the multi-level Breit Wigner (MLBW) formalism. As a result, the MLBW resonance evaluation does not account for the resonance-resonance interference effects. Therefore, the evaluated resonance parameters are not based on a detailed R-matrix analysis. Differential measurements are needed in the resonance region to accurately predict the neutron resonances, and a corresponding resonance evaluation is needed to provide detailed resonance parameters and covariance data. In addition, the SAMMY evaluation software has the capability to generate angular scattering distributions from the resonance parameters thereby providing detailed resonance scattering structure that will improve the elastic scattering modeling in the evaluation. The request is for ORNL to complete new ^{51}V cross-section measurements and a resonance evaluation to address computational biases with the existing ^{51}V evaluation. New measurement/evaluation of fast scattering angular distribution recommended. One of the goals of the evaluation in the RRR is to describe accurately the energy region below 10 keV where previous measurements were affected by large multiple scattering corrections. As described above in the measurement section newly planned capture yield measurement should provide consistent data in the energy region.</p>						

Nuclear Data Evaluations							
Materials	Pre-FY2023	FY2023	FY2024	FY2025	FY2026	FY2027	Post-FY2027
Zirconium (^{90,91,92,94,96} Zr)			ORNL	ORNL	ORNL	ORNL	
			NNL	NNL	NNL	NNL	
	BNL	BNL					
Basis	Resonance evaluations. Zirconium is a key structural element that is primarily used in cladding for fuel rods and is currently in consideration for use with advanced nuclear fuel matrices in the form of zirconium hydride. The latest ENDF/B-VII.1 resonance evaluation relies on JENDL-4 data and resonance parameters from the Atlas of Neutron Resonances. As a result, the evaluated resonance parameters are not based on detailed R-matrix analyses. In addition, newer RPI total cross-section measurements on natural zirconium indicate that the older ENDF/B-VI.8 data match the recent RPI measurements better than the newer isotopic evaluations. Furthermore, improved differential measurements of the zirconium isotopes have been identified on the OECD/NEA nuclear data High Priority Request List (HPRL). Differential measurements are needed in the resonance region to accurately predict the neutron resonances for the zirconium isotopes, and corresponding resonance evaluations are needed to provide detailed resonance parameters and covariance data. In addition, the SAMMY evaluation software has the capability to generate angular scattering distributions from the resonance parameters thereby providing detailed resonance scattering structure that will improve the elastic scattering modeling for the zirconium isotope evaluations. NR continues to be unsatisfied with Zr evaluations in ENDF. BNL will re-evaluate the fast and URR regions of all stable Zr isotopes to ensure that the elastic scattering angular distribution is consistent with the rest of the fast region, to improve the inelastic scattering cross sections and to correct issues with the URR evaluation implemented in ENDF/B-VIII.0 (under DOE-SC funding).						
Uranium Metal (U)	LLNL/NCSU						
Basis	TSL evaluation. Requested by the RPI for use in U-235 resonance parameter analysis.						
Paraffin (C _n H _{2n+2})	LLNL/NCSU	LLNL/NCSU	LLNL/NCSU				
Basis	TSL evaluation. A common moderator and moderating reflector material for which there are numerous critical benchmarks in the ICSBEP Handbook. A thermal scattering law for paraffin will improve simulations through higher fidelity and reduce uncertainties.						
Plutonium Oxide (PuO ₂)		LLNL/NCSU	LLNL/NCSU	LLNL/NCSU			
Basis	TSL evaluation. A common fissile compound for which there are critical experiments in the ICSBEP Handbook. A thermal scattering law for PuO ₂ will improve Doppler broadening using advanced methods currently under development as LLNL ND5.						
Triuranium Octoxide (U ₃ O ₈)			LLNL/NCSU	LLNL/NCSU	LLNL/NCSU		
Basis	TSL evaluation. A common fissile compound for which there are numerous critical experiments in the ICSBEP Handbook. A thermal scattering law for U ₃ O ₈ will improve Doppler broadening using advanced methods currently under development as LLNL ND5.						
Uranium Silicide (U ₃ Si ₂)				LLNL/NCSU	LLNL/NCSU	LLNL/NCSU	
Basis	TSL evaluation. A common fissile compound in use in advanced nuclear reactor fuel. A thermal scattering law for U ₃ Si ₂ will improve Doppler broadening using advanced methods currently under development as LLNL ND5.						
Uranyl Fluoride (UO ₂ F ₂)					LLNL/NCSU	LLNL/NCSU	LLNL/NCSU
Basis	TSL evaluation. A common fissile compound for which there are numerous critical experiments in the ICSBEP Handbook. A thermal scattering law for UO ₂ F ₂ will improve Doppler broadening using advanced methods currently under development as LLNL ND5.						
Zirconium Carbide (ZrC)	NNL						
Basis	TSL evaluation. Zirconium carbide is an advanced coating used in high performance TRISO fuel and as a hydrogen corrosion barrier. Evaluation funded by NR.						
Beryllium Hydride (BeH ₂)	NNL						
Basis	TSL evaluation. Super-moderator for use in critical mass studies. Evaluation funded by NR.						

Nuclear Data Evaluations							
Materials	Pre-FY2023	FY2023	FY2024	FY2025	FY2026	FY2027	Post-FY2027
Plutonium Hydride (PuH _{2+x})				NNL	NNL		
Basis	TSL evaluation. A common fissile compound in use in fissile material operations using hydride/de-hydride processes. A thermal scattering law for PuH _{2+x} will improve Doppler broadening using advanced methods currently under development as LLNL ND5. Evaluation funded by NR.						
Polystyrene (C ₈ H ₈) _n	ORNL						
Basis	Polystyrene is a moderator material found in several thermal systems (PCT001, PCT02, MCT012, MCT013, MCT014, MCT016). Currently, polyethylene is used as a surrogate to represent thermal scattering in polystyrene in neutron transport simulations. This measurement and evaluation will determine the validity of this approximation, as well as inform future substitutions for other hydrocarbons found in benchmarks. RPI could perform sub-thermal transmission measurements to support this TSL evaluation.

B-1 Differential Measurements and Evaluations

(The following list provides the specific milestones to refer to for each element work schedule in Table B-1)

- Beryllium (Be-9)
- Cesium (Cs-133)
- Chlorine (Cl-35)
- Chromium (Cr-50,53)
- Copper (Cu-63,65)
- Fluorine (F-19)
- Hafnium (Hf-176,177,178,179,180)
- Iron (Fe-54,56,57)
- Lanthanum (La)
- Lead (Pb-204,206,207,208)
- Lithium (Li-6)
- Molybdenum (Mo-95)
- Neodymium (Nd-143)
- Neptunium (Np-237)
- Plutonium (Pu-238, 240, 241, 242)
- Plutonium (Pu-239) (LANL/IRSN plus ORNL/IRSN Collaboration)
- Plutonium (Pu-240)
- Samarium (Sm-149, 151)
- Strontium (Sr-88)
- Tantalum (Ta-181)
- Uranium-233 (U-233)
- Uranium-234 (U-234)
- Uranium-235 (U-235)
- Uranium-238 (U-238)
- Vanadium (V-51)
- Zirconium (Zr-90, 91, 92, 94, 96)

Completed Work

- Calcium (Ca)

- Cerium (Ce)
- Cobalt (Co-59)
- Copper (Cu-63, 65)
- Copper (^{nat}Cu) - scattering angular distributions
- Dysprosium (Dy-161, 162, 163, 164)
- Gadolinium (Gd-155, 156, 157, 158, 160)
- Lead (Pb-208)
- Nickel (Ni-58, 60)
- Oxygen (O-16)
- Tungsten (W-182, 183, 184, 186)
- Uranium-236 (U-236)

Completed Differential Measurements and Evaluations – Elements

(Evaluations have been submitted to NNDC and are candidates for the next ENDF release. Testing will be performed as part of ENDF release effort, and additional revisions may be requested by NNDC before evaluations are formally released. The GANTT charts are retained in the Five-Year Plan pending release of the new evaluations by NNDC.)

Table B-1. Differential Measurements and Evaluations

Isotope(s)	Start Date	End Date	Responsible Laboratory	Comments
Beryllium (Be-9)	11/1/11	9/30/26		
Deliver an improved and more consistent evaluation to NNDC	11/15/19	9/30/20	LANL	
Finalize Evaluation and Deliver to NNDC	10/1/19	9/30/20	LANL	
Phase I Testing, Post to ENDF/A and Broadcast	10/1/20	2/1/21	BNL	
CSEWG Validation Testing	12/1/20	5/1/21	NDAG	
CSEWG Approval of Complete Evaluation	5/1/21	8/1/21	BNL	
Extend the upper end of the R-Matrix evaluation from 5 MeV to 10 MeV (including inelastic angular distributions), provide R-Matrix parameters, and deliver evaluation to NNDC	10/1/21	9/30/23	LANL	
Phase I Testing, Post to ENDF/A and Broadcast	10/1/22	2/1/24	BNL	
CSEWG Validation Testing	12/1/22	5/1/24	NDAG	
CSEWG Approval of Complete Evaluation	5/1/23	8/1/24	BNL	
Extend the upper end of the R-Matrix evaluation from 10 MeV to 15 MeV (including 4-body breakup reaction) and deliver evaluation to NNDC	10/1/22	9/30/26	LANL	
Phase I Testing, Post to ENDF/A and Broadcast	10/1/26	2/1/27	BNL:	
CSEWG Validation Testing	12/1/26	5/1/27	NDAG	
CSEWG Approval of Complete Evaluation	5/1/27	8/1/27	BNL	
Cesium (Cs-133)	10/1/23	9/30/26		
Perform transmission and capture measurements using DICER and DANCE at LANSCE, analyze results, publish data, and deliver results to evaluators.	10/1/23	9/30/26	LANL	
Chlorine (Cl-35)	10/1/20	12/30/25		
Perform (n,p) Measurements	10/1/20	9/30/21	ORNL	Funding source: ORNL ND1
Complete WNR (funded by GAIN) and Lujan measurements of Cl-35 (n,p), finalize report on LENZ analysis, and deliver final experimental cross-sections to evaluators	10/1/22	9/30/25	LANL	
Resolve Resonance Region Evaluation	10/01/21	9/30/24	ORNL	
Fast Region Evaluation	10/1/22	9/30/25	LANL	

Isotope(s)	Start Date	End Date	Responsible Laboratory	Comments
Finalize isotopic Evaluation Resonance Region and Fast Evaluations and Deliver to NNDC	10/1/21	9/30/25	ORNL / LANL	
Phase I testing, Post to ENDF/A and Broadcast	10/16/25	10/30/25	BNL	
CSEWG Validation Testing	11/01/25	11/15/25	NDAG	
CSEWG Approval of Complete Evaluation	11/16/25	12/30/25	BNL	
Chromium (Cr-50, 53)				The two links below describe the problem and motivation for the proposed work. In addition to ORNL plans to 1) to develop procedure to treat experimental effects such as neutron sensitivity and multiple scattering corrections with geometry different from cylindrical. https://www.oecd-nea.org/dbdata/hprl/hprlview.pl?ID=518 and https://www.oecd-nea.org/dbdata/hprl/hprlview.pl?ID=519 . Measurements for both isotopes below 10 keV with diluted sample are needed to reduce or minimize the neutron sensitivity of the experimental set up and MS in the sample. Cr50 data over the whole energy ranges is needed.
Perform Capture Measurements	1/1/24	9/30/25	ORNL	
Perform SAMMY Analysis				
Resolved Resonance Region Evaluation for Cr-50, 53	1/1/24	9/30/27	ORNL	
Finalize isotopic Evaluation Resonance Region Evaluation and Deliver to NNDC				
Phase I testing, Post to ENDF/A and Broadcast	10/16/26	10/30/27	BNL	
CSEWG Validation Testing	11/1/26	11/15/27	NDAG	
CSEWG Approval of Complete Evaluation	11/16/26	12/30/27	BNL	
Cu (Cu-63,65)				A revised evaluation on copper isotopes is needed to improve the benchmark performance above 100 keV up to 300 keV. This will include a statistical analysis of the resonance parameters above 100 keV to quantify the impact of the missing resonances in the measured data as well as a guidance in the level spin assignment. Due to the importance of the copper being used in reactor applications as reflector, additional work on the angular distributions is needed. Moreover, since benchmark sensitivity extends above 300 keV, a careful analysis of the high energy cross sections might be needed.
Perform Capture Measurements	N/A	N/A	–	
Perform SAMMY Analysis				
Resolved Resonance Region Evaluation for Cu-63,65	10/1/19	9/30/22	ORNL	
Finalize isotopic Evaluation Resonance Region Evaluation and Deliver to NNDC				
Phase I testing, Post to ENDF/A and Broadcast	10/1/22	1/15/23	BNL	
CSEWG Validation Testing	1/16/23	1/31/23	NDAG	
CSEWG Approval of Complete Evaluation	2/1/23	3/30/23	BNL	

Isotope(s)	Start Date	End Date	Responsible Laboratory	Comments
Work with the IER 537 design team to help optimize the nuclear-data return from the experiment and incorporate improvements into the evaluations. Deliver updated evaluations to NNDC.	1/1/21	9/30/24	LANL	
Phase I testing, Post to ENDF/A and Broadcast	10/1/24	1/15/25	BNL	
CSEWG Validation Testing	1/16/25	1/31/25	NDAG	
CSEWG Approval of Complete Evaluation	2/1/25	3/30/25	BNL	
Fluorine (F-19)	1/1/24	9/30/26		F-19 might be the main cause bias in ²³³ U solution benchmarks. There are no resonance parameters in the ENDF/B-VIII.0 library because the RRR evaluation was converted to point wise cross sections. There are no high-resolution measured data for F-19 inelastic scattering reaction channel, e.g. (n,n'), (n,n0), (n,n1), that in the current evaluation seems to be underestimated. Analysis and evaluation on the angular distributions in RRR is required.
Perform Inelastic Measurements (IRMM)	1/1/24	12/30/24	ORNL	
Perform SAMMY Analysis	12/30/24	9/30/26	ORNL	
Resolve Resonance Region Evaluation for F-19				
Finalize isotopic Evaluation Resonance Region Evaluation and Deliver to NNDC				
Phase I testing, Post to ENDF/A and Broadcast	10/1/26	10/15/26	BNL	
CSEWG Validation Testing	10/15/26	11/1/26	NDAG	
CSEWG Approval of Complete Evaluation	11/1/26	12/31/26	BNL	
Hafnium (Hf-176,177,178,179,180)	10/1/19			Resolved and unresolved resonance evaluations for Hf isotopes have been carried out mainly to address issues on benchmark results in the thermal energy region. IRSN and LLNL will be working on the development of the TEX-Hf experiments focusing in the epithermal energy region. Indeed, MORET calculations of the benchmark sensitive to Hf in the epithermal energy region have demonstrated discrepancies calculated and experimental multiplication factors result. The intent of the proposal is to review and re-evaluate the Hf cross sections in the resolved and unresolved resonance regions with additional covariance and uncertainty information. (ORNL is waiting for IRSN feedback)
Perform assessment of the available Hf evaluation in the resolved and unresolved resonance regions in the JEFF, ENDF and JENDL libraries; Perform detail study of the sensitivity of Hf cross sections in the calculations using the TEX-Hf benchmarks; Examine the results from different cross section libraries; Initiate resonance parameter evaluation in the resolved and unresolved resonance regions.	10/1/19	9/30/20	ORNL/ IRSN/ NNL	
Continue tasks initiated in previous year; Incorporate experimental differential data in the evaluation process as they become available; Continue evaluation using computer evaluation tool.	10/1/20	9/30/21	ORNL/ IRSN/ NNL	
Complete the resolved resonance and resonance parameter covariance evaluation; Use the evaluation for testing in benchmark calculation; Work with ORNL on the benchmark	10/1/21	9/30/25	ORNL/ IRSN/ NNL	

Isotope(s)	Start Date	End Date	Responsible Laboratory	Comments
validation; Submit the evaluation to JEFF and ENDF for further testing;				
Initiate the unresolved resonance region evaluation; Incorporate experimental differential data in the evaluation process as they become available; Continue evaluation using computer evaluation tool;	10/1/22	9/30/23	ORNL/ IRSN/ NNL	
Complete the unresolved resonance and cross section covariance evaluation; Use the evaluation for testing in benchmark calculation; Work with ORNL on the benchmark validation; Submit the evaluation to JEFF and ENDF for further testing.	10/1/23	9/30/25	ORNL/ IRSN/ NNL	
CSEWG Approval of Complete Evaluations				
Fe (Fe-54, 56, 57)	1/1/13	12/31/24		Although the effort on the Fe isotopes was planned as joint effort between ORNL and IRSN, IRSN mainly led the evaluation effort and it is unclear the status of this set of evaluations. The ORNL contribution to 56-Fe was the generation of a preliminary ENDF file solving the problem with the benchmark performance. However, a rigorous evaluation work is still needed for the three major isotopes mainly for the assessment of the inelastic scattering reaction channel.
Perform Capture Measurements for Fe-54	10/1/21	9/30/22	RPI	
Perform SAMMY Analysis	1/1/21	9/30/24	ORNL	
Finalize isotopic Evaluation Resonance Region Evaluation and Deliver to NNDC

Isotope(s)	Start Date	End Date	Responsible Laboratory	Comments
CSEWG Approval of Complete Evaluation	11/1/23	12/31/23	BNL	also desirable neutronic qualities. Our ability to match experimental data with Pb (reflectors and as a scattering target) is less than we desire. Pb-208 is the majority isotope of natural lead. The current ENDF evaluation is known to suffer from deficiencies in neutron angular distributions. The emphasis of the re-evaluation work is on these angular distributions. We will judge success of this work based on recent semi-integral measurements performed at RPI. ORNL proposed to revisit RRR to address angular distribution concerns
Lithium (Li-6)	10/1/21	8/1/25		
Perform data compilation and add EDA code capabilities to support new R-Matrix evaluation up to 20 MeV	10/1/20	9/30/22	LANL	
Deliver new evaluation using R-Matrix analysis to 20 MeV	10/1/22	9/30/24	LANL

Phase I testing, Post to ENDF/A and Broadcast	10/1/20	2/1/21	BNL	
CSEWG Validation Testing	12/1/20	5/1/21	NDAG	
CSEWG Approval of Complete Evaluations	5/1/21	8/1/21	BNL	
Check the status the RRR evaluation	10/1/23	9/30/25	ORNL	
Attempt a consistent nu-bar evaluation supported by a model code to provide better nu-bar data for minor U-isotopes	10/1/24	9/30/25	LANL	
Uranium (U-235)	10/1/11	8/1/25		
Deliver p(nu) Data in ENDF/B Format	10/2/12	9/30/13	LANL	
Deliver Multiplicity-Dependent Fission Spectra	10/2/13	9/30/14	LANL	
Deliver Prompt Fission Gamma Spectra	10/1/14	3/31/16	LANL	
Review the evaluation of U-235 capture and fission cross sections based on new measurements at LANSCE	4/1/16	9/30/17	LANL	
Resolved Resonance Capture Evaluation Per WPEC SG29 Recommendations	10/1/11	9/30/14	ORNL	
CSEWG Validation Testing	10/1/14	9/30/17	NDAG	
CSEWG Approval of Complete Evaluation(s)	10/1/17	12/31/17	BNL	
Update Prompt Fission Neutron Spectra Based on LANSCE Low-Energy Emission Data	10/1/15	9/30/18	LANL	
Finalize prompt fission neutron spectra based on LANSCE high-energy emission data from Chi-Nu	10/1/20	3/31/22	LANL	
Finalize a report assessing our methodology to evaluate PFNS and multiplicity consistently, including angular information about prompt neutrons	4/1/19	9/30/20	LANL	
Evaluate PFNS and multiplicity consistently, including angular information about prompt neutrons	10/1/19	9/30/22	LANL	
Update fission cross section and covariance evaluation based on new TPC results (from U235/U238 ratio data)	10/1/18	9/30/19	LANL	

Isotope(s)	Start Date	End Date	Responsible Laboratory	Comments
Update fission cross section based on TPC Results (from Pu-239/U-235 ratio data)	10/1/20	9/30/21	LANL	
Develop consistent evaluation of fission yields, neutron multiplicity, and spectra from thermal to 20 MeV	10/1/19	9/30/22	LANL	
Revisit elastic and inelastic cross sections based on planned LANSCE experiments using Chi-Nu	10/1/21	9/30/24	LANL	
Finalize evaluation and deliver to NNDC	7/1/23	9/30/24	LANL	
Phase I testing, Post to ENDF/A and Broadcast	10/1/23	2/1/25	BNL	
CSEWG Validation Testing	12/1/23	5/1/25	NDAG	
CSEWG Approval of Complete Evaluations	5/1/23	8/1/25	BNL	
Uranium (U-236)				
Uranium (U-236)	10/1/24	2/1/30		
Attempt a consistent nu-bar evaluation supported by a model code to provide better nu-bar data for minor U-isotopes	10/1/24	9/30/25	LANL	
Transmission measurements at LANL or GELINA	>2026		ORNL	
Resonance evaluation	>2027		ORNL	NNL will collaborate
Finalize RRR evaluation and deliver to NNDC	TBD	TBD	ORNL	
Phase I testing, Post to ENDF/A and Broadcast	TBD	TBD	BNL	
CSEWG Validation Testing	TBD	TBD	NDAG	
CSEWG Approval of Complete Evaluations	TBD	2/1/30	BNL	
Uranium (U-238)				
Uranium (U-238)	10/1/12	9/30/23		
Unresolved Resonance Region Evaluation Using the Hwang-Leal Methodology	10/1/13	12/31/15	ORNL	
Finalize URR Evaluation and Deliver to NNDC	1/1/16	1/1/16	ORNL	
Deliver p(nu) Data in ENDF/B Format	10/1/12	9/30/13	LANL	

Isotope(s)	Start Date	End Date	Responsible Laboratory	Comments
Deliver Multiplicity-Dependent Fission Spectra	10/1/13	9/30/14	LANL	
Deliver Prompt Fission Gamma Spectra	10/1/14	3/31/16	LANL	
Phase I Testing, Post to ENDF/A and Broadcast	1/1/16	1/15/16	BNL	
CSEWG Validation Testing	1/16/16	12/31/16	NDAG	
CSEWG Approval of Complete Evaluation(s)	1/1/17	2/28/17	BNL	
Revisit fission cross section and covariance evaluation based on new TPC data (based on U238/U235 ratio data)	10/1/17	9/30/19	LANL	
Finalize Prompt Fission Neutron Spectra Based on LANSCE Chi-Nu Data	10/1/21	9/30/23	LANL	
Finalize a report assessing our methodology to evaluate PFNS and multiplicity consistently, including angular information about prompt neutrons	4/1/19	9/30/20	LANL	
Evaluate PFNS and multiplicity consistently, including angular information about prompt neutrons	10/1/20	9/30/22	LANL	
Vanadium (V-51)				
Vanadium (V-51)	12/30/24	12/31/25		Additional task for measurement was described above
Complete Resonance Region Capture Measurements (Geel)	12/30/24	9/30/25	ORNL	Due to enhanced neutron scattering and MS of the thin V sample, experiments with a diluted sample are needed for the energy region below 10 keV.
Perform SAMMY Analysis	12/30/24	9/30/25	ORNL	The evaluation work should be started on the basis on the additional needed measurements
Finalize Resonance Evaluation and Deliver to NNDC	9/30/25	9/30/25	ORNL	
Phase I Testing, Post to ENDF/A and Broadcast	10/1/25	10/15/25	BNL	
CSEWG Validation Testing	10/16/25	10/31/25	NDAG	
CSEWG Approval of Complete Evaluation(s)	11/1/25	12/31/25	BNL	
Zirconium (Zr-90,91,92,94,96)				
Zirconium (Zr-90,91,92,94,96)	9/30/14	12/30/24		Capture and transmission Experiments with different nat-Zr samples have been performed
Deliver Updated High-Energy Evaluation of Zr-90	10/1/14	9/30/15	LANL	
Phase I Testing, Post to ENDF/A and Broadcast	10/1/15	10/15/15	BNL	
CSEWG Validation Testing	10/16/15	10/31/16	NDAG	
CSEWG Approval of Complete Evaluations	11/1/16	12/31/16	BNL	
Transmission and Capture Measurements	3/30/20	10/30/25	ORNL	Delay due to COVID-19
Experimentalist Data Reduction and Testing			ORNL	
Resolved Resonance Region Evaluation	3/30/21	6/30/27	ORNL	

Isotope(s)	Start Date	End Date	Responsible Laboratory	Comments
Assess Data for URR Evaluation and Complete URR Evaluation	TBD	TBD	ORNL	
Finalize Resonance Evaluation and Deliver to NNDC	TBD	TBD	ORNL	

B-2 Differential Measurements and Evaluations – Compounds

(The following list provides the specific GANTT chart to refer to for each element work schedule)

- Paraffin (C_nH_{2n+2})
- Plutonium Oxide (PuO_2)
- Polystyrene (C_8H_8)_n
- Uranium Metal (U)
- Uranyl Fluoride (UO_2F_2)
- Triuranium Octoxide (U_3O_8)
- Uranium Silicide (U_3Si_2)

Completed Work

- Lucite ($C_5O_2H_8$)
- Polyethylene (CH_2)_n
- Beryllium (metal)
- Beryllium Oxide (BeO)
- Crystal Graphite
- Reactor Graphite
- Silicon Carbide (SiC)
- Silicon Dioxide (SiO_2)
- Uranium Dioxide (UO_2)
- Uranium Nitride (UN)
- Hexagonal Ice (H_2O) – evaluated by NNL
- Yttrium Hydride (YH_2) – evaluated by NNL
- FLiBe liquid
- Paraffinic Oil
- Uranium Hydride (UH_3) – evaluate by NNL
- Hydrofluoric Acid (HF)
- Water (H_2O)
- Calcium Hydride (CaH_2)
- Reactor Grade Graphite (20% porosity)
- Uranium Carbide (UC)
- Polyethylene (C_2H_4)_n – subthermal transmission
- Lucite ($C_5O_2H_8$) – subthermal transmission
- Polystyrene (C_8H_8)_n – subthermal transmission
- Yttrium Hydride (YH_x) – subthermal transmission
- Beryllium (Be) – subthermal transmission (NR funded)
- Zirconium Carbide (ZrC) – subthermal transmission (NR funded)
- Zirconium Hydride (ZrH_x) – subthermal transmission (NR funded)
- Petrolatum – subthermal transmission (NR funded)

Table B-2. Thermal Scattering Measurements and Evaluations - Compounds

Isotope(s)	Start Date	End Date	Responsible Laboratory	Comments
Water (H ₂ O)	10/1/17	12/31/21		
Thermal Scattering Evaluation	10/1/17	9/30/21	NCSU	
Finalize and Deliver Evaluation to NNDC	TBD	9/30/21	NCSU	
Phase 1 Testing, Post to ENDF/A and Broadcast	TBD	TBD	BNL	
CSEWG Validation Testing	TBD	TBD	NDAG	
CSEWG Approval of Complete Evaluation	TBD	12/31/21	BNL	
Calcium Hydride (CaH ₂)	10/1/19	9/30/22		Emergent request from micro reactor community
Thermal Scattering Evaluation	10/1/19	9/30/21	NCSU	
Finalize and Deliver Evaluation to NNDC	TBD	9/30/21	NCSU	
Phase 1 Testing, Post to ENDF/A and Broadcast	TBD	TBD	BNL	
CSEWG Validation Testing	TBD	TBD	NDAG	
CSEWG Approval of Complete Evaluation	TBD	9/30/22	BNL	
Reactor Grade Graphite (20% porosity)	10/1/19	9/30/22		
Thermal Scattering Evaluation	10/1/19	9/30/21	NCSU	
Finalize and Deliver Evaluation to NNDC	TBD	9/30/21	NCSU	
Phase 1 Testing, Post to ENDF/A and Broadcast	TBD	TBD	BNL	
CSEWG Validation Testing	TBD	TBD	NDAG	
CSEWG Approval of Complete Evaluation	TBD	9/30/22	BNL	
Uranium Metal (U)	10/1/19	6/30/22		Replaced hydraulic fluid.
Thermal Scattering Evaluation	TBD	TBD	NCSU	
Finalize and Deliver Evaluation to NNDC	TBD	TBD	NCSU	
Phase 1 Testing, Post to ENDF/A and Broadcast	TBD	TBD	BNL	
CSEWG Validation Testing	TBD	TBD	NDAG	
CSEWG Approval of Complete Evaluation	TBD	6/30/22	BNL	
Uranium Carbide (UC)	10/1/20	12/31/22		
Thermal Scattering Evaluation	TBD	TBD	NCSU	
Finalize and Deliver Evaluation to NNDC	TBD	TBD	NCSU	
Phase 1 Testing, Post to ENDF/A and Broadcast	TBD	TBD	BNL	
CSEWG Validation Testing	TBD	TBD	NDAG	
CSEWG Approval of Complete Evaluation	TBD	12/31/22	BNL	

Isotope(s)	Start Date	End Date	Responsible Laboratory	Comments
Paraffin (C_nH_{n+2})	10/1/21	12/31/23		
Thermal Transmission Measurements	TBD	TBD	RPI	
Thermal Scattering Evaluation	TBD	TBD	NCSU	
Finalize and Deliver Evaluation to NNDC	TBD	TBD	NCSU	
Phase 1 Testing, Post to ENDF/A and Broadcast	TBD	TBD	BNL	
CSEWG Validation Testing	TBD	TBD	NDAG	
CSEWG Approval of Complete Evaluation	TBD	12/31/23	BNL	
Triuranium Octoxide (U₃O₈)	10/1/22	12/31/24		
Thermal Transmission Measurements	TBD	TBD	RPI	
Thermal Scattering Evaluation	TBD	TBD	NCSU	
Finalize and Deliver Evaluation to NNDC	TBD	TBD	NCSU	
Phase 1 Testing, Post to ENDF/A and Broadcast	TBD	TBD	BNL	
CSEWG Validation Testing	TBD	TBD	NDAG	
CSEWG Approval of Complete Evaluation	TBD	12/31/24	BNL	
Uranyl Fluoride (UO₂F₂)	10/1/23	12/31/25		
Thermal Transmission Measurements	TBD	TBD	RPI	
Thermal Scattering Evaluation	TBD	TBD	NCSU	
Finalize and Deliver Evaluation to NNDC	TBD	TBD	NCSU	
Phase 1 Testing, Post to ENDF/A and Broadcast	TBD	TBD	BNL	
CSEWG Validation Testing	TBD	TBD	NDAG	
CSEWG Approval of Complete Evaluation	TBD	12/31/25	BNL	
Uranium Silicide (U₃Si₂)	10/1/24	12/31/26		
Thermal Transmission Measurements	TBD	TBD	RPI	
Thermal Scattering Evaluation	TBD	TBD	NCSU	
Finalize and Deliver Evaluation to NNDC	TBD	TBD	NCSU	
Phase 1 Testing, Post to ENDF/A and Broadcast	TBD	TBD	BNL	
CSEWG Validation Testing	TBD	TBD	NDAG	
CSEWG Approval of Complete Evaluation	TBD	12/31/26	BNL	
Plutonium Oxide (PuO₂)	10/1/25	12/31/27		
Thermal Scattering Measurements	TBD	TBD	NCSU	
Thermal Scattering Evaluation	TBD	TBD	NCSU	
Finalize and Deliver Evaluation to NNDC	TBD	TBD	NCSU	
Phase 1 Testing, Post to ENDF/A and Broadcast	TBD	TBD	BNL	

Isotope(s)	Start Date	End Date	Responsible Laboratory	Comments
CSEWG Validation Testing	TBD	TBD	NDAG	
CSEWG Approval of Complete Evaluation	TBD	12/31/27	BNL	
Polystyrene (C₈H₈)_n				
Procure Samples	10/1/19	9/30/22		
Write Proposal for Beamtime	10/1/19	6/30/20	ORNL	
Experiment Preparations	3/30/20	3/30/20	ORNL	
Differential Thermal Scattering Measurements at SNS	6/30/20	6/30/20	ORNL	Experiments may be delayed due to COVID-19
Data Reduction & Analysis of SNS Data	7/1/20	12/31/20	ORNL	
Sub thermal Transmission Measurements at RPI	7/1/20	2/28/21	ORNL	Dependent on progress of sub thermal moderator at RPI, which is experiencing COVID-19 related delays.
Data Reduction & Analysis of RPI Data	1/1/21	4/1/21	ORNL/RPI	
Prepare Experimental Data for Submission to EXFOR	1/1/21	5/1/21	ORNL/RPI	
Submit Experimental Data to EXFOR	5/1/21	7/31/21	ORNL	
Perform Thermal Scattering Evaluation	7/31/21	7/31/21	ORNL	
Finalize and Deliver Evaluation to NNDC	6/1/20	7/1/22	ORNL	
Phase 1 Testing, Post to ENDF/A and Broadcast	7/15/22	7/31/22	ORNL	
CSEWG Validation Testing	8/1/22	8/14/22	BNL	
CSEWG Approval of Complete Evaluation	8/15/22	8/30/22	NDAG	
Polyethylene (C₂H₄)_n				
Sub-thermal transmission measurements at RPI	9/1/22	9/30/22	BNL	
Data reduction and analysis	10/1/20	9/30/21	RPI	
Submit Experimental data to EXFOR	10/1/20	9/30/22	RPI	
Yttrium Hydride (YH_x)				
Sub-thermal transmission measurements at RPI	9/1/21	9/30/22	RPI	
Data reduction and analysis	10/1/20	9/30/21	RPI	
Submit Experimental data to EXFOR	10/1/20	9/30/22	RPI	
Lucite (C₅O₂H₈)				
Sub-thermal transmission measurements at RPI	9/1/22	9/30/22	RPI	
Data reduction and analysis	10/1/20	9/30/21	RPI	
Submit Experimental data to EXFOR	10/1/20	9/30/22	RPI	

APPENDIX C: Fiscal Year 2023 Projected Foreign Travel

Lab and Participant(s)	Destination	Date	Count	Costs (\$)	Conference/Meeting Title	Task	Milestone	Justification
LANL Alwin, Cutler, Goda, Hutchinson,, Sanchez	AWE Reading, UK	TBD-2022	5	\$30,000	Coordinate International Collaboration Efforts with AWE and UKNNL	IE, AM, ND, IPD	Provide brief trip summary report to NCSP Manager	Coordinate work as described the Five-Year Execution Plan, Appendix F.
LANL Alwin, Goda, Hutchinson, Thompson,	IRSN Paris, France	TBD-2022	4	\$24,000	Coordinate International Collaboration Efforts with IRSN	IE, AM, ND, IPD	Provide brief trip summary report to NCSP Manager	Coordinate work as described the Five-Year Execution Plan, Appendix E.
LANL Neudecker	IAEA Vienna, Austria	TBD-2022	1	\$6,000	IAEA Consultancy Meeting - INDEN and Nuclear Data Standards	ND	Provide brief trip summary report to NCSP Manager	Meetings (INDEN and Neutron Data Standards) are related to nuclear data evaluation of U-238, U-235, and Pu-238-242 fission observables (nu-bar, PFNS, (n,f) cross sections.) These are related to FY22 milestones of ND1.
LANL Haack, Gibson	IAEA Vienna, Austria	Fall-2022	2	\$12,000	IAEA Consultancy Meeting	AM	Provide brief trip summary report to NCSP Manager	Meetings are related to nuclear data processing, the codes and the processed formats. As NJOY developers (AM-2) and processors (AM-1) we play an important role.
LANL Amundson Favorite, Hutchinson, McKenzie, McSpaden, Smith, Stolte, Weldon	OECD/NEA Paris, France	Apr-2023	8	\$48,000	ICSBEP, IRPhE, and SINBAD Technical Review Meetings	IE, TS	Provide brief trip summary report to NCSP Manager (Q3).	Authors or reviewers for MUSIC, Chlorine Worth Study, Godiva Benchmark Update and JAEA evaluations for ICSBEP, as well as authors of future submissions who have not attended previously. Will also attend IRPhE, and SINBAD Technical Review Meetings.
LANL Colin, Gibson, Haack, Herman, Paris Thompson	OECD/NEA Paris, France	May-2023	6	\$36,000	WPEC Annual Meeting and associated subgroup meetings	ND, AM, IE	Provide brief trip summary report to NCSP Manager (Q3).	Contributor and co-leads of multiple sub-groups and expert groups, including SG45 "Validation of Nuclear Data Libraries (VaNDaL) Project," SG46 "Efficient and Effective Use of Integral Experiments for Nuclear Data Validation," SG49 "Reproducibility in Nuclear Data Evaluation," and EG-GNDS "Recommended Definition of General Nuclear Database Structure." All of these groups are focused on activities that overlap with NCSP priorities. Attending WPEC and its Subgroup 49 to present NCSP sponsored Ta181 evaluation and as a paramount example of evaluation reproducibility.

Lab and Participant(s)	Destination	Date	Count	Costs (\$)	Conference/Meeting Title	Task	Milestone	Justification
LANL Alwin, Hayes, Rising, McKenzie, Thompson	OECD/NEA Paris, France	Jul- 2023	5	\$30,000	WPNCs Annual Meeting and associated subgroup meetings	AM, ND, IE	Provide brief trip summary report to NCSP Manager (Q4).	Contributors and participants in multiple subgroups aimed at providing and comparing state-of-the-art information for improving MCNP®, Whisper, and other computational methods that are necessary and heavily used in NCSP work. Ongoing subgroups include: benchmark quality assessments and metrics, computational bias methods and comparisons, and benchmark correlation calculational methods.
LANL Amundson, Clark Haack, Rising, Thompson, Whitman	Niagra Falls, Ontario, Canada	Aug- 2023	6	\$36,000	The International Conference on Mathematics and Computational Methods Applied to Nuclear Science and Engineering (M&C 2023)	IE, AM, ND	Provide brief trip summary report to NCSP Manager (Q4)	Participation provides state of the art information on improving theoretical models and simulations associated with data analysis of criticality experiments. Participation in MCNP/Whisper methods scientific exchanges with general ANS mathematics and computational scientists. Session about nuclear data and evaluation where both NJOY and our validation work are relevant.
LANL Haack, Gibson	IAEA Vienna, Austria	Fall- 2023	2	\$12,000	IAEA Consultancy Meeting	AM	Provide brief trip summary report to NCSP Manager	Meetings are related to nuclear data processing, the codes and the processed formats. As NJOY developers (AM-2) and processors (AM-1) we play an important role.
LANL Amundson, Cutler, Goda, Hayes, Hutchinson, Kostelac, McKenzie, McSpaden, Rising, Sanchez, Stolte, Thompson, Weldon, Walker, Whitman,	Sendai, Japan	Oct- 2023	15	\$90,000	International Conference on Nuclear Criticality Safety (ICNC)	IE	Provide brief trip summary report to NCSP Manager (Q1FY24)	Participation provides state of the art information for criticality safety.
LLNL Coleman, Heinrichs, Percher	AWE Reading, UK	TBD- 2022	3	\$18,000	JOWOG29/30 Meetings	AM, IE, IPD, ND, TE, TS	Provide brief trip summary report to NCSP Manager (Q4).	Coordinate joint AWE-LLNL work as described in Appendix F of the Five-Year Execution Plan.
LLNL Heinrichs, Siefman	IAEA Vienna, Austria	Oct- 2022	2	\$12,000	CoNDERC- IAEA Technical Meeting on Compilation of Nuclear Data Experiments for Radiation Characterization	IE, ND	Provide brief trip summary report to NCSP Manager (Q1)	Technical meeting of international experts on integral experiments for validation of nuclear data

Lab and Participant(s)	Destination	Date	Count	Costs (\$)	Conference/Meeting Title	Task	Milestone	Justification
LLNL Heinrichs, Percher, Norris, Tamashiro	IRSN Paris, France	TBD- 2023	4	\$24,000	Coordinate International Collaboration Efforts with IRSN	AM, IE, IPD, ND, TS	Provide brief trip summary report to NCSP Manager (Q4).	Coordinate joint IRSN-LLNL work as described in Appendix E of the Five-Year Execution Plan.
LLNL Siefman	OECD/NEA Paris, France	Feb- 2023	1	\$6,000	20th Meeting of the Working Party on Scientific Issues and Uncertainty Analysis of Reactor Systems	IE, ND	Provide brief trip summary report to NCSP Manager (Q2)	Technical meeting of international experts on technical issues relating to the analysis of reactor systems and reactor physics
LLNL Heinrichs, Norris, Percher, Aboud	OECD/NEA Paris, France	Apr- 2023	4	\$24,000	ICSBEP, IRPhE, and SINBAD Technical Review Meetings	IE, IPD, TS	Provide brief trip summary report to NCSP Manager (Q3).	ICSBEP, IRPhE, and SINBAD Technical Review Meetings.
LLNL Siefman, Tamashiro	Lausanne, Switzerland	May- 2023	2	\$12,000	Seventeenth International Symposium on Reactor Dosimetry	IE, ND	Provide brief trip summary report to NCSP Manager (Q3)	Conference devoted to reactor dosimetry and radiation metrology
LLNL Mattoon, Siefman	OECD/NEA Paris, France	May- 2023	2	\$12,000	WPEC Annual Meeting and associated subgroup meetings	AM, IE, ND	Provide brief trip summary report to NCSP Manager (Q3).	Technical meeting of international experts on nuclear data including SG38 (GND) and SG42 (Thermal scattering law).
LLNL Coleman, Percher	Antibes, France	Jun- 2023	1	\$6,000	International Conference on Packaging and Transportation (PATRAM)	IE, ND	Provide brief trip summary report to NCSP Manager (Q4).	Conference focused on nuclear packaging and transportation and related issues including criticality
LLNL Percher, Coleman	OECD/NEA Paris, France	Jul- 2023	2	\$12,000	WPNCs Annual Meeting and associated subgroup meetings	AM, IE, IPD, TS	Provide brief trip summary report to NCSP Manager (Q4).	Participate in activities of the Working Party on Nuclear Criticality Safety and expert group meetings on IE S/U, MC methods, criticality accidents, and experimental needs.
LLNL Heinrichs, Norris, Zywic	Niagra Falls, Ontario, Canada	Aug- 2023	2	\$12,000	The International Conference on Mathematics and Computational Methods Applied to Nuclear Science and Engineering (M&C 2023)	AM, IE, ND	Provide brief trip summary report to NCSP Manager (Q4).	Conference devoted to nuclear calculation and computation methods
LLNL Heinrichs, Siefman, Norris, Percher, Aboud, Araj	Sendai, Japan	Oct- 2023	6	\$36,000	International Conference on Nuclear Criticality Safety (ICNC)	AM, IE, ND, IPD, TS	Provide brief trip summary report to NCSP Manager (Q1FY24).	Once every 4 year conference devoted to criticality safety and related disciplines.

Lab and Participant(s)	Destination	Date	Count	Costs (\$)	Conference/Meeting Title	Task	Milestone	Justification
NNL NDAG Chair (Zerkle)	OECD/NEA Paris, France	Apr-2023	1	\$6,000	ICSBEP, IRPhE, and SINBAD Technical Review Meetings	ND	Provide brief trip summary report to NCSP Manager (Q1).	As NDAG Chair, participate in ICSBEP, IRPhE, and SINBAD Technical Review Meetings.
NNL NDAG Chair (Zerkle)	OECD/NEA Paris, France	May-2023	1	\$6,000	WPEC Annual Meeting and associated subgroup meetings	ND	Provide brief trip summary report to NCSP Manager (Q3).	As NDAG Chair, participate in WPEC, SG48 (Thermal Scattering Law) and EG-HPRL
NNL NDAG Chair (Zerkle)	OECD/NEA Paris, France	Jul-2023	1	\$6,000	WPNCs Annual Meeting and associated subgroup meetings	ND	Provide brief trip summary report to NCSP Manager (Q4).	As NDAG Chair, participate in SG8 on criticality benchmark expert knowledge.
NNL NDAG Chair (Zerkle)	Sendai, Japan	Oct-2023	1	\$6,000	International Conference on Nuclear Criticality Safety (ICNC)	ND	Provide brief trip summary report to NCSP manager (Q1 FY24).	As NDAG Chair, participate in ICNC.
ORNL Wiarda, Brown, McDonnell	IRSN Paris, France	TBD-2022	3	\$18,000	IRSN Meetings	ND	Provide brief trip summary report to NCSP Manager .	Coordinate joint IRSN-ORNL work per 5YP such as the Pu SlideRule; Collaborate with IRSN on the resonance evaluation of the isotopes for the NCSP. AMPX Training
ORNL Wiarda, McDonnell, Brown	IAEA Vienna, Austria	Oct-2022	3	\$18,000	IAEA Technical Meeting on Nuclear Data Processing	ND	Provide brief trip summary report to NCSP Manager (Q1).	Technical meeting of international experts on nuclear data processing methods and codes.
ORNL Lang, TBD	Antibes, France	Jun-2023	2	\$12,000	International Conference on Packaging and Transportation (PATRAM)	IE, ND, TS	Provide brief trip summary report to NCSP Manager (Q4).	Conference focused on nuclear packaging and transportation and related issues including criticality
ORNL Pigni	IAEA Vienna, Austria	Oct-2022	1	\$6,000	IAEA Technical Meeting on Nuclear Data Processing	ND	Provide brief trip summary report to NCSP Manager (Q1)	Technical meeting of international experts on nuclear data processing methods and codes.
ORNL Pigni	IAEA Vienna, Austria	Nov-2022	1	\$6,000	IAEA International Nuclear Data Evaluation Network (INDEN) on Actinides	ND	Provide brief trip summary report to NCSP Manager (Q1).	Technical meeting of international experts on nuclear data processing methods and codes.
ORNL Guber, Brown	IRMM Mol, Belgium	Nov-2022	2	\$12,000	Resonance region nuclear data measurements using GELINA facility at IRMM	ND, TS	Provide brief trip summary report to NCSP Manager (Q1).	Continues cross-section measurements to support the production of new cross-section evaluations per the schedule in Appendix B of the Five-Year Plan. Jesse Brown to support half of the visits to supporting succession planning.

Lab and Participant(s)	Destination	Date	Count	Costs (\$)	Conference/Meeting Title	Task	Milestone	Justification
ORNL Pigni	IAEA Vienna, Austria	Dec-2022	1	\$6,000	IAEA International Nuclear Data Evaluation Network (INDEN) on Structural Methods	ND	Provide brief trip summary report to NCSP Manager (Q1).	Technical meeting of international experts on nuclear data processing methods and codes.
ORNL Bowen, Marshall, Celik, Dupont	OECD/NEA Paris, France	Apr-2023	4	\$24,000	ICSBEP, IRPhE, and SINBAD Technical Review Meetings	TS, IE, AM	Provide brief trip summary report to NCSP Manager (Q1).	Provide oversight of NCSP IE tasks as ICSBEP tasks are the end product of the NCSP IE process, present HPRR benchmark to the TRG.
ORNL Guber, Brown	IRMM Mol, Belgium	Apr-2023	2	\$12,000	Resonance region nuclear data measurements using GELINA facility at IRMM	ND, TS	Provide brief trip summary report to NCSP Manager (Q3).	Continues cross-section measurements to support the production of new cross-section evaluations per the schedule in Appendix B of the Five-Year Plan. Jesse Brown to support half of the visits to supporting succession planning.
ORNL Bowen, Lang	Japan	May-2023	2	\$12,000	ISO TC85/SC5/WG8 Nuclear Criticality Safety meetings and SC5 Plenary	TS	Provide brief trip summary report to NCSP Manager (Q4).	Provides US leadership to ISO TC85/SC5/WG8 by D. Bowen who also chairs the ANS-8 Subcommittee. A. Lang is added to the list as a backup for WG8 leadership in the future.
ORNL Ramic, Wiarda, Brown, McDonnell, Chapman	OECD/NEA Paris, France	May-2023	5	\$30,000	WPEC Annual Meeting and associated subgroup meetings	ND, TS	Provide brief trip summary report to NCSP Manager (Q3).	Technical meeting of international experts on nuclear data including SG38 (GND), EG-GNDS, SG48 (thermal scatter), SG44 (covariance), SG45 (validation), SG46 (IE for ND evaluation), SG50 (automatic readable experimental data base)
ORNL Pigni	IAEA Vienna, Austria	Jun-2023	1	\$6,000	IAEA International Nuclear Data Evaluation Network (INDEN) on light nuclei evaluations	ND	Provide brief trip summary report to NCSP Manager (Q3).	IAEA International Nuclear Data Evaluation Network (INDEN), Vienna, 1 week. International nuclear data evaluation collaboration. Represent NCSP and ORNL interests in international nuclear data evaluation.
ORNL Guber	IRMM Mol, Belgium	Jun-2023	1	\$6,000	Resonance region nuclear data measurements using GELINA facility at IRMM	ND, TS	Provide brief trip summary report to NCSP Manager (Q3).	Continues cross-section measurements to support the production of new cross-section evaluations per the schedule in Appendix B of the Five-Year Plan. Jesse Brown to support half of the visits to supporting succession planning.
ORNL Marshall, Bowen, Bekar, Wieselquist, Metwally	OECD/NEA Paris, France	Jul-2023	5	\$30,000	WPNCs Annual Meeting and associated subgroup meetings	TS, IE, AM	Provide brief trip summary report to NCSP Manager (Q4).	AM collaboration; share expertise and experience in international NCS expert community and learn from international experts and experiences.
ORNL Marshall, Metwally, Celik, Bowen	Niagra Falls, Ontario, Canada	Aug-2023	4	\$24,000	The International Conference on Mathematics and Computational Methods Applied to Nuclear	IE, AM, ND	Provide brief trip summary report to NCSP Manager (Q4)	Participation provides state of the art information on improving theoretical models and simulations associated with data analysis of criticality experiments. Participation in MCNP/Whisper methods scientific exchanges with general ANS

Lab and Participant(s)	Destination	Date	Count	Costs (\$)	Conference/Meeting Title	Task	Milestone	Justification
					Science and Engineering (M&C 2023)			mathematics and computational scientists. Session about nuclear data and evaluation where both NJOY and our validation work are relevant.
ORNL Guber, Brown	IRMM Mol, Belgium	Sep-2023	2	\$12,000	Resonance region nuclear data measurements using GELINA facility at IRMM	ND, TS	Provide brief trip summary report to NCSP Manager (Q4).	Continues cross-section measurements to support the production of new cross-section evaluations per the schedule in Appendix B of the Five-Year Plan. Jesse Brown to support half of the visits to supporting succession planning.
ORNL Marshall, Bowen, Bekar, Wieselquist, Metwally, Celik, Lang, Shaw, Dupont, Greene, Hart, Chapman, Greene, Karriem, Reed	Sendai, Japan	Oct-2023	15	\$90,000	International Conference on Nuclear Criticality Safety (ICNC)	IE, AM, IPD, TE	Provide brief trip summary report to NCSP manager (Q1 FY24).	ICNC is the premier, international conference on nuclear criticality safety. Participation and presentation of recent work supports international collaborations, maintains state-of-the-art knowledge of practice, showcases NCSP-funded research and development efforts, and provides networking opportunities for staff.
RPI Danon	OECD/NEA Paris, France	May-2023	1	\$6,000	WPEC Annual Meeting and associated subgroup meetings	ND	Provide brief trip summary report to NCSP Manager (Q3).	As CSEWG US Measurements Chair, participate and present in the WPEC meeting, subgroup SG-C (high priority list), and other subgroups. Also actively participate in SG-48 (Advances in Thermal Scattering Law Analysis) and SG-50 (Developing an Automatically Readable, Comprehensive and Curated Experimental Reaction Database)
SNL Harms, Lutz, Ames, Miller	OECD/NEA Paris, France	Apr-2023	4	\$18,000	ICSBEP, IRPhE, and SINBAD Technical Review Meetings	TS, IE, AM	Provide brief trip summary report to NCSP Manager (Q1).	ICSBEP, IRPhE, and SINBAD Technical Review Meetings.
SNL Harms, Lutz, Ames, Miller	Sendai, Japan	Oct-2023	4	\$18,000	International Conference on Nuclear Criticality Safety (ICNC)	IE, AM, IPD, TE	Provide brief trip summary report to NCSP manager (Q1 FY24).	Participation provides state of the art information for criticality safety.
Y12 Reynolds	Sendai, Japan	Oct-2023	1	\$6,000	International Conference on Nuclear Criticality Safety (ICNC)	IE	Provide brief trip summary report to NCSP manager (Q1 FY24).	Participation provides state of the art information for criticality safety.

APPENDIX D: Baseline Budget Needs for Execution Year FY2023-FY2025

Baseline Budget Needs for Execution Year FY2023

Baseline budget need for the FY2023 Nuclear Criticality Safety Program (NCSP) is \$29,080K with 95% of funding supporting NCSP FTE's, equating to approximately 58.2 national laboratory or facility contractor employees, who provide programmatic needs as outlined in the NCSP *The Mission and Vision of the United States Department of Energy Nuclear Criticality Safety Program for the Fiscal Years 2019-2028*. All tasks are approved based on their contribution to the achievement of the five- and ten-year goals as outlined in the Mission and Vision document. NCSP includes the following five technical program elements plus support infrastructure, with each having the major deliverables for FY2023.

- Analytical Methods (~8.2 FTEs supported)
 - Criticality Safety Computer Codes SCALE and MCNP support. Maintain RSICC who distributes all software. Development of thermal scattering and self-shielding capabilities in GNDS/FUDGE, and continued work on benchmark intercomparison studies. International collaborations: SCALE, NJOY, MCNP, AMPX work with AWE and IRSN.
- Information Preservation and Dissemination (~1.9 FTEs supported)
 - NCSP website upgrade and maintenance. Three new ICSBEP evaluations and publications (OECD/NEA collaboration) are planned to be completed in FY2023. Complete
- Integral Experiments (~31.7 FTEs supported)
 - A total of 36 critical/subcritical experiments at various stages of design and execution are planned in FY2023 (NCERC and SNL). Permanent party staff at NCERC is supported. International collaborations with AWE and IRSN are included with the planned experiments for FY2023 (see Appendix E and F).
- Nuclear Data (~9.4 FTEs supported)
 - Nuclear data evaluations and measurements prioritized for FY2023 are listed in Appendix B. RPI refurbishment (NR collaboration) continues despite some cost overruns for ancillary equipment. Produce new scattering law data (NCSU and RPI/ORNL collaboration). Modernization of SAMMY resonance analysis software. International collaborations with IRSN are included with the planned experiments for FY2023 (see Appendix E and F). Nuclear data measurements to be performed at IRMM/GELINA led by ORNL.
- Training and Education (~3.0 FTE supported)
 - Two 2-week courses at scheduled with a week of lecture at the National Atomic Testing Museum and hands-on experiments at NCERC and Sandia.
 - One 1-week managers course at Sandia. This course will be used to pilot new Criticality Safety Officer (CSO) training material. One 1-week managers course at NCERC. This course will be used to continue criticality safety training for CSOs and managers.
- NCSP Technical Support (~3.9 FTE supported)
 - Daily execution of the NCSP (ORNL) and support for the CSSG and travel support for two NDAG members. Each site is provided succession planning funds for maintaining key capabilities and NCSP expertise.

There are no planned, approved, budget over-targets planned for FY2023. The projected list of NCSP over-target requests is listed in the table below for FY25-FY29. A description for each request is listed below the table.

NCSP Over-target Requests for FY23 Budget Meeting						
Description	Site(s)	FY25 (\$k)	FY26 (\$k)	FY27 (\$k)	FY28 (\$k)	FY29 (\$k)
Annual support for publication of ICSBEP Handbook	LLNL	50	50	50	50	50

NCSP Over-target Requests for FY23 Budget Meeting

NCSP Over-target Requests for FY23 Budget Meeting						
Criticality Safety Support for NCERC	LANL	188	188	188	188	188
Replacement Fuel for HEU Plates	LANL	TBD	TBD	TBD	TBD	TBD
LLNL experimenter staff	LLNL	300	300	300	300	300
LANL experimenter staff	LANL	300	300	300	300	300
Additional critical experiments facility development work at DAF (e.g., horizontal split table, Jezebel, Np, Comet 2.0)	LANL LLNL	TBD	TBD	TBD	TBD	TBD
Obtain and modify MOX fuel rods for use at SPRF/CX	SNL LANL	TBD	TBD	TBD	TBD	TBD
ORNL Subcritical Training Assembly Fabrication and Siting	ORNL	TBD	TBD	TBD	TBD	TBD
SPRF/CX equipment upgrades	SNL	TBD	TBD	TBD	TBD	TBD

Annual support for the publication of the ICSBEP Handbook

The International Criticality Safety Benchmark Evaluation Program (ICSBEP) contains criticality safety benchmark specifications that have been derived from experiments that were performed at various critical facilities around the world. The benchmark specifications are intended for use by criticality and safety analysts as well as nuclear data evaluators to validate calculational techniques and data. The handbook is produced by the ICSBEP working group, under the aegis of the OECD Nuclear Energy Agency (NEA). While co-ordination and administration of the ICSBEP is undertaken by the NEA, each participating country is responsible for the administration, technical direction, and priorities of the project within their respective countries. The current ICSBEP chair is an employee of LLNL. Funding to support the ICSBEP chair is provided by LLNL. Administrative support for the production and release of the handbook is currently provided by the NEA. However, due to the suspension of Russia's NEA membership in June 2022 following the Russian invasion of Ukraine, NEA no longer has Russia's significant funding contribution to the NEA. The NEA has requested the NCSP to partially support the administrative staff who prepare the handbook for publication.

Criticality Safety Support for NCERC

A 2018 LANL self-assessment identified the need for additional criticality safety support at NCERC. A subsequent letter from the DNFSB to NNSA in June 2022 echoed these concerns following an NCERC assessment conducted by DNFSB staff. In response to these concerns, NA-LA has proposed placing a 0.75 FTE criticality safety professional to be permanently located at NCERC in Nevada.

Replacement Fuel for HEU Plates

The current HEU plates have significant oxide corrosion. This corrosion creates a contamination hazard and affects dimensional measurements taken for benchmark experiments. New HEU replacement plates should be alloyed with a small amount of alloying material to prevent gross oxidation buildup.

LLNL and LANL Integral Experiment Staff

Additional LLNL and LANL integral experiment staff are needed to complete additional critical experiments necessary to support the NCSP workload.

MOX Fuel Rods for Use at SPRF/CX

LANL has unirradiated MOX fuel rods that would be useful for plutonium and uranium experiments at Sandia's SPRF/CX facility. The rods would need to be disassembled and reassembled in an appropriate configuration for use at SPRF/CX and then transported to SPRF/CX.

ORNL Subcritical Training Assembly Fabrication and Siting

ORNL has completed the final design for the NCSP funded subcritical assembly using HALEU fuel with a graphite reflector. This request will support the following activities to implement a subcritical assembly at ORNL to provide support to the NCSP and the general NCS community in the area of training and education.

- Fabrication of a graphite reflector
- Handling, packaging, shipment, and acceptance of HALEU fuel at ORNL from Y-12
- Engineering design support and fabrication of the split table assembly on which experiments will be performed
- Siting support at ORNL for actual course execution.

Sandia SPRF/CX Equipment Upgrades

Upgrades are necessary for continued operation of the SPRF/CX facility.

Baseline Budget Needs for Execution Year FY2024

Baseline budget need for the FY2023 Nuclear Criticality Safety Program (NCSP) is \$30,500K with 95% of funding supporting NCSP FTE's, equating to ~61 national laboratory or facility contractor employees, who provide programmatic needs as outlined in the NCSP *The Mission and Vision of the United States Department of Energy Nuclear Criticality Safety Program for the Fiscal Years 2019-2028*. All tasks are approved based on their contribution to the achievement of the five- and ten-year goals as outlined in the Mission and Vision document.

NCSP includes the following five technical program elements plus support infrastructure, with each having the major deliverables for FY2024:

- Analytical Methods (~8.7 FTEs supported)
 - Criticality Safety Computer Codes SCALE and MCNP support. Maintain Radiation Safety Information Computational Center who distributes all software. Development of NCS excursion analysis capability, thermal scattering and self-shielding capabilities in GNDS/FUDGE, and continued work on benchmark intercomparison studies. International collaborations: SCALE, NJOY, MCNP, AMPX work.
- Information Preservation and Dissemination (~2.0 FTEs supported)
 - NCSP website upgrade and maintenance. About six new ICSBEP evaluations and publications (OECD/NEA collaboration) are planned to be completed in FY2024.
- Integral Experiments (~32.1 FTEs supported)
 - The approximately two dozen critical/subcritical experiments at various stages of design and execution planned in FY2023 (NCERC and SNL) will continue in FY2024. Some newly proposed experiments may be added to the NCSP manager's priority list. Permanent party staff at NCERC is supported. International collaborations with AWE and IRSN are included with the planned experiments for FY2024 (see Appendix E and F).
- Nuclear Data (~9.3 FTEs supported)
 - Nuclear data evaluations and measurements prioritized for FY2023 are listed in Appendix B. RPI refurbishment (NR collaboration) continues despite some cost overruns for ancillary equipment. Produce new scattering law data (NCSU and RPI/ORNL collaboration). Modernization of SAMMY resonance analysis software. International collaborations with IRSN are included with the planned experiments for FY2024 (see Appendix E and F). Nuclear data measurements to be performed at IRMM/GELINA led by ORNL.
- Training and Education (~3.4 FTE supported)
 - Two 2-week courses at scheduled with a week of lecture at the National Atomic Testing Museum and hands-on experiments at NCERC and Sandia.
 - One 1-week managers course at Sandia and at NCERC. This course will be used to continue criticality safety training for CSOs and managers.
- NCSP Technical Support (~5.4 FTEs supported)
 - Daily execution of the NCSP (ORNL) and support for the CSSG and travel support for two NDAG members. Each site is provided succession planning funds for maintaining key capabilities and NCSP expertise.

No budget over-targets have been identified for FY2024.

Baseline Budget Needs for Execution Year FY2025

Baseline budget need for the FY2025 Nuclear Criticality Safety Program (NCSP) is \$30,500K with 95% of funding supporting NCSP FTE's, equating to ~61 national laboratory or facility contractor employees, who provide programmatic needs as outlined in the NCSP *The Mission and Vision of the United States Department of Energy Nuclear Criticality Safety Program for the Fiscal Years 2019-2028*. All tasks are approved based on their contribution to the achievement of the five- and ten-year goals as outlined in the Mission and Vision document.

NCSP includes the following five technical program elements plus support infrastructure, with each having the major deliverables for FY2025:

- Analytical Methods (~8.3 FTEs supported)
 - Criticality Safety Computer Codes SCALE and MCNP support. Maintain Radiation Safety Information Computational Center who distributes all software. Development of NCS excursion analysis capability, thermal scattering and self-shielding capabilities in GNDS/FUDGE, and continued work on benchmark intercomparison studies. International collaborations: SCALE, NJOY, MCNP, AMPX work.
- Information Preservation and Dissemination (~1.9 FTEs supported)
 - NCSP website upgrade and maintenance. Numerous experiments current in execution phase are planned be in the ICSBEP evaluations development phase in FY2025.
- Integral Experiments (~32.6 FTEs supported)
 - Experiments proposed in FY2023 and FY2024 will continue, and new experiments are likely to be added to the NCSP manager's priority list for FY2025. Permanent party staff at NCERC is supported. International collaborations with AWE and IRSN are included with the planned experiments for FY2025 (see Appendix E and F).
- Nuclear Data (~9.3 FTEs supported)
 - Nuclear data evaluations and measurements prioritized for FY2023 are listed in Appendix B. RPI refurbishment (NR collaboration) continues despite some cost overruns for ancillary equipment. The refurbished RPI LINAC is slated to begin operations in FY2025. Modernization of SAMMY resonance analysis software. International collaborations with IRSN are included with the planned experiments for FY2025 (see Appendix E and F). Nuclear data measurements to be performed at IRMM/GELINA led by ORNL.
- Training and Education (~3.3 FTE supported)
 - Two 2-week courses at scheduled with a week of lecture at the National Atomic Testing Museum and hands-on experiments at NCERC and Sandia.
 - One 1-week managers course at Sandia and at NCERC. This course will be used to continue criticality safety training for CSOs and managers.
- NCSP Technical Support (~5.5 FTEs supported)
 - Daily execution of the NCSP (ORNL) and support for the CSSG and travel support for the NDAG chair. Each site is provided succession planning funds for maintaining key capabilities and NCSP expertise.

The projected budget over-targets for FY2025 are in the planning phase in FY2023.

APPENDIX E: International Collaboration with the Institut de Radioprotection et de Sûreté Nucléaire (IRSN) for FY2023

IRSN has an active and growing program of collaboration with the NCSP that aims to underpin and enhance IRSN's nuclear criticality safety. IRSN will provide its expertise and capabilities to support the NCSP's mission and vision so that the collaboration is mutually beneficial to both organizations.
